

I.D. Systems to Deploy Wireless Industrial Vehicle Management Technology for Leading Global Automotive Manufacturer in UK

WOODCLIFF LAKE, N.J., Nov. 12, 2013 (GLOBE NEWSWIRE) -- I.D. Systems, Inc. (Nasdaq:IDSY), a leading provider of wireless M2M solutions for securing, tracking and managing high-value enterprise assets, has received a series of purchase orders from a strategic partner to deploy I.D. Systems' PowerFleet™ Vehicle Management System (VMS) on fleets of industrial trucks at three BMW Group (XETRA:BMW) automotive manufacturing plants in the United Kingdom. The strategic partner is the U.K. branch of one of the world's largest manufacturers of industrial trucks. I.D. Systems' subsidiary, I.D. Systems (UK) Ltd., was also instrumental in securing the orders.

"We are very pleased to add the BMW Group as an end-user of our wireless technology, joining many other world-class automotive manufacturers in our customer base," said Jeffrey Jagid, I.D. Systems chairman and CEO. "Our wireless vehicle management systems are a best practice for industrial safety management, material handling efficiency, and supply chain cost control, which drives significant economic and qualitative benefits for our customers. The PowerFleet system not only provides a unique set of functions, like patented impact management technology, it also satisfied BMW's stringent Wi-Fi and network security requirements."

About Vehicle Management Systems (VMS)

A wireless VMS helps improve workplace safety and security by restricting vehicle access to trained, authorized operators, providing electronic vehicle inspection checklists, and managing vehicle impacts. A wireless VMS also helps reduce industrial fleet maintenance costs by automatically uploading vehicle data, reporting vehicle problems electronically, scheduling maintenance according to actual vehicle usage rather than by calendar or manual data entry, and helping determine the optimal economic time to replace equipment. In addition, a wireless VMS helps improve material handling productivity by establishing accountability for the use of equipment, ensuring equipment is in the proper place at the right time, and providing unique fleet utilization metrics.

About I.D. Systems

Headquartered in Woodcliff Lake, New Jersey, with subsidiaries in Texas, Germany, and the United Kingdom, I.D. Systems is a leading global provider of wireless M2M solutions for securing, controlling, tracking, and managing high-value enterprise assets, including rental cars, industrial vehicles, trailers, containers, and cargo. The Company's patented technologies address the needs of organizations to monitor and analyze their assets to increase efficiency and productivity, reduce costs, and improve profitability. For more

Cautionary Note Regarding Forward-Looking Statements

This press release contains forward looking statements within the meaning of federal securities laws. Forward-looking statements include statements with respect to I.D. Systems' beliefs, plans, goals, objectives, expectations, anticipations, assumptions, estimates, intentions, and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond I.D. Systems' control, and which may cause its actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. All statements other than statements of historical fact are statements that could be forward-looking statements. For example, forward-looking statements include: statements regarding prospects for additional customers; market forecasts; projections of earnings, revenues, synergies, accretion or other financial information; and plans, strategies and objectives of management for future operations, including integration plans in connection with acquisitions. The risks and uncertainties referred to above include, but are not limited to, future economic and business conditions, the loss of key customers or reduction in the purchase of products by any such customers, the failure of the market for I.D. Systems' products to continue to develop, the possibility that I.D. Systems may not be able to integrate successfully the business, operations and employees of acquired businesses, the inability to protect I.D. Systems' intellectual property, the inability to manage growth, the effects of competition from a variety of local, regional, national and other providers of wireless solutions, and other risks detailed from time to time in I.D. Systems' filings with the Securities and Exchange Commission, including its annual report on Form 10-K for the year ended December 31, 2012. These risks could cause actual results to differ materially from those expressed in any forward looking statements made by, or on behalf of, I.D. Systems. I.D. Systems assumes no obligation to update the information contained in this press release, and expressly disclaims any obligation to do so, whether as a result of new information, future events or otherwise.
