“We are excited to participate in the conference and exposition again this year and to bring our latest Nap-Gard FBE products to attendees,” said Meghan Hodge, Axalta’s Global Product Marketing Manager for functional powder coatings. “NACE Corrosion is a great platform to interact with pipeline industry customers and to showcase Axalta

products designed specifically with the technologies to meet these customers’ needs.”

Axalta will showcase recent Nap-Gard enhancements including its new, high-temperature protective internal pipe coatings. The new Nap-Gard 7-0017HT and 7-0017VHT Black

Beauty FBE products are thermosetting epoxy powders designed to provide excellent chemical resistance when operating in temperatures up to 200°C (392°F). These internal pipe coatings are formulated to be highly effective in combatting typical corrosion caused by carbon dioxide (CO₂) and hydrogen sulfide (H₂S) often found in sour crude oil and known to present a major challenge for the oil and gas industry.

NACE Corrosion is the world's largest corrosion conference and expo. The 2017 show will attract more than 7,000 corrosion professionals and 450 exhibitors to New Orleans, Louisiana for an educational experience focused on the prevention and mitigation of corrosion worldwide. In addition to educational opportunities, NACE Corrosion will expand professional networks and provide technical support to the industry.
