About Standard Lithium

Standard Lithium is a leading near-commercial lithium development company focused on the sustainable development of a portfolio of large, high-grade lithium-brine properties in the United States. The Company prioritizes projects characterized by the highest quality resources, robust infrastructure, skilled labor, and streamlined permitting.

Standard Lithium aims to achieve sustainable, commercial-scale lithium production via the

application of a scalable and fully integrated Direct Lithium Extraction (“DLE”) and purification process. The Company’s flagship projects are located in the Smackover Formation, a world-class lithium brine asset, focussed in Arkansas and Texas. In partnership with global energy leader Equinor, Standard Lithium is advancing the South West Arkansas Project, a greenfield project located in southern Arkansas, and actively exploring promising lithium brine prospects in East Texas. Additionally, the Company is advancing the Phase 1A Project in partnership with LANXESS, a brownfield development project located in southern Arkansas. Standard Lithium operates the only commercial-scale, continuously operating DLE Demonstration facility in North America. Standard Lithium also holds an interest in certain mineral leases in the Mojave Desert in San Bernardino County, California.
