Vuzix Smart Glasses Now Supports Microsoft Endpoint Manager to Streamline Device Onboarding and Provisioning for Microsoft Teams

ROCHESTER, N.Y., Jan. 20, 2022 /PRNewswire/ -- [Vuzix® Corporation](#) (NASDAQ: VUZI), ("Vuzix" or, the "Company"), a leading supplier of Smart Glasses and Augmented Reality (AR) technology and products, today announced that its smart glasses now support Microsoft Endpoint Manager to manage devices that run on Android Open-Source Project (AOSP). The announcement of this solution follows customer feedback regarding the need to quickly and securely onboard and provision Vuzix smart glasses into applicable enterprise environments.

As the world has been challenged with the global pandemic, the need for remote collaboration has been increasing. With this growing need, many companies have turned to purpose-built, head-mounted wearables. As a result, organizations are tasked with provisioning the smart glasses both efficiently and safely to protect company data. Microsoft Endpoint Manager has the ability to manage devices that run on AOSP, a solution that quickly solved the problems of many of Vuzix' enterprise-level customers.

Pano Spiliotis, Managing Director of Vuzix Custom Solutions said, "One of our biggest focal points as a group is to offer streamlined, purpose-built solutions to solve very specific problems and a significant challenge in organizations is mobile device management when

onboarding glasses. By offering Microsoft Endpoint Manager for our smart glasses, we provide a way for IT departments to easily and quickly configure Vuzix devices, manage compliance, view all hardware properties, and much more. Companies are given the flexibility to provision the device as a user-associated device or a shared device; providing organizations with the choice on how to securely manage the hardware."

"This type of solution offers enterprise-level companies the security they need to feel safe onboarding potentially tens of thousands of glasses and allowing them to do so in a streamlined fashion," said Paul Travers, President and CEO of Vuzix. "Vuzix Custom Solutions business unit was created with the goal of helping uncover problems within an organization and offering a robust solution and this is an excellent example."
