Red Robin Gourmet Burgers Reports Results for the Fiscal Third Quarter Ended October 7, 2018

GREENWOOD VILLAGE, Colo.--(BUSINESS WIRE)-- Red Robin Gourmet Burgers, Inc. (NASDAQ: RRGB), a full-service restaurant chain serving an innovative selection of high-quality gourmet burgers in a family-friendly atmosphere, today reported financial results for the quarter ended October 7, 2018.

Third Quarter 2018 Financial Highlights Compared to Third Quarter 2017

- GAAP earnings per diluted share were \$0.13 compared to \$0.21;
- Adjusted earnings per diluted share were \$0.16 compared to \$0.21 (see Schedule I);
- Total revenues were \$294.9 million, a decrease of 3.5%;
- Off-premise sales increased 22.7%, now comprising 10.1% of total food and beverage sales;
- Comparable restaurant revenue decreased 3.4% (using constant currency rates);
- Comparable restaurant guest counts decreased 1.9%;
- Cost of sales as a percentage of revenue remained flat at 23.8%; and
- Restaurant labor costs as a percentage of restaurant revenue remained flat at 35.3%.

“We are pleased with our continued improvement in managing labor and food costs, fundamental to achieving sustainable profit growth when we regain top-line sales momentum. Our third quarter sales performance was the result of a decline in dine-in traffic, which we expected when we chose mid quarter to shift remaining media weight to later in the year,” said Denny Marie Post, Red Robin Gourmet Burgers, Inc. chief executive officer. “We took the last part of the third quarter to begin retraining all of our restaurant teams on peak-hour service standards based on our success in pilot locations. We believe this will ensure our restaurant teams are well-prepared for seasonally higher volume in the fourth quarter and we are encouraged that we are already seeing improvements in ticket and wait times.”

Operating Results

Total revenues, which primarily include Company-owned restaurant revenue and franchise royalties, decreased 3.5% to \$294.9 million in the third quarter of 2018 from \$305.7 million in the third quarter of 2017. Restaurant revenue decreased \$10.9 million due to a \$9.9 million, or 3.4%, decrease in comparable restaurant revenue, a \$1.5 million decrease from closed

restaurants, and a \$0.4 million unfavorable foreign currency exchange impact, partially offset by a \$0.9 million increase in revenue from new restaurant openings.

System-wide restaurant revenue (which includes franchised units) for the third quarter of 2018 totaled \$351.0 million, compared to \$361.0 million for the third quarter of 2017.

Comparable restaurant revenue⁽¹⁾ decreased 3.4% in the third quarter of 2018 compared to the same period a year ago, driven by a 1.5% decrease in average guest check and a 1.9% decrease in guest counts. The decrease in average guest check comprised a 3.0% decrease in menu mix, offset by a 1.5% increase in pricing. The Company's comparable revenue growth is calculated by comparing the same calendar weeks which, for the third quarter of 2017, exclude the first week of the third quarter of 2017 and include the first week of the fourth quarter of 2017.

Net income was \$1.7 million for the third quarter of 2018 compared to \$2.7 million for the same period a year ago. Adjusted net income was \$2.1 million for the third quarter of 2018 (see Schedule I).

Restaurant-level operating profit margin (a non-GAAP financial measure) was 16.8% in the third quarter of 2018 compared to 18.6% in the same period a year ago. Cost of sales as a percentage of restaurant revenue was flat due to increases in steak fries and the impact of higher Tavern mix, which were offset by decreases in ground beef and reductions in food waste. Restaurant labor costs as a percentage of restaurant revenue also remained flat as improvements in labor productivity offset higher average wage rates and sales deleverage. Other restaurant operating costs increased 120 basis points primarily due to sales deleverage and increases in restaurant technology, equipment repairs and maintenance, third-party delivery fees, and utility costs. Occupancy costs increased 60 basis points due to increases in real estate and personal property tax. Schedule II of this earnings release defines restaurant-level operating profit, discusses why it is a useful metric for investors, and reconciles this metric to income from operations and net income, in each case under GAAP.

(1) Comparable restaurants are those Company-owned restaurants that have operated five full quarters during the period presented, and such restaurants are only included in the comparable metrics if they are comparable for the entirety of both periods presented.

Restaurant Revenue Performance

	<u>Q3 2018</u>	<u>Q3 2017</u>
Average weekly sales per unit ⁽¹⁾ :		
Company-owned – Total	\$ 49,995	\$ 52,877
Company-owned – Comparable ⁽²⁾	\$ 50,282	\$ 52,632
Franchised units – Comparable	\$ 57,298	\$ 57,619
Total operating weeks:		
Company-owned units	5,805	5,686
Franchised units	1,064	1,032

(1) Calculated using constant currency rates. Using historical currency rates, the average weekly sales per unit in the third quarter of 2017 for Company-owned – Total and Company-owned – Comparable was \$52,955 and \$52,711. The Company calculates non-GAAP constant currency average weekly sales per unit by translating prior year local currency average weekly sales per unit to U.S. dollars based on current quarter average exchange rates. The Company considers non-GAAP constant currency average weekly sales per unit to be a useful metric to investors and management as they facilitate a more useful comparison of current performance to historical performance.

(2) Using the same calendar weeks as compared to the third quarter 2018, the average weekly sales per unit in the third quarter of 2017, using constant currency rates, was \$52,231.

Other Results

Depreciation and amortization costs increased to \$21.8 million in the third quarter of 2018 from \$21.3 million in the third quarter of 2017. The increase was primarily related to new restaurant technology implemented beginning in third quarter 2017 and new restaurants opened since the third quarter of 2017.

General and administrative costs were \$16.8 million, or 5.7% of total revenues, in the third quarter of 2018, compared to \$18.6 million, or 6.1% of total revenues in the same period a year ago. The decrease was primarily due to decreases in salaries and team member benefits related to the reorganization in the first quarter 2018, as well as lower incentive and equity compensation.

Selling expenses were \$12.0 million, or 4.1% of total revenues, in the third quarter of 2018, compared to \$15.2 million, or 5.0% of total revenues, during the same period in the prior year. The decrease was primarily due to our choice of shifting media spend to the fourth quarter of 2018.

Pre-opening costs were \$0.4 million in the third quarter of 2018, compared to \$1.5 million in the same period a year ago. The decrease was primarily due to the decrease in number of restaurant openings.

Other charges in the third quarter of 2018 included \$0.5 million in reorganization costs.

The tax benefit was \$2.2 million in the third quarter of 2018, compared to \$0.7 million during the same period in the prior year. The change was primarily due to the decrease in income, as well as the decrease in the federal statutory rate from 35% to 21% that occurred in the first quarter of 2018.

Earnings per diluted share for the third quarter of 2018 was \$0.13 compared to earnings per diluted share of \$0.21 in third quarter of 2017. Excluding charges of \$0.03 per diluted share for reorganization costs, adjusted earnings per diluted share for the third quarter ended October 7, 2018 were \$0.16. See Schedule I for a reconciliation of adjusted net income and adjusted earnings per share (each, a non-GAAP financial measure) to net income and earnings per share.

Restaurant Development

During the third quarter of 2018, the Company opened two Red Robin restaurants and our franchisees opened one Red Robin restaurant.

Reconciliation of Non-GAAP Results to GAAP Results (In thousands, except per share data)

In addition to the results provided in accordance with Generally Accepted Accounting Principles ("GAAP") throughout this press release, the Company has provided non-GAAP measurements which present the 12 and 40 weeks ended October 7, 2018 and October 1, 2017, net income and basic and diluted earnings per share, excluding the effects of litigation contingencies, reorganization costs, and the related income tax effects. The Company believes the presentation of net income and earnings per share exclusive of the identified item gives the reader additional insight into the ongoing operational results of the Company. This supplemental information will assist with comparisons of past and future financial results against the present financial results presented herein. Income tax effect of reconciling items was calculated based on the change in the total tax provision calculation after adjusting for the identified item. The non-GAAP measurements are intended to supplement the presentation of the Company's financial results in accordance with GAAP.

Schedule II

Reconciliation of Non-GAAP Restaurant-Level Operating Profit to Income from Operations and Net Income (In thousands)

The Company believes that restaurant-level operating profit is an important measure for management and investors because it is widely regarded in the restaurant industry as a useful metric by which to evaluate restaurant-level operating efficiency and performance. The Company defines restaurant-level operating profit to be restaurant revenue minus restaurant-level operating costs, excluding restaurant impairment and closure costs. The measure includes restaurant-level occupancy costs, which include fixed rents, percentage rents, common area maintenance charges, real estate and personal property taxes, general liability insurance, and other property costs, but excludes depreciation related to restaurant buildings and leasehold improvements. The measure excludes depreciation and amortization expense, substantially all of which is related to restaurant-level assets, because such expenses represent historical sunk costs which do not reflect current cash outlay for the restaurants. The measure also excludes selling, general, and administrative costs, and therefore excludes occupancy costs associated with selling, general, and administrative functions, and pre-opening costs. The Company excludes restaurant closure costs as they do not represent a component of the efficiency of continuing operations. Restaurant impairment costs are excluded, because, similar to depreciation and amortization, they represent a non-cash charge for the Company's investment in its restaurants and not a component of the efficiency of restaurant operations. Restaurant-level operating profit is not a measurement determined in accordance with GAAP and should not be considered in

isolation, or as an alternative, to income from operations or net income as indicators of financial performance. Restaurant-level operating profit as presented may not be comparable to other similarly titled measures of other companies in our industry. The table below sets forth certain unaudited information for the 12 and 40 weeks ended October 7, 2018 and October 1, 2017, expressed as a percentage of total revenues, except for the components of restaurant-level operating profit, which are expressed as a percentage of restaurant revenue.

Certain percentage amounts in the table above do not total due to rounding as well as the fact that components of restaurant-level operating profit are expressed as a percentage of restaurant revenue and not total revenues.

Schedule III

Reconciliation of Net Income to EBITDA and Adjusted EBITDA (In thousands, unaudited)

The Company defines EBITDA as net income before interest expense, provision (benefit) for income taxes, and depreciation and amortization. EBITDA and adjusted EBITDA are presented because the Company believes investors' understanding of our performance is enhanced by including these non-GAAP financial measures as a reasonable basis for evaluating our ongoing results of operations without the effect of non-cash charges such as depreciation and amortization expenses, asset disposals, and asset impairment and

restaurant closure charges. EBITDA and adjusted EBITDA are supplemental measures of operating performance that do not represent and should not be considered as alternatives to net income or cash flow from operations, as determined by GAAP, and our calculation thereof may not be comparable to that reported by other companies in our industry or otherwise. Adjusted EBITDA further adjusts EBITDA to reflect the additions and eliminations shown in the table below. The use of adjusted EBITDA as a performance measure permits a comparative assessment of our operating performance relative to our performance based on our GAAP results, while isolating the effects of some items that vary from period to period without any correlation to core operating performance. Adjusted EBITDA as presented may not be comparable to other similarly-titled measures of other companies, and our presentation of adjusted EBITDA should not be construed as an inference that our future results will be unaffected by excluded or unusual items. We have not provided a reconciliation of our adjusted EBITDA outlook to the most comparable GAAP measure of net income. Providing net income guidance is potentially misleading and not practical given the difficulty of projecting event-driven transactional and other non-core operating items that are included in net income, including asset impairments and income tax valuation adjustments. The reconciliations of adjusted EBITDA to net income for the historical periods presented below are indicative of the reconciliations that will be prepared upon completion of the periods covered by the non-GAAP guidance.
