Cautionary Statement Regarding Forward-Looking Statements

This presentation contains “forward-looking statements.” Forward-looking statements represent Bristow Group Inc.’s (the “Company”) current expectations or forecasts of future events. Forward-looking statements generally can be identified by the use of forward-looking terminology such as “may,” “will,” “expect,” “intend,” “estimate,” “anticipate,” “believe,” “project,” or “continue,” or other similar words and, for the avoidance of doubt, include all statements herein regarding the Company’s financial targets for Calendar Years 2023 and 2024 and operational outlook. These forward-looking statements include statements regarding expectations with respect to the Irish Coast Guard Aviation Service contract and related procurement process. These statements are made under the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, reflect management’s current views with respect to future events and therefore are subject to significant risks and uncertainties, both known and unknown. The Company’s actual results may vary materially from those anticipated in forward-looking statements. The Company cautions investors not to place undue reliance on any forward-looking statements.

Forward-looking statements (including the Company’s financial targets for Calendar Years 2023 and 2024 and operational outlook) speak only as of the date of the document in which they are made. The Company disclaims any obligation or undertaking to provide any updates or revisions to any forward-looking statement to reflect any change in the Company’s expectations or any change in events, conditions or circumstances on which the forward-looking statement is based that occur after the date hereof except as may be required by applicable law. Risks that may affect forward-looking statements include, but are not necessarily limited to, those relating to: public health crises, such as pandemics (including COVID-19) and epidemics, and any related government policies and actions; any failure to effectively manage, and receive anticipated returns from, acquisitions, divestitures, investments, joint ventures and other portfolio actions; our inability to execute our business strategy for diversification efforts related to, government services, offshore wind, and advanced air mobility; our reliance on a limited number of customers and the reduction of our customer base as a result of consolidation and/or the energy transition; the possibility that we may be unable to maintain compliance with covenants in our financing agreements; global and regional changes in the demand, supply, prices or other market conditions affecting oil and gas, including changes resulting from a public health crisis or from the imposition or lifting of crude oil production quotas or other actions that might be imposed by the Organization of Petroleum Exporting Countries (OPEC) and other producing countries; fluctuations in the demand for our services; the possibility that we may impair our long-lived assets and other assets, including inventory, property and equipment and investments in unconsolidated affiliates; the possibility of significant changes in foreign exchange rates and controls; potential effects of increased competition and the introduction of alternative modes of transportation and solutions; the possibility that we may be unable to re-deploy our aircraft to regions with greater demand; the possibility of changes in tax and other laws and regulations and policies, including, without limitation, actions of the governments that impact oil and gas operations or favor renewable energy projects; the possibility that we may be unable to dispose of older aircraft through sales into the aftermarket; general economic conditions, including the capital and credit markets; the possibility that portions of our fleet may be grounded for extended periods of time or indefinitely (including due to severe weather events); the existence of operating risks inherent in our business, including the possibility of declining safety performance; the possibility of political instability, war or acts of terrorism in any of the countries where we operate; the possibility that reductions in spending on aviation services by governmental agencies where we are seeking contracts could adversely affect or lead to modifications of the procurement process or that such reductions in spending could adversely affect search and rescue (“SAR”) contract terms or otherwise delay service or the receipt of payments under such contracts; the effectiveness of our environmental, social and governance initiatives; the impact of supply chain disruptions and inflation and our ability to recoup rising costs in the rates we charge to our customers; and our reliance on a limited number of helicopter manufacturers and suppliers. If one or more of the foregoing risks materialize, or if underlying assumptions prove incorrect, actual results may vary materially from those expected. You should not place undue reliance on our forward-looking statements because the matters they describe are subject to known and unknown risks, uncertainties and other unpredictable factors, many of which are beyond our control. Our forward-looking statements are based on the information currently available to us and speak only as of the date hereof. New risks and uncertainties arise from time to time, and it is impossible for us to predict these matters or how they may affect us. We have included important factors in the section entitled “Risk Factors” in the Company’s Transition Report on Form 10-KT for the year ended December 31, 2022 (the “Transition Report”) which we believe over time, could cause our actual results, performance or achievements to differ from the anticipated results, performance or achievements that are expressed or implied by our forward-looking statements. You should consider all risks and uncertainties disclosed in the Transition Report and in our filings with the United States Securities and Exchange Commission (the “SEC”), all of which are accessible on the SEC’s website at www.sec.gov.

Non-GAAP Financial Measures Reconciliation

In addition to financial results calculated in accordance with U.S. generally accepted accounting principles (“GAAP”), this presentation includes certain non-GAAP measures including EBITDA, Adjusted EBITDA, Net Debt, Free Cash Flow and Adjusted Free Cash Flow. Each of these measures, detailed below, have limitations, and are provided in addition to, and not as an alternative for, and should be read in conjunction with, the information contained in our financial statements prepared in accordance with GAAP (including the notes), included in our filings with the SEC and posted on our website.

EBITDA and Adjusted EBITDA are presented as supplemental measures of the Company’s operating performance. EBITDA is defined as Earnings before Interest expense, Taxes, Depreciation and Amortization. Adjusted EBITDA is defined as EBITDA further adjusted for special items that occurred during the reporting period and noted in the applicable reconciliation. Management believes that the use of EBITDA and Adjusted EBITDA is meaningful to investors because it provides information with respect to our ability to meet our future debt service, capital expenditures and working capital requirements and the financial performance of our assets without regard to financing methods, capital structure or historical cost basis. Neither EBITDA nor Adjusted EBITDA is a recognized term under GAAP. Accordingly, they should not be used as an indicator of, or an alternative to, net income as a measure of operating performance. In addition, EBITDA and Adjusted EBITDA are not intended to be measures of free cash flow available for management’s discretionary use, as they do not consider certain cash requirements, such as debt service requirements. Because the definitions of EBITDA and Adjusted EBITDA (or similar measures) may vary among companies and industries, they may not be comparable to other similarly titled measures used by other companies.

There are two main ways in which foreign currency fluctuations impact on the Company’s reported financials. The first is primarily non-cash foreign exchange gains (losses) that are reported in the Other Income line on the Income Statement. These are related to the revaluation of balance sheet items, typically do not impact cash flows, and thus are excluded in the Adjusted EBITDA presentation. The second is through impacts to certain revenue and expense items, which impact the Company’s cash flows. The primary exposure is the GBP/USD exchange rate.

This presentation provides a reconciliation of net income (loss), the most directly comparable GAAP measure, to EBITDA and Adjusted EBITDA (in thousands, unaudited). The Company is unable to provide a reconciliation of forecasted Adjusted EBITDA for Calendar Years 2023 and 2024 included in this presentation to projected net income (GAAP) for the same periods because components of the calculation are inherently unpredictable. The inability to forecast certain components of the calculation would significantly affect the accuracy of the reconciliation. Additionally, the Company does not provide guidance on the items used to reconcile projected Adjusted EBITDA due to the uncertainty regarding timing and estimates of such items. Therefore, the Company does not present a reconciliation of forecasted Adjusted EBITDA to net income (GAAP) for Calendar Years 2023 and 2024.

Free Cash Flow represents the Company’s net cash provided by operating activities less maintenance capital expenditures. In prior periods, the Company’s Free Cash Flow was calculated as net cash provided by (used in) operating activities plus proceeds from disposition of property and equipment less purchases of property and equipment. Management believes that the change in the Company’s free cash flow calculation, as presented herein, better represents the Company’s cash flow available for discretionary purposes, including growth capital expenditures. Adjusted Free Cash Flow is Free Cash Flow adjusted to exclude costs paid in relation to a PBH maintenance agreement buy-in, reorganization items, costs associated with recent mergers, acquisitions and ongoing integration efforts, as well as other special items which include nonrecurring professional services fees and other nonrecurring costs or costs that are not related to continuing business operations. Management believes that Free Cash Flow and Adjusted Free Cash Flow are meaningful to investors because they provide information with respect to the Company’s ability to generate cash from the business. The GAAP measure most directly comparable to Free Cash Flow and Adjusted Free Cash Flow is net cash provided by operating activities. Since neither Free Cash Flow nor Adjusted Free Cash Flow is a recognized term under GAAP, they should not be used as an indicator of, or an alternative to, net cash provided by operating activities. Investors should note numerous methods may exist for calculating a company’s free cash flow. As a result, the method used by management to calculate Free Cash Flow and Adjusted Free Cash Flow may differ from the methods used by other companies to calculate their free cash flow. As such, they may not be comparable to other similarly titled measures used by other companies.

The Company also presents Net Debt, which is a non-GAAP measure, defined as total principal balance on borrowings less unrestricted cash and cash equivalents. The GAAP measure most directly comparable to Net Debt is total debt. Since Net Debt is not a recognized term under GAAP, it should not be used as an indicator of, or an alternative to, total debt. Management uses Net Debt to determine the Company’s outstanding debt obligations that would not be readily satisfied by its cash and cash equivalents on hand. Management believes this metric is useful to investors in determining the Company’s leverage position since the Company has the ability to, and may decide to, use a portion of its cash and cash equivalents to reduce debt.

A reconciliation of each of EBITDA, Adjusted EBITDA, Adjusted EBITDA excluding gains or losses on asset dispositions, Free Cash Flow, Adjusted Free Cash Flow, and Net Debt is included elsewhere in this presentation.

Safety Note

Safety is Bristow's #1 core value and highest operational priority

Robust safety management system (SMS)

Bristow's fleet is configured with advanced safety equipment

With third-party accreditation resulting from numerous external audits

HeliOffshore
Safety Through Collaboration

Recent Highlights

Bristow Awarded Irish Coast Guard Contract (IRCG)

The 10-year, approximately €670 million contract expected to commence in October 2024 will provide for day and night-time operations of four helicopter bases and will be a significant addition to Bristow's Government Services offering. The contract was signed on August 22, 2023.

Bolstering Presence in Brazil with the Launch of Two New Operating Bases

Bristow expands its footprint in Brazil with the opening of two new operating bases at Eurico de Aguiar Salles Airport in Vitória, Espírito Santo, and Farol de São Thomé, Rio de Janeiro. The Company now has a total fleet of 15 helicopters operational in Brazil to meet customer needs.

Bristow Releases Second Sustainability Report

Expanding upon the achievements outlined in last year's inaugural report. Highlights include using a 10% blend of sustainable aviation fuel (SAF) in certain flights in the U.K., implementation of a new incident response management solution, a 50 percent reduction in Lost Time Incident Severity Rate (LTISR) and a 56 percent reduction in lost workdays, growing partnerships with eVTOL and eSTOL companies.

Issued 2024 Financial Guidance

Including an operating revenues range of approximately \$1.30-\$1.47 billion, an increase of approximately 10% compared to 2023 guidance, and an Adjusted EBITDA range of \$190-\$220 million, an increase of more than 25% compared to 2023 guidance.

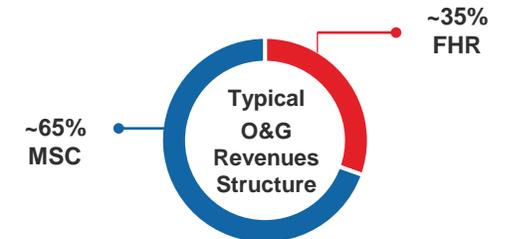

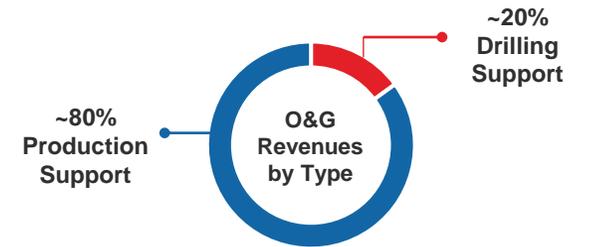

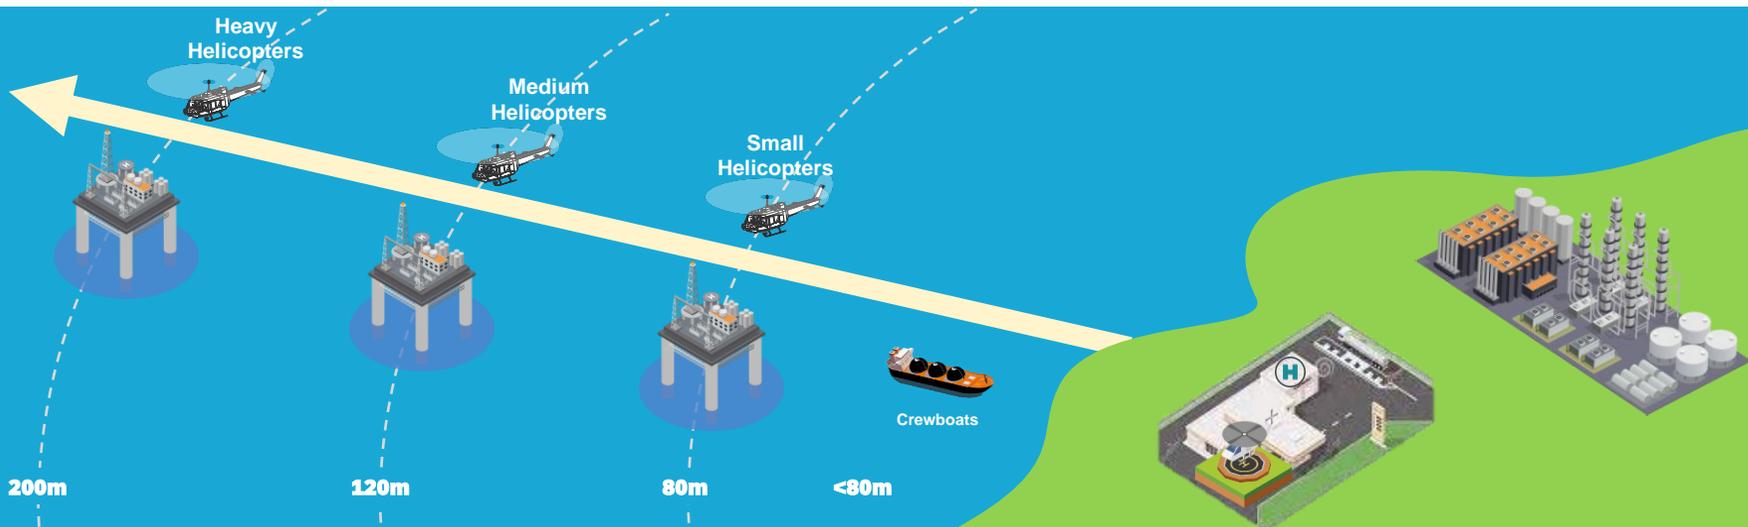

Offshore Energy Services

We provide aviation services to a broad base of offshore energy companies

✓ Offshore energy revenues primarily from transporting personnel to, from and between offshore production platforms, drilling rigs, and other installations

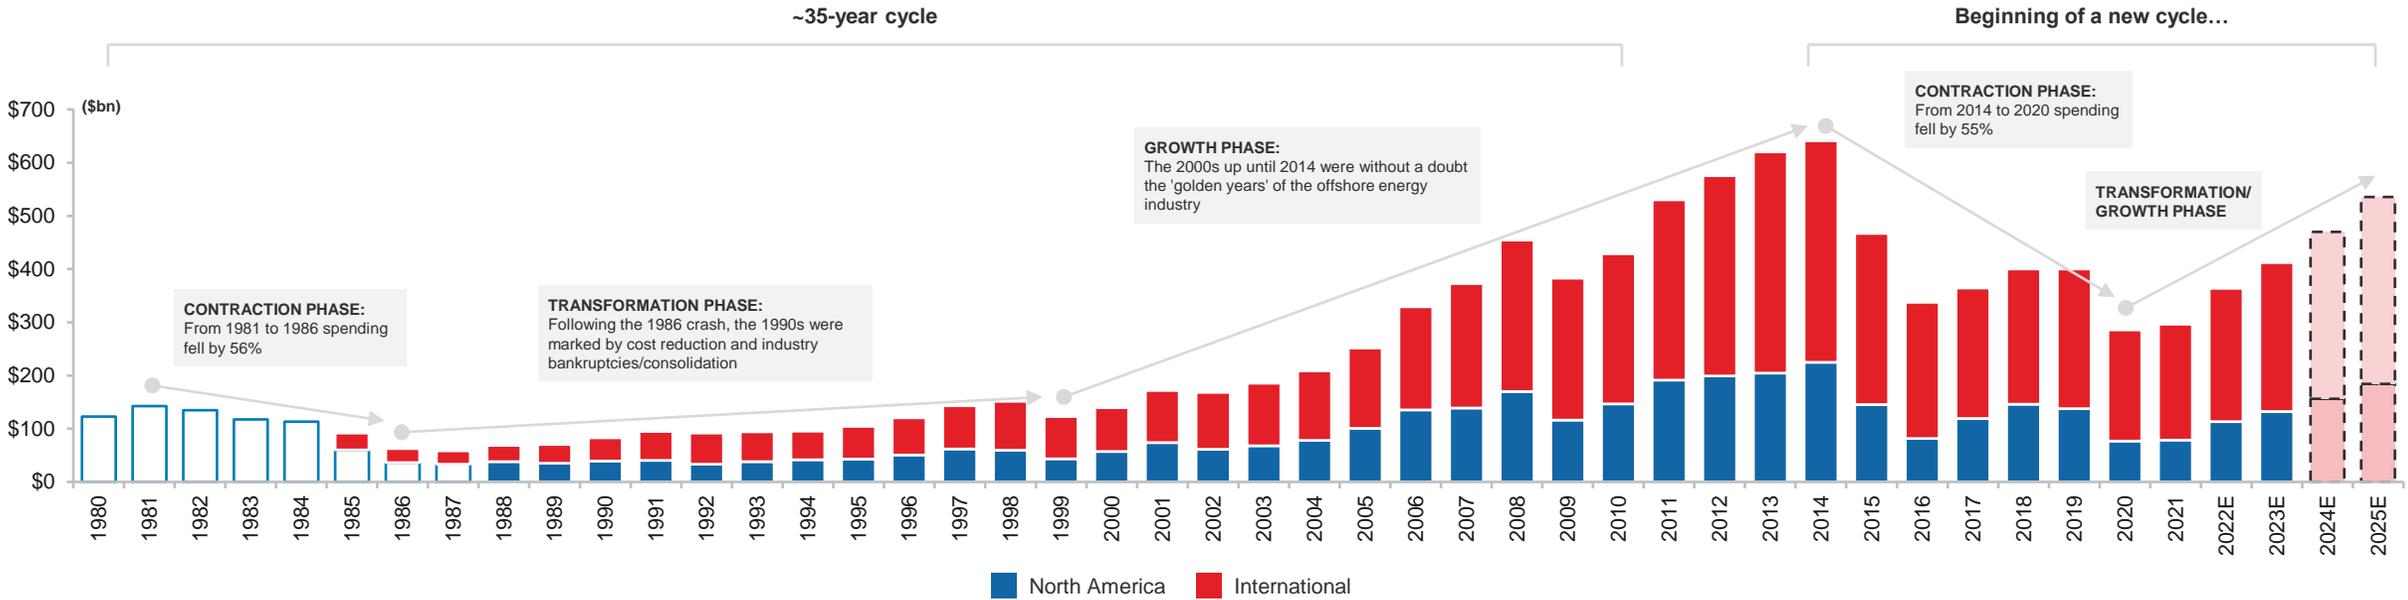

✓ Typical payment models include:

- Monthly Standing Charge (MSC) + Fixed Hourly Rate (FHR)
- Ad hoc or pay as you use, and
- Other: block / slot model; consortium model (like U.S. GOM SAR)

Multi-year Growth in Upstream Offshore Energy Spending

Upstream Spending 1980 – 2025E

“Offshore spending is expected to increase 24% in 2023 following the first year of spending growth this year (+12%) since 2014.”

“...we view 2023 as a continuation of a multi-year upcycle leading to consecutive years of double-digit global spending growth through at least 2025.”

“Much of the 2022 capex was inflation related which should moderate in 2023. However, with little equipment spare capacity, net pricing gains to service companies should account for much of the 2023 capex increase.”

— J. David Anderson, CFA Barclays Research

Source: Company Reports, Barclays Research, January 2023

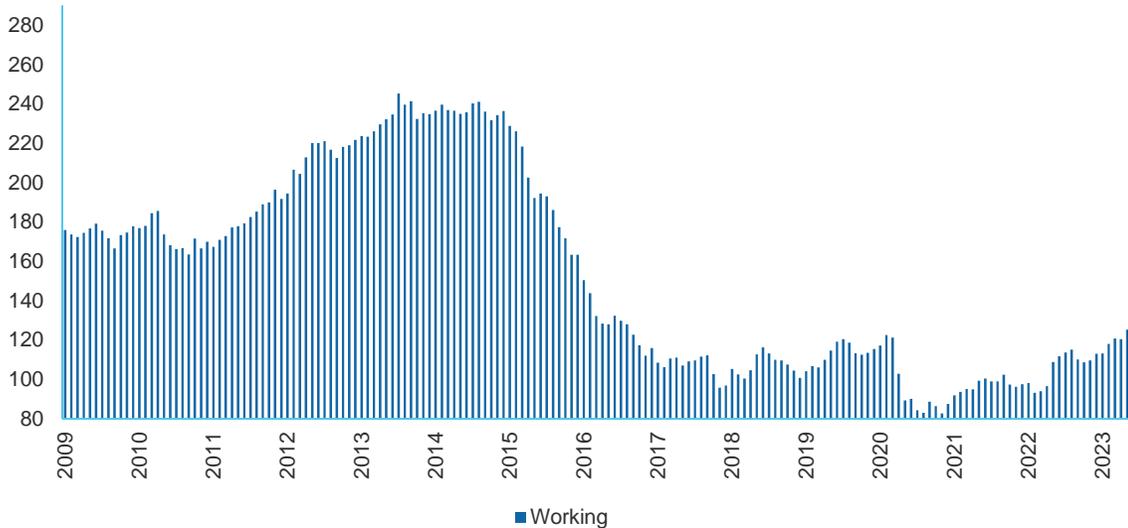

Strengthening Offshore Market Dynamics

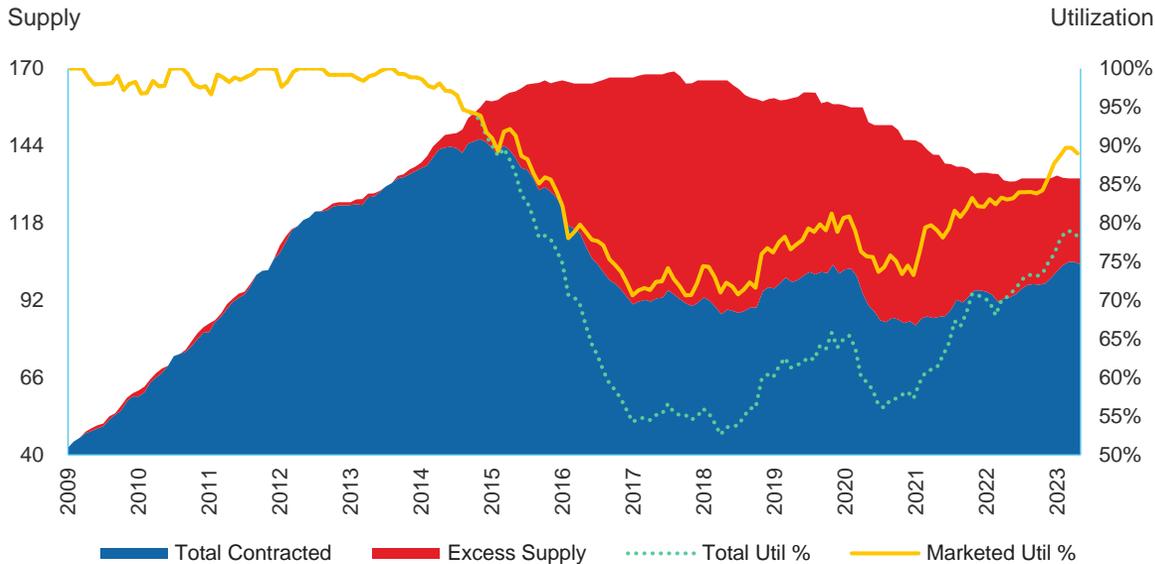

“Assuming all contracted floaters are renewed and no additional retirements, the worldwide fleet is forecasted to grow by 10% over the next 36 months.”

Worldwide Average Working Floaters

Ultra-Deepwater Utilization

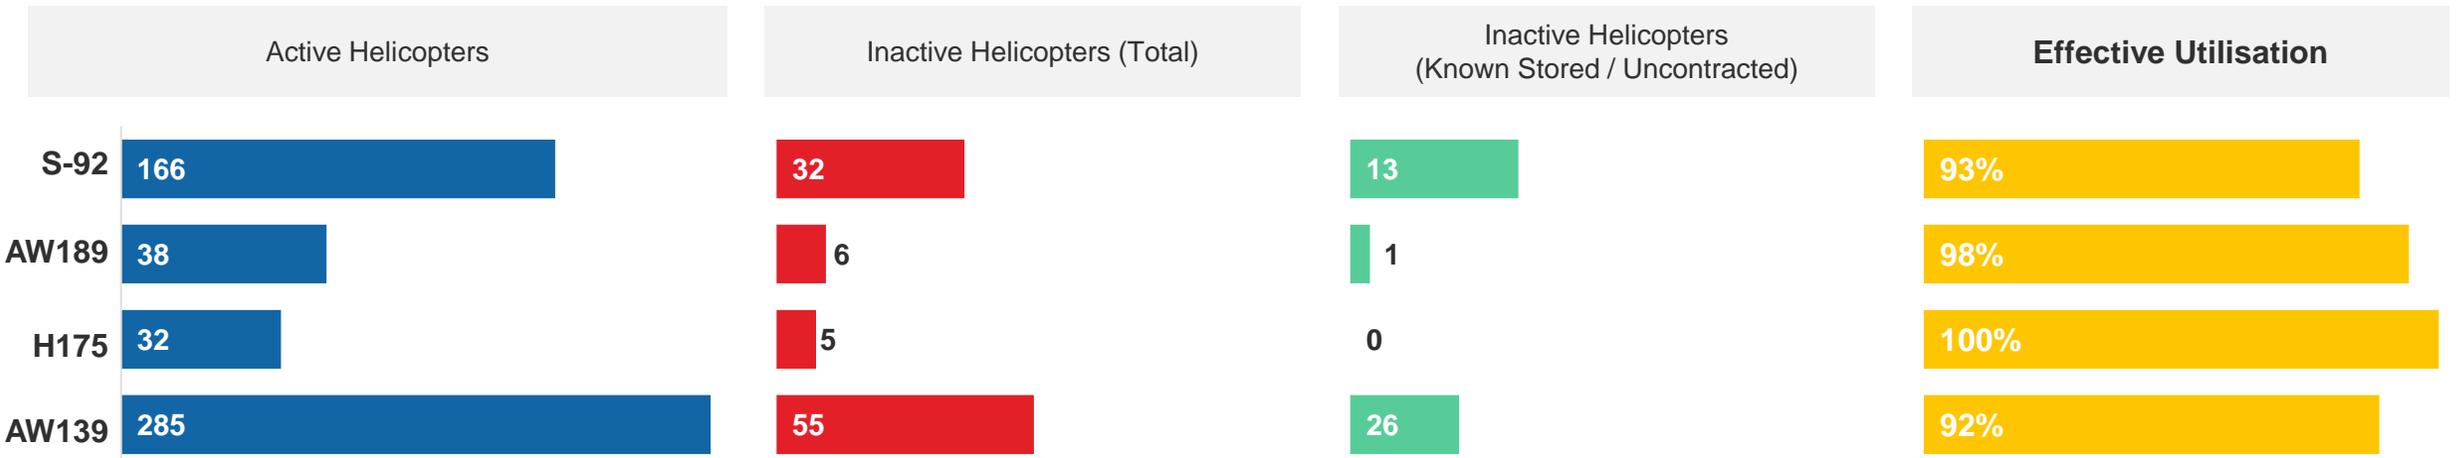

Source: Evercore ISI, July 2023

Tightening Asset Market in Offshore Helicopters

“Super-medium offshore types are at near-full utilisation, order books for these aircraft are very thin and new orders will take 18 months (at least) to build. Requirements for additional heavy / super-medium aircraft can therefore only be met by use of inactive S92s. The ability to reactivate AOG will be critical in this emerging cycle.”

Steve Robertson, Director
Air & Sea Analytics

Effective Utilization of Heavy and Medium Offshore Helicopters

Government Services

We provide Search and Rescue (SAR), personnel transportation and other aviation services to various government agencies globally

- ✓ The duration of these contracts generally lasts for ten or more years
- ✓ Stable, long-term cash flows with high credit quality
- ✓ Margins roughly double that of typical offshore energy services contract

Over The Past ~18 Months

Advancing Government SAR

2nd Generation UK SAR Contract (UKSAR2G)

An Effective Transition Plan

Investing capital to ensure a successful transition of operations to the new £1.6 billion UKSAR2G contract

New contract transitions beginning September 30, 2024, through December 31, 2026

New contract combines existing rotary and fixed wing services into fully integrated, innovative solution led by Bristow

Estimated capital investment range of \$155-\$165 million for six new AW139 aircraft and modifications to existing aircraft

Irish Coast Guard Contract (IRCG)

Significant Addition to Bristow's Government Services Offering

The newly awarded 10-year, approximately €670 million contract will provide for day and night-time operations of four helicopter bases

New contract transitions beginning October 1, 2024, through July 1, 2025. Contract term of 10 years + 3-year extension option

In addition to the helicopter service, the new Coast Guard aviation service will, for the first time, also include a fixed wing aircraft element. Provides for the day and night-time operation of four helicopter bases

Estimated capital investment range of \$135-\$145 million for five new AW189 aircraft and modifications to an existing aircraft

Plans to fund the investment with cash on hand, operating cash flows, new debt financing and aircraft leasing

Building Momentum Throughout 2023...

4x S92
2x AW139 -
Contract ended in Guyana on
12/31/22

Q1

The first quarter of the calendar year is traditionally our weakest quarter due to weather-related seasonality

First part of the year saw more idle aircraft as a large contract in Guyana concluded at year end, and we are in the process of reconfiguring and transitioning aircraft that have been awarded new contracts at attractive terms and are scheduled to begin in the second half of 2023

Q2

+

1x S92

Contract began late Q2 in U.S. GOM

6x AW139
Contracts begin in Brazil

+

Q3

The EBITDA run rate at year-end is expected to be significantly higher than the first half of the year, setting up positively for stronger financial results in 2024

1x S92
1x AW139
Contracts begin in U.S. GOM

Q4

+

4x SAR S92

Contract begins in Norway late Q3, full quarter impact in Q4

...and well into
2024

Full Year Impact

of contracts noted on the previous
slide is expected to contribute to
a stronger 2024

Attractive Rates

new and renewing contracts
expected to be at more
favorable rates compared to
expiring contracts

Higher Flight Hours

from short-term campaigns and
offshore energy exploration
anticipated in 2024

Additional Activity

is expected in Brazil, Africa and
the GOM

ESG Highlights

Environmental

- ✓ Calculated our Baseline Scope 1 and 2 Emissions in 2021 and 2022
- ✓ ISO 140001 certification in our Brazil and U.K. operations, as well as U.S. Corporate
- ✓ Completed Sustainable Aviation Fuel (SAF) flights in the U.K.
- ✓ Transitioning towards electric ground vehicles in the U.K., Norway, and the U.S.
- ✓ Entered into 7 innovative partnerships in the eVTOL and eSTOL space in the last ~18 months

Social

- ✓ Donated \$500,000+ USD towards community engagement programs in 2022
- ✓ Completed 4,500+ hours of minimum, mandatory training for all employees in 2022
- ✓ Women represent 50% of the executive management team
- ✓ Create many opportunities for career paths for U.S. military veterans, who make up ~25% of our U.S. workforce
- ✓ Recorded zero work stoppages related to collective bargaining agreements in 2022

Governance

- ✓ Board of Directors comprised of majority independent directors appointed and led by a non-executive Chairman
- ✓ Completed annual recertification of Code of Business Ethics and Integrity training for all employees
- ✓ Aligned our climate-change mitigation approach with Task Force on Climate-Related Financial Disclosures (TCFD)
- ✓ Completed a robust internal annual enterprise risk assessment, including ESG-related risks

Why Invest in Bristow
