Nature’s Miracle Crowns Datavault AI with 35% Royalty License with Multi-Million-Dollar Global Technology License

Nature’s Miracle and Datavault AI Already Actively Tokenizing RWA Projects in Taiwan, Japan, South Korea and Hong Kong to Trade Exclusively on Datavault AI’s Information Data Exchange®

- ***Company Further Monetizes its data over sound ADIO® and patented Data Vault® Platform featuring the industry leading DataScore® and DataValue® agents that will now exclusively power Nature’s Miracle’s Carbon Credit, Tokenized RWA Initiatives and VerifyU™ blockchain credentialing***
- ***Nature’s Miracle is doubling down on the green economy and the generational importance of renewable energy and clean air, water and food supplies with a focus on Hong Kong and Pac-Rim regions***
- ***Nature’s Miracle Focuses on the Power of our Sun through Blockchain-Based Carbon Credit Tokenization & Green Blockchain Initiatives with XRP Focused Solutions for Enterprise***
- ***Tandem Focused on Producing ARR Annual Recurring Revenue and Market Entrance for the forthcoming International Elements Exchange***

PHILADELPHIA, Oct. 28, 2025 (GLOBE NEWSWIRE) -- via IBN -- Datavault AI Inc. (Nasdaq: DVLT), a leader in patented data tokenization and monetization technologies, today announced that it has entered into a definitive licensing agreement with Nature’s Miracle Holding Inc. (OTCQB: NMHI), a sustainable agriculture and environmental technology company.

Under the agreement, Nature’s Miracle will license Datavault AI’s patented Carbon Credit Tokenization System, enabling it to develop, distribute, and commercialize blockchain-powered carbon credit solutions worldwide.

The agreement grants Nature’s Miracle global rights to integrate Datavault AI’s proprietary intellectual property, including its issued and pending patents covering the secure tokenization of carbon credits on blockchain infrastructure, into its environmental technology platforms. As part of the deal, Datavault AI will receive a non-refundable license fee of $2 million and a 35 percent royalty on all gross revenue generated through the licensed technology.

“This agreement represents a significant milestone in Datavault AI’s ongoing strategy to commercialize our patent portfolio across high-growth industries like sustainability and carbon markets,” said Nathaniel Bradley, CEO of Datavault AI. “By licensing our carbon credit tokenization system to Nature’s Miracle, we are aligning with a partner whose expertise in innovative, sustainable environmental technology is being applied to accelerate the adoption of blockchain for verified carbon markets."

The partnership positions both companies at the forefront of the emerging digital carbon economy by providing a scalable, transparent, and fraud-resistant method for verifying and trading carbon credits. Nature's Miracle intends to integrate the licensed technology into its agricultural and environmental management platforms, enhancing traceability and accountability in sustainability reporting.

Commenting on the transaction, James Li, CEO of Nature's Miracle Holding, said: "This collaboration with Datavault AI allows us to leverage proven, patented blockchain infrastructure to validate and monetize carbon offsets with unparalleled security and efficiency. We recently opened offices in Taipei and Tokyo, both of whom have a strong institutional tokenization community as well as government support. This collaboration is a strategic step that expands our environmental impact and positions Nature's Miracle as a technology leader in the carbon credit ecosystem, especially in Asia."

The licensed Company intellectual property includes U.S. and international patents related to carbon credit tokenization technologies (U.S. Application No. 17/874,069; PCT/US22/75985; Continuation No. 19/356,940). The license is effective worldwide for the life of the patents at the agreed-upon royalty rates.

This transaction underscores Datavault AI's expanding revenue model based on its proprietary ADIO® data monetization framework, VerifyU™ identity credentialing, and blockchain tokenization technologies – all designed to convert real-world assets and data streams into secure, tradable digital instruments.

About Datavault

Datavault AI™ (Nasdaq: DVLT) is leading the way in AI driven data experiences, valuation and monetization of assets in the Web 3.0 environment. The Company's cloud-based platform provides comprehensive solutions with a collaborative focus in its Acoustic Science and Data Science Divisions. Datavault AI's Acoustic Science Division features WiSA®, ADIO® and Sumerian® patented technologies and industry-first foundational spatial and multichannel wireless HD sound transmission technologies with IP covering audio timing, synchronization and multi-channel interference cancellation. The Data Science Division leverages the power of Web 3.0 and high-performance computing to provide solutions for experiential data perception, valuation and secure monetization. Datavault AI's cloud-based platform provides comprehensive solutions serving multiple industries, including HPC software licensing for sports & entertainment, events & venues, biotech, education, fintech, real estate, healthcare, energy and more. The Information Data Exchange® (IDE) enables Digital Twins, licensing of name, image and likeness (NIL) by securely attaching physical real-world objects to immutable metadata objects, fostering responsible AI with integrity. Datavault AI's technology suite is completely customizable and offers AI and Machine Learning (ML) automation, third-party integration, detailed analytics and data, marketing automation and advertising monitoring. The Company is headquartered in Beaverton, OR. Learn more about Datavault AI at www.dvlt.ai.
