# **Data Storage Corporation (OTCBB: DTST) Creates Healthcare Division to Focus on Health IT**

GARDEN CITY, NY -- (MARKET WIRE) -- 06/03/09 -- Data Storage Corporation (OTCBB: DTST), a provider of disaster recovery and business continuity solutions, is proud to introduce its new division, Healthcare DPS, as burdening industry, state, and federal regulations create demand for services. Healthcare DPS specializes in comprehensive Health IT solutions for group practices, nursing homes, assisted living facilities, and hospitals in the New York Metro area. The new division has a broad solution portfolio including a 2008 CCHIT Certified ® Electronic Health Record (EHR) solution, Practice Management, Paper Scanning, e-Mail Archiving and e-Discovery, Medical Image Archiving, Data Backup and Storage, Network Monitoring, Internet Service, Telecommunications, and Compliance Documentation.

"Our solutions empower providers to improve profitability and maximize efficiency, resulting in improved quality of life for providers as well as the quality of care for their patients," said Jason Nocco who oversees the new division as Vice President and General Manager. He went on further to say "We understand the challenges that healthcare professionals face today as well as the regulations that they will have to comply with tomorrow. Healthcare DPS makes that transition reasonable, affordable, and sometimes even lucrative."

Healthcare DPS is positioned to become a regionally recognized brand name aiming to capitalize on increasing industry, state, and federal regulations which include the HITECH Act for Healthcare in the American Recovery and Reinvestment Act of 2009 recently signed by President Barack Obama.

A typical client may see an increase in revenue due to Medicare reimbursement for e-prescription use, a reduction of their telephone or Internet expenses, and an increase in efficiency after leveraging EHR and Practice Management solutions, ultimately leading to more patient visits per day and more revenue throughout the year. In addition, clients as well as their patients benefit from increased security of electronic protected health information and the reassurance of regulatory compliance.
