MacDermid Alpha's Dunaharaszti Manufacturing Site Achieves IATF 16949 Certification

(Waterbury, CT USA) – February 21st, 2019 – MacDermid Alpha Electronics Solutions' Assembly Division has achieved the International Automotive Task Force (IATF) 16949:2016 certification for its Dunaharaszti manufacturing site in Hungary.

Antoine Pouwels, Director of Quality for Europe at MacDermid Alpha, presented the certification to the Dunaharaszti site. "Attaining the IATF 16949 certification demonstrates our commitment to producing high quality solutions for the automotive electronics market", comments Antoine. "The IATF 16949 is recognised by leading automotive manufacturers and OEMs worldwide as it ensures suppliers implement and maintain rigorous systems of control to produce the highest quality products with no errors."

As well as the Dunaharaszti site, MacDermid Alpha Electronics Solutions achieved the IATF 16949 certification for all Assembly manufacturing sites globally. The IATF 16949 puts emphasis on defect prevention, continual improvement in the overall supply chain and reduction of waste. It aims to create a culture where employees instinctively strive to fulfill and even exceed customer expectations.
