February 21, 2019

QuickLogic to Showcase Solutions for IoT and Endpoint AI at Embedded World 2019

Sunnyvale, CA – February 21, 2019 – QuickLogic Corporation (NASDAQ: QUIK), a developer of ultra-low power multi-core voice-enabled SoCs, embedded FPGA IP, and Endpoint AI solutions, will be exhibiting at Embedded World Exhibition & Conference in Nuremberg, Germany on February 26-28, 2019.

Location: Exhibition Centre, Hall 3A-501

Date: February 26-28, 2019

QuickLogic will demonstrate several of its solutions for IoT and Artificial Intelligence (AI). Some of the many QuickLogic products, demos and displays will include:

- QuickAI™ EOS S3AI Platform with the SensiML™ Analytics Toolkit – This exhibit will showcase an industrial predictive maintenance application.
- SensiML Analytics Toolkit with a variety of third-party MCUs – This exhibit will highlight the ease and flexibility in creating endpoint AI algorithms across many different time-series sensor processing applications.

Embedded World is a leading international fair for embedded systems, bringing more than 32,000 trade visitors and 1,000 exhibitors. For more information, please visit https://www.embedded-world.de/en

About QuickLogic
QuickLogic develops low power, multi-core semiconductor platforms and Intellectual Property (IP) for Artificial Intelligence (AI), voice and sensor processing. The solutions include an embedded FPGA IP (eFPGA) for hardware acceleration and pre-processing, and heterogeneous multi-core SoCs that integrate eFPGA with other processors and peripherals. The Analytics Toolkit from the company's wholly-owned subsidiary, SensiML, completes the 'full stack' end-to-end solution with accurate sensor algorithms using AI technology. The full range of platforms, software tools and eFPGA IP enables the practical and efficient adoption of AI, voice and sensor processing across the multitude of mobile, wearable, hearable, consumer, industrial, edge and endpoint IoT applications. For more information, visit www.quicklogic.com and https://www.quicklogic.com/blog/.

About SensiML
SensiML, a subsidiary of QuickLogic, offers cutting-edge software that enables ultra-low power IoT endpoints that implement AI to transform raw sensor data into meaningful insight at the device itself. The company's flagship solution, the SensiML Analytics Toolkit, provides an end-to-end development platform spanning data collection, labeling, algorithm and firmware auto generation, and testing. The SensiML Toolkit supports Arm® Cortex®-M class

and higher microcontroller cores, Intel® x86 instruction set processors, and heterogeneous core QuickLogic SoCs and QuickAI platforms with FPGA optimizations. For more information, visit www.sensiml.com.
