Part II Organizational Action Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ► On November 9, 2022 Antero Midstream Corporation paid a quarterly distribution of \$0.225 per common share to its common stockholders of record at the close of business on October 26, 2022. At this time, based on reasonable assumptions by Antero Midstream Corporation, 90% of this cash distribution is estimated to be non-taxable return of capital as Antero Midstream Corporation is not estimating to have sufficient current or accumulated earnings and profits in 2022 to cause the distribution to be fully taxable as a dividend. The remaining 10% of the distribution is estimated to be comprised of qualified dividends. At the present time, these percentages represent Antero Midstream Corporation's best estimate of the treatment of tax year 2022 distributions.

Pursuant to the applicable Treasury Regulation Section 1.6045B-1, Antero Midstream Corporation will only be required to file a corrected Form 8937, within 45 days, if the determining facts result in a different quantitative effect on basis from what was previously reported for the current distribution. The treatment of cumulative tax year 2022 distributions may change as the year progresses. Please see future posted Forms 8937 for updates to the cumulative tax year 2022 distribution treatment.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ► Dividends paid in excess of the current and accumulated earnings and profits of a corporation reduce the basis of the shares of the corporation pursuant to Internal Revenue code §301(c)(2) and §316(a).

Antero Midstream Corporation made a cash distribution of \$0.225 per share of common stock on November 9, 2022. At this time, based upon reasonable assumptions by Antero Midstream Corporation, \$0.2025 per share of common stock, of this distribution should constitute non-taxable return of capital and \$0.0225 of this distribution should be treated as a dividend. Accordingly, each distribution recipient should generally treat \$0.2025 of the distribution paid on November 9, 2022 as a reduction to the tax basis of the recipient's ownership in Antero Midstream Corporation. Any cash distribution deemed to be non-taxable return of capital that exceeds a stockholder's tax basis in each share of Antero Midstream Corporation common stock is taxable as capital gains.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ► The portion of the distribution that is not classified as a dividend represents distributions that are in excess of Antero Midstream Corporation's estimated earnings and profits (current or accumulated) that have been calculated for the tax year 2022, and the assumptions related thereto.

Pursuant to the applicable Treasury Regulation Section 1.6045B-1, Antero Midstream Corporation will only be required to file a corrected Form 8937, within 45 days, if the determining facts result in a different quantitative effect on basis from what was previously reported for the current distribution. Please see future posted Forms 8937 for updates to the cumulative tax year 2022 distribution treatment.
