I.D. Systems Receives Additional Follow-On Purchase Orders From Fortune 100 Customer

WOODCLIFF LAKE, N.J., June 30, 2014 (GLOBE NEWSWIRE) -- I.D. Systems, Inc. (Nasdaq:IDSY), a leading provider of wireless M2M asset management solutions, has received a series of purchase orders, valued at more than \$800,000, to deploy its PowerFleet® wireless Vehicle Management System (VMS) on fleets of lift trucks at multiple distribution centers of a Fortune 100 company. Following implementation, I.D. Systems will have deployed its wireless VMS technology in approximately 30 of the end user's facilities.

The orders were generated by one of I.D. Systems' channel partners.

"We are gratified that this Fortune 100 end user continues to expand its deployment of our wireless technology across its distribution network," said Kenneth Ehrman, I.D. Systems' chairman and CEO. "The current series of purchase orders follows prior tranches of orders we received in the first quarter and early in the second quarter of 2014. We view this as a clearly implied endorsement of the many benefits of our patented wireless VMS technology—and its compelling return on investment."

About Wireless Vehicle Management Systems

A wireless vehicle management system (VMS) helps improve workplace safety and security by restricting vehicle access to trained, authorized operators, providing electronic vehicle inspection checklists, and managing vehicle impacts. A wireless VMS helps reduce industrial fleet maintenance costs by automatically uploading vehicle data, reporting vehicle problems electronically, scheduling maintenance according to actual vehicle usage rather than by calendar or manual data entry, and helping determine the optimal economic time to replace equipment. In addition, a wireless VMS helps improve material handling productivity by establishing accountability for the use of equipment, ensuring equipment is in the proper place at the right time, and providing unique fleet utilization metrics.

About I.D. Systems

Headquartered in Woodcliff Lake, New Jersey, with subsidiaries in Texas, Germany, and the United Kingdom, I.D. Systems, Inc. is a leading global provider of wireless M2M solutions for securing, controlling, tracking, and managing high-value enterprise assets, including industrial vehicles, rental cars, trailers, containers, and cargo. The company's patented technologies address the needs of organizations to monitor and analyze their assets to increase efficiency and productivity, reduce costs, and improve profitability. PowerFleet® is a registered trademark of I.D. Systems. For more information, visit www.id-systems.com.

Cautionary Note Regarding Forward-Looking Statements

This press release contains forward looking statements within the meaning of federal

securities laws. Forward-looking statements include statements with respect to I.D. Systems' beliefs, plans, goals, objectives, expectations, anticipations, assumptions, estimates, intentions, and future performance, and involve known and unknown risks, uncertainties and other factors, which may be beyond I.D. Systems' control, and which may cause its actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. All statements other than statements of historical fact are statements that could be forward-looking statements. For example, forward-looking statements include: statements regarding prospects for additional customers; market forecasts; potential barriers to competition; projections of earnings, revenues, synergies, accretion or other financial information; and plans, strategies and objectives of management for future operations. The risks and uncertainties referred to above include, but are not limited to, future economic and business conditions, the loss of key customers or reduction in the purchase of products by any such customers, the failure of the market for I.D. Systems' products to continue to develop, the possibility that I.D. Systems may not be able to integrate successfully the business, operations and employees of acquired businesses, the inability to protect I.D. Systems' intellectual property, the inability to manage growth, the effects of competition from a variety of local, regional, national and other providers of wireless solutions, and other risks detailed from time to time in I.D. Systems' filings with the Securities and Exchange Commission, including its annual report on Form 10-K for the year ended December 31, 2013. These risks could cause actual results to differ materially from those expressed in any forward looking statements made by, or on behalf of, I.D. Systems. I.D. Systems assumes no obligation to update the information contained in this press release, and expressly disclaims any obligation to do so, whether as a result of new information, future events or otherwise.
