

The background of the slide is a scenic landscape photograph. It shows a calm body of water in the foreground, reflecting the sky and the surrounding greenery. In the middle ground, there is a grassy hillside with a dense line of trees. The sky is a vibrant blue, filled with many small, white, fluffy clouds. The overall scene is peaceful and natural.

# Legal Disclaimer

## Forward-Looking Statements:

This presentation includes "forward-looking statements." Such forward-looking statements are subject to a number of risks and uncertainties, many of which are not under AM's control. All statements, except for statements of historical fact, made in this presentation regarding activities, events or developments AM expects, believes or anticipates will or may occur in the future, such as statements regarding our strategy, future operations, financial position, estimated revenues and losses, projected costs, prospects, plans and objectives of management, Antero Resources' expected production and development plan, natural gas, NGLs and oil prices, AM's ability to realize the anticipated benefits of its investments in unconsolidated affiliates, AM's ability to execute its share repurchase program, AM's ability to execute its business plan and return capital to its stockholders, impacts of geopolitical and world health events, information regarding AM's return of capital policy, information regarding long-term financial and operating outlooks for AM and Antero Resources, information regarding Antero Resources' expected future growth and its ability to meet its drilling and development plan and the participation level of Antero Resources' drilling partner, the impact on demand for AM's services as a result of incremental production by Antero Resources, and expectations regarding the amount and timing of litigation awards are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All forward-looking statements speak only as of the date of this presentation. Although AM believes that the plans, intentions and expectations reflected in or suggested by the forward-looking statements are reasonable, there is no assurance that these plans, intentions or expectations will be achieved. Therefore, actual outcomes and results could materially differ from what is expressed, implied or forecast in such statements. Except as required by law, AM expressly disclaims any obligation to and does not intend to publicly update or revise any forward-looking statements.

AM cautions you that these forward-looking statements are subject to all of the risks and uncertainties incident to our business, most of which are difficult to predict and many of which are beyond AM's control. These risks include, but are not limited to, commodity price volatility, inflation, supply chain or other disruptions, environmental risks, Antero Resources' drilling and completion and other operating risks, regulatory changes or changes in law, the uncertainty inherent in projecting Antero Resources' future rates of production, cash flows and access to capital, the timing of development expenditures, impacts of world health events, cybersecurity risks, the state of markets for and availability of verified quality carbon offsets and the other risks described under the heading "Risk Factors" in AM's Annual Report on Form 10-K for the year ended December 31, 2024. Any forward-looking statement speaks only as of the date on which such statement is made, and AM does not undertake any obligation to correct or update any forward-looking statement, whether as a result of new information, future events or otherwise, except as required by applicable law.

Antero Midstream's ability to make future dividends is substantially dependent upon the development and drilling plan of Antero Resources, which itself is substantially dependent upon the review and approval by the Board of Directors of Antero Resources of its capital budget on an annual basis. The Board of Directors of Antero Midstream will take into consideration many factors, including the capital budget of Antero Resources adopted by its Board of Directors and the capital resources and liquidity of Antero Midstream at the time, prior to approving future dividends.

This presentation may include certain financial measures that are not calculated in accordance with U.S. generally accepted accounting principles ("GAAP"). These measures for AM include (i) Adjusted EBITDA ("EBITDA"), (ii) Free Cash Flow before and after dividends, (iii) Return on Invested Capital ("ROIC"), (iv) Leverage, and (v) Net Debt. Please see the appendix for the definition of each of these AR and AM measures as well as certain additional information regarding these measures, including where available, the most comparable financial measures calculated in accordance with GAAP.

# AR Positioned for Data Center Natural Gas Demand Surge

Power demand growth fueled by data center buildouts and new natural gas fired power plants

*"Amazon to invest an estimated \$7.8 billion by the end of 2029/2030 to expand its data center operations in Central Ohio"*

*"The Homer City Generating Station, previously the biggest coal-burning power plant in Pennsylvania, will be transformed into a major natural gas-powered data center campus delivering up to 4.5 GW of power"*

*"Meta announces \$800 million data center in Wood County, Ohio"*

*"Pennsylvania on shortlist for OpenAI's Stargate project. As a top energy producer, Pa. is well-suited to power the artificial intelligence revolution"*

*"Competitive Power Ventures to build a \$3 billion combined-cycle natural gas power plant in West Virginia"*

*"OpenAI and Softbank, Stargate AI aims to invest \$500 billion in new AI data centers and infrastructure to help U.S.-based AI innovation"*

Operating/Planned Data Center Locations

Recently Announced Natural Gas Fired Power Plants

# U.S. Data Center Natural Gas Demand

Updated power forecasts have increased the expected U.S. demand for natural gas by ~8 bcf/d to more than 12 Bcf/d by 2030

**Data Center Power Demand**  
(Gigawatts)

*"As of July 2024, Wood Mackenzie had identified about 50 gigawatts (GW) of proposed data centers in America. This figure had doubled in a few months, and the proposed data centers were nearly 100 GW by January 1, 2025, according to WoodMac's estimates."*

**Data Center Demand Powered by Natural Gas**  
(Percent of Total by 2030)

*"We're raising our forecast for natural gas consumed by AI data centers to 9 Bcf/d by 2030 from 7 Bcf/d... The vast majority has been supported by gas. We now assume gas powers 70% of AI data center build-out (up from 50% previously)."*

# U.S. Propane Exports Remain Strong

The growing U.S. propane export trend has continued with a new quarterly record in 1Q 2025 and a strong start to 2Q 2025

# APPENDIX

# 2025 Annual Guidance

(\$ in millions):

## 2025 Guidance Ranges

Net Income	\$445 - \$485
Adjusted Net Income	\$500 - \$540
Adjusted EBITDA	\$1,080 - \$1,120
Capital Expenditures	\$170 - \$200
Interest Expense	\$195 - \$205
Cash Taxes	\$0 - \$10
Free Cash Flow Before Dividends	\$690 - \$730
Dividend Per Share	\$0.90 per share
Free Cash Flow After Dividends	\$250 - \$300

Antero Midstream has not included a reconciliation of Adjusted Net Income, Adjusted EBITDA or Free Cash Flow before and after dividends to the nearest GAAP financial measures for 2025 because it cannot do so without unreasonable effort and any attempt to do so would be inherently imprecise. Antero Midstream is able to forecast the following reconciling items between such measures and Net Income (in millions):

	Twelve Months Ending December 31, 2025		
	Low		High
Depreciation Expense	130	—	140
Equity-based compensation expense	40	—	45
Amortization of customer relationships	70	—	75
Distributions from unconsolidated affiliates	135	—	145

# Antero Midstream Non-GAAP Financial Measures

## Non-GAAP Financial Measures and Definitions

Antero Midstream uses certain non-GAAP financial measures. Antero Midstream defines Adjusted Net Income as Net Income plus amortization of customer relationships, loss on early extinguishment of debt, loss on settlement of asset retirement obligations and loss on asset sale, net of tax effect of reconciling items. Antero Midstream uses Adjusted Net Income to assess the operating performance of its assets. Antero Midstream defines Adjusted EBITDA as Net Income plus net interest expense, income tax expense, depreciation expense, amortization of customer relationships, loss on early extinguishment of debt, loss on asset sale, accretion of asset retirement obligations, impairment of property and equipment, loss on settlement of asset retirement obligations, and equity-based compensation expense, excluding equity in earnings of unconsolidated affiliates, plus distributions from unconsolidated affiliates.

Antero Midstream uses Adjusted EBITDA to assess:

- the financial performance of Antero Midstream's assets, without regard to financing methods, capital structure or historical cost basis;
- its operating performance and return on capital as compared to other publicly traded companies in the midstream energy sector, without regard to financing or capital structure; and
- the viability of acquisitions and other capital expenditure projects.

Antero Midstream defines Free Cash Flow before dividends as Adjusted EBITDA less net interest expense and accrual-based capital expenditures. Capital expenditures include additions to gathering systems and facilities, additions to water handling systems, and investments in unconsolidated affiliates. Capital expenditures exclude acquisitions. Free Cash Flow after dividends is defined as Free Cash Flow before dividends less accrual-based dividends declared for the quarter. Antero Midstream uses Free Cash Flow before and after dividends as a performance metric to compare the cash generating performance of Antero Midstream from period to period.

Adjusted EBITDA, Adjusted Net Income, and Free Cash Flow before and after dividends are non-GAAP financial measures. The GAAP measure most directly comparable to these measures is Net Income. Such non-GAAP financial measures should not be considered as alternatives to the GAAP measures of Net Income and cash flows provided by (used in) operating activities. The presentations of such measures are not made in accordance with GAAP and have important limitations as analytical tools because they include some, but not all, items that affect Net Income and cash flows provided by (used in) operating activities. You should not consider any or all such measures in isolation or as a substitute for analyses of results as reported under GAAP. Antero Midstream's definitions of such measures may not be comparable to similarly titled measures of other companies.

Antero Midstream defines Net Debt as consolidated total debt, excluding unamortized debt premiums and debt issuance costs, less cash and cash equivalents. Antero Midstream views Net Debt as an important indicator in evaluating Antero Midstream's financial leverage. Antero Midstream defines leverage as Net Debt divided by Adjusted EBITDA for the last twelve months. The GAAP measure most directly comparable to Net Debt is total debt, excluding unamortized debt premiums and debt issuance costs.

# Antero Midstream Non-GAAP Measures

The following table reconciles Net Income to Adjusted EBITDA and Free Cash Flow before and after dividends (in thousands):

	Three Months Ended March 31,	
	2024	2025
<b>Net Income</b>	<b>\$ 103,926</b>	<b>120,737</b>
Interest expense, net	53,308	48,410
Income tax expense	36,488	36,096
Depreciation expense	37,095	32,748
Amortization of customer relationships	17,668	17,668
Impairment of property and equipment	—	817
Equity-based compensation	9,327	12,402
Equity in earnings of unconsolidated affiliates	(27,530)	(28,020)
Distributions from unconsolidated affiliates	34,960	33,375
Loss on early extinguishment of debt	59	—
Other operating expense, net <sup>(1)</sup>	44	44
<b>Adjusted EBITDA</b>	<b>\$ 265,345</b>	<b>274,277</b>

1. Other operating expense, net represents accretion of asset retirement obligation and gain on asset sale.

# Antero Midstream Non-GAAP Measures

The following table reconciles consolidated total debt to consolidated net debt, excluding debt premiums and issuance costs, ("Net Debt") as used in this presentation (in thousands):

		<b>As of March 31, 2025</b>
<b>Bank credit facility</b>	\$	<b>477,400</b>
5.75% senior notes due 2027		650,000
5.75% senior notes due 2028		650,000
5.375% senior notes due 2029		750,000
6.625% senior notes due 2032		600,000
<b>Consolidated total debt</b>	\$	<b>3,127,400</b>
Less: Cash and cash equivalents		—
<b>Consolidated net debt</b>	\$	<b>3,127,400</b>

		<b>Twelve Months Ended March 31, 2025</b>
<b>Net Income</b>	\$	<b>417,703</b>
Interest expense, net		202,129
Income tax expense		147,337
Depreciation expense		135,653
Amortization of customer relationships		70,672

# Antero Resources Non-GAAP Measures

**Adjusted EBITDAX:** Adjusted EBITDAX as defined by the Company represents income or loss, including noncontrolling interests, before interest expense, interest income, unrealized gains or losses from commodity derivatives, but including net cash receipts or payments on derivative instruments included in derivative gains or losses other than proceeds from derivative monetizations, amortization of deferred revenue, VPP, income taxes, impairment of property and equipment, depletion, depreciation, amortization, and accretion, exploration expense, equity-based compensation expense, contract termination, loss contingency, transaction fees, gain or loss on sale of assets, loss on convertible note inducement, equity in earnings of and dividends from unconsolidated affiliates and Martica-related adjustments.

The GAAP financial measure nearest to Adjusted EBITDAX is net income or loss including noncontrolling interest that will be reported in Antero's condensed consolidated financial statements. While there are limitations associated with the use of Adjusted EBITDAX described below, management believes that this measure is useful to an investor in evaluating the Company's financial performance because it:

- is widely used by investors in the oil and natural gas industry to measure operating performance without regard to items excluded from the calculation of such term, which may vary substantially from company to company depending upon accounting methods and the book value of assets, capital structure, and the method by which assets were acquired, among other factors;
- helps investors to more meaningfully evaluate and compare the results of Antero's operations from period to period by removing the effect of its capital and legal structure from its consolidated operating structure; and
- is used by management for various purposes, including as a measure of Antero's operating performance, in presentations to the Company's board of directors, and as a basis for strategic planning and forecasting. Adjusted EBITDAX is also used by the board of directors as a performance measure in determining executive compensation.

There are significant limitations to using Adjusted EBITDAX as a measure of performance, including the inability to analyze the effects of certain recurring and non-recurring items that materially affect the Company's net income or loss, the lack of comparability of results of operations of different companies, and the different methods of calculating Adjusted EBITDAX reported by different companies. In addition, Adjusted EBITDAX provides no information regarding a company's capital structure, borrowings, interest costs, capital expenditures, and working capital movement or tax position.

**Net Debt:** Net Debt is calculated as total long-term debt less cash and cash equivalents. Management uses Net Debt to evaluate its financial position, including its ability to service its debt obligations.

**Leverage:** Leverage is calculated as Net Debt divided by LTM Adjusted EBITDAX.

**Free Cash Flow:** Free Cash Flow is a measure of financial performance not calculated under GAAP and should not be considered in isolation or as a substitute for cash flow from operating, investing, or financing activities, as an indicator of cash flow, or as a measure of liquidity. The Company defines Free Cash Flow as Net Cash Provided by Operating Activities, less Net Cash Used in Investing Activities, which includes drilling and completion capital and leasehold capital, plus payments for derivative monetizations, less proceeds from asset sales and less distributions to non-controlling interests in Martica.

Free Cash Flow is a useful indicator of the Company's ability to internally fund its activities and to service or incur additional debt and estimate return of capital. There are significant limitations to using Free Cash Flow as a measure of performance, including the inability to analyze the effect of certain recurring and non-recurring items that materially affect the Company's net income, the lack of comparability of results of operations of different companies and the different methods of calculating Free Cash Flow reported by different companies. Free Cash Flow does not represent funds available for discretionary use because those funds may be required for debt service, land acquisitions and lease renewals, other capital expenditures, working capital, income taxes, exploration expenses, and other commitments and obligations.

# Antero Resources Adjusted EBITDAX Reconciliation

	Three Months Ended March 31,	
	2024	2025
<b>Reconciliation of net income to Adjusted EBITDAX:</b>		
Net income and comprehensive income attributable to Antero Resources Corporation	\$ 22,730	207,971
