NON-GAAP FINANCIAL MEASURES

To supplement its financial statements presented in accordance with Generally Accepted Accounting Principles (GAAP), Powerfleet provides certain non-GAAP measures of financial performance. These non-GAAP measures include adjusted EBITDA and net adjusted debt. Reference to these non-GAAP measures should be considered in addition to results prepared under current accounting standards, but are not a substitute for, or superior to, GAAP results. These non-GAAP measures are provided to enhance investors' overall understanding of Powerfleet's current financial performance. Specifically, Powerfleet believes the non-GAAP measures provide useful information to both management and investors by excluding certain expenses, gains and losses and fluctuations in currency rates that may not be indicative of its core operating results and business outlook. These non-GAAP measures are not measures of financial performance or liquidity under GAAP and, accordingly, should not be considered as an alternative to net income or total debt as an indicator of operating performance or liquidity. Because Powerfleet's method for calculating the non-GAAP measures may differ from other companies' methods, the non-GAAP measures may not be comparable to similarly titled measures reported by other companies.

Reconciliation of all non-GAAP measures included in this press release to the most directly comparable GAAP measures can be found in the financial tables included in this press release.
