Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The accompanying financial statements of **Athene Annuity & Life Assurance Company of New York** (the Company) have been prepared in conformity with the accounting practices prescribed or permitted by the National Association of Insurance Commissioners (NAIC) and the State of New York.

The New York Department of Financial Services (NYDFS) recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the New York Insurance Law. The NAIC *Accounting Practices & Procedures Manual* (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of New York to the extent permitted by New York Insurance Law and Regulations. New York Regulation 172 – Financial Statement Filings and Accounting Practices and Procedures cites specific provisions of NAIC SAP that are in conflict with New York State Insurance Laws and Regulation and are, consequently, not adopted. The Superintendent of Insurance has the right to permit other specific practices that deviate from prescribed practices.

There are no reconciling items between NAIC SAP and practices prescribed or permitted by the State of New York in the Company’s financial statements.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results may differ from the estimates used in preparing the financial statements.

C. Accounting Policy

- (1) Short-term investments - No Significant Changes
- (2) Bonds which qualify as issuer credit obligations are stated at amortized cost or fair value based on their rating by the NAIC. Bonds held at amortized cost are amortized using the scientific interest method on a yield-to-worst basis.
- (3) Common stocks - No Significant Changes
- (4) Preferred stocks - No Significant Changes
- (5) Mortgage loans - No Significant Changes
- (6) Bonds which qualify as asset-backed securities are stated at amortized cost or fair market value based on their rating by the NAIC. Changes to estimated cash flows on the securities are accounted for retrospectively for securities that are highly rated at the time of purchase and in which the security cannot be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. The prospective method is used for those securities where an other-than-temporary impairment has been taken, the security is not highly rated at the time of purchase, securities where receipt of all contractual principal cash flows is not expected, or those securities that can be contractually prepaid or settled in such a way that the Company would not recover substantially all of the recorded investment. Asset-backed securities stated at amortized cost are amortized or accreted using the scientific interest method.

Debt securities that do not qualify as bonds under the principles-based bond definition are reported at the lower of amortized cost or fair value. Residual interests in securitization vehicles that do not qualify as bonds are initially reported at cost. Subsequently, they are reported using the calculated practical expedient method, where the book/adjusted carrying value is reduced by distributions received until the residual interests have a book or adjusted carrying value of zero. Any distribution received thereafter is recognized as interest income.
- (7) Investments in subsidiaries, controlled and affiliated entities - No Significant Changes
- (8) Investments in joint ventures, partnerships and limited liability entities - No Significant Changes
- (9) Derivatives - No Significant Changes
- (10) Investment income as a factor in the premium deficiency calculation - No Significant Changes
- (11) Liabilities for losses and loss/claim adjustment expenses - No Significant Changes
- (12) Changes in capitalization policy - No Significant Changes

(4) All impaired securities for which an OTTI has not been recognized in earnings as a realized loss

The following table shows the gross unrealized losses and fair values of asset-backed securities, which have not been impaired to fair value, aggregated by length of time that individual securities have been in continuous unrealized loss position as of June 30, 2026:

- a. The aggregate amount of unrealized losses:

1. Less than 12 months \$ 3,928,482

2. 12 months or longer 12,892,952
- b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months \$ 334,854,164

2. 12 months or longer 108,828,763

(5) A full analysis of all relevant qualitative considerations was completed in reaching the conclusion that the impairments were not other-than-temporary, including the intent and ability to hold the investment for a period of time sufficient to allow for a recovery in value. Specific events that may influence the operations of the issuer and impaired earnings potential are reviewed in addition to length of time and extent to which the fair value has been less than cost.

Some employees of Athene Employee Services LLC and Athene Annuity and Life Company participate in one or more Share Award Agreements (the Agreements) sponsored by Apollo Global Management, Inc., an indirect parent of the Company, for which the Company has no legal obligation. Salary expense of Athene Employee Services LLC and Athene Annuity and Life Company is allocated to the Company through the Shared Services Agreement. Under SSAP No. 104, *Share-Based Payments*, the stock compensation expense associated with the Agreements that would have been allocated to the Company is required to be recorded as a capital contribution to the reporting entity. The Company has allocated the stock compensation expense associated with the Agreements based on the same methodology as the Shared Services Agreement. In accordance with SSAP No. 104, the Company incurred expense and recorded a capital contribution under the Agreements totaling \$0.1 million for the six months ended June 30, 2026 and \$0.1 million for the year ended December 31, 2025, respectively, which includes amounts contributed by the Company to downstream insurance subsidiaries.

Fiduciary or Best Interest Standards - On February 13, 2020, the NAIC adopted the Suitability in Annuity Transactions Model Regulation (SAT), to incorporate a "best interest" standard of conduct for annuity recommendations and to impose related obligations on insurance producers and issuing insurers, including training requirements. All states have adopted the amended SAT or their own standard of conduct. On July 22, 2018, separate and apart from the NAIC, the NYDFS issued amendments to its SAT regulation to incorporate a "best interest" standard with respect to the suitability of life insurance and annuity sales. Future changes in such laws and regulations, including those that impose a "best interest" standard, may impact the way the Company and its subsidiaries market and sell annuity products.

Since 2016, the DOL has issued various regulations expanding the definition of "investment advice" and broadening the circumstances under which distributors and manufacturers of insurance and annuity products could be considered "fiduciaries" and subject to certain standards in providing advice. On April 23, 2024, the Department of Labor published the final version of the fiduciary rule that was intended to broaden the circumstances under which financial institutions, including insurance companies, could be considered to be fiduciaries under ERISA, including with respect to recommendations to rollover assets from employer-sponsored retirement plans to individual retirement accounts. The DOL also published amendments to certain prohibited transaction exemptions, including PTE 84-24 (applicable to the sale of annuity contracts) and PTE 2020-02 (applicable to receipt of compensation in connection with providing investment advice, including advice to rollover assets from an employer-sponsored retirement plan). Two federal district courts in Texas issued stays on the implementation of the final version of the fiduciary rule and the amendments to the prohibited transaction exemptions and the DOL filed an appeal to these decisions. The appeal was later dismissed on November 28, 2025 and the court later formally vacated the fiduciary rule. On March 18, 2026, the DOL announced the reinstatement of the 1975 regulation defining investment advice by reference to a five-part test for determining whether certain communications to ERISA plans and individual retirement accounts constitute "fiduciary" investment advice for purposes of ERISA and Section 4975 of the Code. There has been indication the DOL may revisit addressing the rule in 2026 and we will continue to monitor the situation to determine if any update would impact our business.

In addition to the matters previously discussed, the Company is routinely involved in litigation and other proceedings, reinsurance claims and regulatory proceedings arising in the ordinary course of its business. At present, no contingencies related to pending litigation and regulatory matters are considered material in relation to the financial position of the Company.

Transfers into and out of Level 3 represent securities carried at lower of cost or fair value resulting in periodic transfers into and out of Level 3 Financial instruments which are characterized as carried at fair value. Transfers into and out of Level 3 may also occur due to changes in valuation sources, or changes in the availability of market observable inputs.

(3) Transfers between fair value hierarchy levels are recognized at the end of the period in which the transfer occurs.

(4) The following discussion describes the valuation methodologies and inputs used for assets and liabilities measured and disclosed at fair value. The techniques utilized in estimating the fair values of financial instruments are reliant on the assumptions used.

Fair value estimates are based on quoted market prices when available. When quoted market prices are not available, the Company utilizes commercially available pricing vendors that utilize observable market inputs, like recent trading activity, to derive fair value. When vender prices are not available, fair value is generally estimated using discounted cash flow analyses, incorporating current market inputs for similar financial instruments with comparable terms and credit quality (matrix pricing). In instances where there is little or no market activity for the same or similar instruments, the Company estimates the fair value using methods, models and assumptions that management believes market participants would use to determine a current transaction price. These valuation techniques involve some level of management estimation and judgment which becomes significant with increasingly complex instruments or pricing models. Where appropriate, adjustments are included to reflect risk inherent in a particular methodology, model or input employed.

The Company's financial assets and liabilities carried at estimated fair value have been classified, for disclosure purposes, based on a hierarchy defined by current accounting guidance. The hierarchy gives the highest ranking to fair values determined using unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest ranking to fair values determined using methodologies and models with unobservable inputs (Level 3). An asset's or a liability's classification is based on the lowest level input that is significant to its measurement. For example, a Level 3 fair value measurement may include inputs that are both observable (Levels 1 and 2) and unobservable (Level 3).

The levels of the fair value hierarchy are as follows:

- Level 1 - Unadjusted quoted prices for identical assets or liabilities in an active market.
- Level 2 - Quoted prices for inactive markets or valuation techniques that require observable direct or indirect inputs for substantially the full term of the asset or liability.

Level 2 inputs include the following:
 - Quoted prices for similar assets or liabilities in active markets,
 - Observable inputs other than quoted market prices, and
 - Observable inputs derived principally from market data through correlation or other means.
- Level 3 - Prices or valuation techniques with unobservable inputs significant to the overall fair value estimate. These valuations use critical assumptions not readily available to market participants. Level 3 valuations are based on market standard valuation methodologies, including discounted cash flows, matrix pricing, or other similar techniques.

Assets and liabilities are valued as discussed below in part C.

(5) See parts (1) through (4) above.

Bonds, cash equivalents and short-term investments – The Company obtains the fair value for most marketable, public securities without an active market from several commercial pricing services. These are classified as Level 2 assets. The pricing services incorporate a variety of market observable information in their valuation techniques, including benchmark yields, broker-dealer quotes, credit quality, issuer spreads, bids, offers, and other reference data. If the Company cannot value public security with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and these securities are considered to be Level 3. The Company values privately placed securities based on the credit quality and duration of comparable marketable securities, which may be securities of another issuer. In some instances, the Company uses a matrix-based pricing model. These models consider the current level of risk-free interest rates, corporate spreads, credit quality of the issuer, and cash flow characteristics of the security. Privately placed securities are classified as Level 2 or 3.

Preferred stocks – The Company values equity securities traded on an exchange as Level 1. Private equities or equity securities not traded on an exchange and are priced by a commercial pricing service are classified as Level 2, and the securities priced by an internal model are classified as Level 3.

Mortgage loans – The Company estimates mortgage loans on a monthly basis using discounted cash flow analysis and rates being offered for similar loans to borrowers with similar credit ratings. Loans with similar characteristics are aggregated for purposes of the calculations. The discounted cash flow model uses unobservable inputs, including estimates of discount rates and loan prepayments. Mortgage loans are classified as Level 3.

Policy loans – The fair value of policy loans classified as Level 2 is equal to the carrying value of the loans, which are collateralized by the cash surrender value of the associated insurance contract.

Derivatives (including separate account group annuity and index-linked products) – Derivative contracts can be exchange traded or over-the-counter. Over-the-counter derivatives are valued using valuation models or an income approach using third-party broker valuations. Valuation models require a variety of inputs, including contractual terms, market prices, yield curves, measures of volatility, prepayment rates, and correlation of the inputs. The Company considers and incorporates counterparty credit risk in the valuation process through counterparty credit rating requirements and monitoring of overall exposure. The Company also evaluates and includes its own nonperformance risk in valuing derivatives. The majority of the Company's derivatives trade in liquid markets; therefore, the Company can verify model inputs and model selection does not involve significant management judgment and are classified within Level 2. If the Company cannot verify model inputs and model selection does involve significant management judgment, the derivatives are classified as Level 3.

Other invested assets – Within other invested assets, partnerships are valued based on net asset value information provided by the general partner or related asset manager. These partnership interests usually include multiple underlying investments for which either observable market prices or other valuation methods are used to determine the fair value. These investments are reported in the Net Asset Value (NAV) column. Other than partnerships, other invested asset may include surplus notes and other investments with bond or stock characteristics and the Company values these using several commercial pricing services and are classified as Level 2 assets. If the Company cannot value with a commercial pricing vendor, the Company obtains broker quotes (or utilizes an internally-developed model) and are considered to be Level 3 assets.

Separate account assets (group annuity and index-linked products) – Financial instruments within these separate accounts are valued using the same fair value assumptions and methods utilized in the general account.

Deposit-type contracts (including separate account) – Deposit-type contracts classified as Level 3 include single premium immediate annuities (SPIA) and supplemental contracts. Fair value of SPIA and supplemental contracts are calculated by discounting best estimate cash flows based on market interest rate assumptions.

20. Fair Value Measurements (Continued)

E. Nature and Risk of Investments Reported at NAV

The Company invests in certain non-fixed income, alternative investments in the form of limited partnerships (investment funds) which are reported at net asset value. Adjustments to the carrying amount reflect the Company’s pro rata ownership percentage of the operating results as indicated by NAV in the investment fund financial statements. The NAV from the investment fund financial statements can be on a lag of up to three months when investee information is not received in a timely manner. These investments are listed in the NAV column of the fair value tables above as this is the primary method for reporting fair value for these investments.

As of June 30, 2026, the Company has no unfunded commitments to invest in these investment funds.

 - b. Issuer or obligor is current on all contracted interest and principal payments.
 - c. The insurer has an actual expectation of ultimate payment of all contracted interest and principal.
- Has the reporting entity self-designated 5GI securities? Yes [] No [X]

STATEMENT AS OF JUNE 30, 2026 OF THE Athene Annuity & Life Assurance Company of New York

GENERAL INTERROGATORIES

19.

By self-designating PLGI securities, the reporting entity is certifying its compliance with the requirements as specified in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual) for private letter rating (PLR) securities and the following elements of each self-designated PLGI security:

a.

The security was either:

i.

issued prior to January 1, 2018 (which is exempt from PLR filing requirements pursuant to the P&P Manual), or

ii.

issued from January 1, 2018 to December 31, 2021 and subject to a confidentiality agreement executed prior to January 1, 2022 which confidentiality agreement remains in force, for which an insurance company cannot provide a copy of a private letter rating rationale report to the SVO due to confidentiality or other contractual reasons ("waived submission PLR securities").

b.

The reporting entity is holding capital commensurate with the NAIC Designation and NAIC Designation Category reported for the security.

c.

The NAIC Designation and NAIC Designation Category were derived from the credit rating assigned by an NAIC CRP in its legal capacity as a NRSRO which is shown on a current private letter rating, dated during the financial statement year, held by the insurer and available for examination by state insurance regulators.

d.

Other than for waived submission PLR securities, defined above, on or after January 1, 2024 for any PLR securities issued on or after January 1, 2022, if the reporting entity is not permitted to share this private credit rating or the private rating letter rationale report of the PL security with the SVO, it certifies that it is reporting it as an NAIC 5.B GI and may not assign any other self-designation.

Has the reporting entity self-designated PLGI to securities, all of which meet the above requirement and as specified in the P&P Manual?

Yes

20.

By assigning FE to a Schedule BA non-registered private fund, the reporting entity is certifying the following elements of each self-designated FE fund:

a.

The shares were purchased prior to January 1, 2019.

b.

The reporting entity is holding capital commensurate with the NAIC Designation reported for the security.

c.

The security had a public credit rating(s) with annual surveillance assigned by an NAIC CRP in its legal capacity as an NRSRO prior to January 1, 2019.

d.

The fund only or predominantly holds bonds in its portfolio.

e.

The current reported NAIC Designation was derived from the public credit rating(s) with annual surveillance assigned by an NAIC CRP in its legal capacity as an NRSRO.

f.

The public credit rating(s) with annual surveillance assigned by an NAIC CRP has not lapsed.

Has the reporting entity assigned FE to Schedule BA non-registered private funds that complied with the above criteria?
