November 11, 2025

Volato to Preview Parslee at Microsoft Ignite

Expanding from Deterministic Document Intelligence to Practical AI Agents for Microsoft 365

ATLANTA--(BUSINESS WIRE)-- Volato Group, Inc. (NYSE American: SOAR) (the “Company”) announced that it will showcase *Parslee*—its enterprise document-intelligence platform—at Microsoft Ignite 2025 in San Francisco, November 18–21. The Company will demonstrate how Parslee transforms the unstructured document sprawl inside Microsoft 365 into structured, auditable data that autonomous AI agents can use to perform real work inside Microsoft 365.

Parslee AI Agents autonomously coordinate tasks, synthesize information across systems, manage multi-step processes, and automate workflows that traditionally require significant manual effort. These agents act autonomously within existing corporate systems to reduce manual coordination and improve process velocity. When workflows involve document analysis, they leverage Parslee’s deterministic preprocessing engine for enhanced reliability and auditability.

“Parslee is building the tools that make enterprise AI actually work,” said Matt Liotta, CEO of Volato. “We started with document intelligence because enterprises needed AI they could trust with documents. Now we’re extending that trust into workflow execution—connecting AI to where work actually happens. These are complementary capabilities serving the same mission: making AI reliable and useful for business-critical operations.”

From Document Intelligence to Operational Autonomy

Built to interpret complex business records with precision, Parslee’s deterministic engine creates a consistent data layer that supports intelligent agents operating natively within Microsoft 365. At Ignite, Volato will demonstrate early examples including:

- **Business Analyst Agent** – Monitors live metrics, identifies anomalies, correlates data across systems, and creates tickets or meetings to resolve issues.
- **Finance Analyst Agent** – Monitors financial data, maps to successful prior spend adjustments, proposes spend reallocations, and recommends corrective actions.
- **Concierge & Communications Agents** – Generate customer responses, draft internal or external communications, and route approvals through Teams and Outlook.

Two Complementary Products, One Platform

Parslee’s platform now offers two complementary products addressing different enterprise needs. *Document Intelligence* provides deterministic preprocessing and audit trails that make AI reliable for analyzing contracts, SEC filings, and compliance materials—technology already active in paying pilot programs. *AI Agents* provide autonomous workflow execution by connecting AI directly to the systems where enterprise work happens: Microsoft 365, SharePoint, enterprise databases, and customer knowledge bases.

Strategic Context

Parslee was originally developed to streamline Volato's own compliance and operational workflows. Its evolution into a standalone software platform marks a pivotal shift in Volato's strategy toward scalable, defensible technology revenue. This direction complements Volato's pending combination with M2i Global, where auditability, provenance, and process integrity are central to mission-critical operations. The expanded platform demonstrates Volato's enterprise-grade software capability and opens multiple paths to customer adoption—organizations can start with document intelligence, workflow automation, or both.

"With Parslee, Volato is turning document intelligence into operational intelligence," Liotta added. "It's the practical bridge between today's document-driven businesses and tomorrow's autonomous enterprise."

Attendees can see live demonstrations of Parslee's AI Agents at Booth #4047 and join the early-access list at www.parslee.ai.

About Volato

Volato Group, Inc. (NYSE American: SOAR) is a technology company focused on building scalable software and data solutions that improve the reliability and intelligence of high-stakes business decisions. The company's Parslee Document Intelligence platform enhances the performance of leading large language models (LLMs) by adding deterministic structure and auditability to complex documents such as contracts and SEC filings. Through its pending acquisition of M2i Global, Volato is expanding into the critical minerals sector—leveraging its software expertise to bring greater transparency, traceability, and operational intelligence to supply chains essential for U.S. national security and advanced technologies. Forward Looking Statements

This press release contains forward-looking statements within the meaning of the securities laws. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words or variation of words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates," "projects," "forecasts," "targets," "would," "will," "should," "goal," "could" or "may" or other similar expressions. Forward-looking statements provide management or the Board's current expectations or predictions of future conditions, events, or results. All statements that address operating performance, events, or developments that may occur in the future are forward-looking statements, including statements regarding the challenges associated with executing our growth strategy, including expected deliveries of aircraft and related sales, and developing, marketing and consistently delivering high-quality services that meet customer expectations. All forward-looking statements speak only as of the date they are made and reflect Volato's good faith beliefs, assumptions, and expectations, but they are not guarantees of future performance or events. Furthermore, Volato disclaims any obligation to publicly update or revise any forward-looking statement, except as required by law. By their nature, forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. Factors that might cause such differences include, but are not limited to, a variety of economic, competitive, and regulatory factors, many of which are beyond Volato's control, that are described in Volato's periodic reports filed with the SEC including its Annual Report on Form 10-K for the fiscal year ended Dec. 31, 2024, and other factors that Volato may describe from time to time in other filings with the SEC. You should understand that it is not possible to predict or identify all such factors and, consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.
