Dura Coat Features Tough, Flexible Coatings at 50th National Frame Building Expo in Nashville

GLEN MILLS, Pa.--(BUSINESS WIRE)-- Dura Coat Products, Inc., an Axalta Coating Systems (NYSE: AXTA) company, will feature its premium quality line of high-performance coatings at booth #737 at the Frame Building Expo, held at the Gaylord Opryland Resort and Convention Center in Nashville, Tennessee, on March 8-10. The Frame Building Expo is the nation's largest event for post-frame construction professionals and is hosted by the National Frame Building Association (NFBA), which is celebrating 50 years as the industry's primary source of post-frame building resources, education, and research and development.

Dura Coat, a leading supplier of industrial coatings, will feature its well-known products Durapon 70™, Ceranamel™ XT-40S and XT-10. Durapon 70, a premium polyvinylidene fluoride (PVDF) coating that is designed to be harder and more flexible than other PVDF coatings, is exceptionally resistant to installation scratching, scuffing, marring, staining and transit abrasion to

help protect buildings from harsh environmental elements. Durapon

70's flexibility handles the most demanding post-forming and bending operations, making it an ideal coating choice for roofing and siding suppliers.

Ceranamel XT-40S, a siliconized polyester with a ceramic, porcelain-type finish, is designed to be harder and more resistant to abrasions and stains than conventional coatings. The XT-10 series of polyester resin finishes provide cost-effective protection in exterior exposures with resistance to ultraviolet degradation, to prevent chalking and fading in severe environments. XT-10 coatings are an excellent choice for commercial exterior applications, like side panels, insulated panels, garage and entry doors, soffit and fascia.

"These products are formulated in line with Dura Coat's commitment to reduce our carbon footprint and to be environmentally compliant," said Dan Knight, Vice President and General Manager of Dura Coat. "Durapon 70 and Ceranamel products are formulated with cool pigments and conform to the Cool Roof Rating Council and Energy Star minimum solar reflectance approval requirements, which makes them excellent for use in environmentally sensitive applications."

The National Frame Building Expo brings together builders, manufacturers, suppliers, distributors and design professionals from the post-frame construction industry in the United States. Keynote speaker, Haydn Shaw, a noted expert on leadership and change, will kick-off the three-day tradeshow exhibition and breakout seminars focusing on business and marketing, construction training, and technical and product knowledge.
