**REDWOOD TRUST, INC.**

During the fourth quarter of 2012, Redwood sold its remaining investment interests in nine legacy Acacia entities and ten legacy Sequoia entities. The sale of Redwood's interests in these legacy entities triggered a derecognition of their underlying assets and liabilities for financial reporting purposes and resulted in a \$4 million net, non-recurring increase to fourth quarter 2012 earnings. The \$4 million net, non-recurring increase is not reflected as a simple line item in Redwood's fourth quarter GAAP income statement. Instead, it is expressed as an \$11 million decrease to net interest income, reflecting the accelerated recognition of deferred hedging costs relating to Acacia entities, and a \$15 million realized gain upon deconsolidation. The \$15 million gain primarily reflects the proceeds received on the sale of the interests in these legacy entities, as well as recovery of excess loan loss reserves related to legacy Sequoia entities that Redwood was required to record in past periods under GAAP.

The table below sets forth the components of Redwood's first quarter 2013 and fourth quarter 2012 net income, as reported under GAAP, together with a non-GAAP presentation of the components of Redwood's fourth quarter 2012 net income. The non-GAAP presentation reflects a reclassification adjustment which, overall, does not impact reported net income under GAAP, but which we believe is useful for investors because it reflects the impact of the deconsolidation of the legacy Acacia and Sequoia entities in a manner consistent with the way management analyzes Redwood's fourth quarter 2012 results of operations and the manner in which management compares the components of fourth quarter 2012 net income to the components of first quarter 2013 net income.

(2) The Reclassification Adjustment column shows a reclassification adjustment related to the deconsolidation of certain legacy Acacia and Sequoia entities that impacts items reported under GAAP, but which, overall, does not impact reported net income: Net interest income is increased by \$11 million to address the non-recurring decrease to net interest income resulting from accelerated recognition of \$11 million of deferred hedging costs relating to Acacia entities upon deconsolidation of these entities; and Realized gain on deconsolidation is decreased by \$11 million to reflect that the deconsolidation of these Sequoia and Acacia entities resulted in a non-recurring net increase to earnings of only \$4 million.

(3) Total realized gains, net were \$20 million as reported under GAAP for the three months ended December 31, 2012.

The liabilities of these entities are obligations payable only from the cash flow generated by their securitized assets.
