<b>GAAP net income (loss)</b>	\$ 54	\$ (1)	\$ 47

<b>Non-GAAP core earnings per diluted common share <sup>(7)</sup></b>	\$ 0.36	\$ 0.41	\$ 0.60

- (1) Certain totals may not foot due to rounding.
- (2) Core earnings is a non-GAAP measure of Redwood's earnings and results of operations. Specifically, management has defined core earnings as: GAAP net income adjusted to (i) eliminate the impact of quarterly mark-to-market changes on the fair value of long-term investments (and associated derivatives) related to changes in benchmark interest rates and credit spreads, (ii) include the cumulative net gains or losses on long-term investments accounted for as trading securities under GAAP that were sold during the period presented, net of any gains or losses from derivatives associated with the investments sold, (iii) exclude certain items related to Redwood's acquisition of 5 Arches (as described in footnote 5 below) and (iv) include the hypothetical income taxes associated with core earnings adjustments.

Management utilizes this core earnings measure internally as one way of analyzing Redwood's performance over multiple periods, as it believes it provides useful comparative results absent the impact of certain quarterly mark-to-market changes and other items that management believes are not reflective of core results. Core earnings should not be utilized in isolation, nor should it be considered as an alternative to GAAP net income or other measurements of results of operations computed in accordance with GAAP. A further discussion of core earnings is included in the first quarter Redwood Review.

- (3) Adjustments eliminate the mark-to-market changes on the fair value of loans held-for-investment, trading securities, other investments, and associated derivatives that are primarily related to changes in benchmark interest rates and credit spreads. Beginning with the first quarter of 2019, management has updated its calculation of this adjustment for certain investments accounted for under the fair value option that have significant differences between expected cash interest and expected yield-to-maturity. For consistency of presentation, core earnings for the first and fourth quarters of 2018 has been updated to reflect the impact of this change during those quarters. Details regarding the change in calculation of this adjustment and the components of investment fair value changes, net, are included in the Appendix of the first quarter 2019 Redwood Review.
- (4) Adjustment includes the cumulative net gains or losses on long-term investments accounted for as trading securities under GAAP that were sold during the period presented, net of any realized gains or losses from derivatives associated with the investments sold. Cumulative gains and losses are calculated by multiplying the difference between the sales price and original purchase price by the face value of the securities sold.
- (5) Beginning with the first quarter of 2019, core earnings excludes several items related to the acquisition of 5 Arches. These items include the exclusion of a one-time gain associated with the re-measurement of our initial minority investment and purchase option in 5 Arches, as well as ongoing adjustments to exclude amortization of intangible assets and, in future quarters, changes in fair value of the contingent consideration liability related to the remaining purchase consideration for the platform. Additional information regarding this adjustment is included in the Appendix to the first quarter 2019 Redwood Review.
- (6) We apply estimated effective tax rates to core earnings adjustments occurring within Redwood's taxable REIT subsidiaries to estimate the hypothetical income tax expense or benefit associated with those adjustments.
- (7) Additional information on the calculation of non-GAAP core diluted EPS can be found in Table 2 in the *Financial Tables* section of the Redwood Reviews for the respective quarters presented.
