

IronNet Reports Third Quarter Fiscal 2022 Financial Results

Revises Fiscal Year Revenue and ARR Guidance Due to Delayed Strategic Opportunities

Added 49 New Customers Year-Over-Year; Grew Cloud Subscription Revenue 74% Year-Over-Year

MCLEAN, Va.--(BUSINESS WIRE)-- IronNet, Inc. (NYSE: IRNT) ("IronNet"), a leading provider of solutions Transforming Cybersecurity Through Collective Defense (SM), announced today its financial results for the third quarter ended October 31, 2021.

"Our prior outlook for both the quarter and fiscal year was supported by what we assessed as late-stage multi-million dollar strategic customer opportunities, the majority of which are in the U.S. public sector. We had previously expected to finalize these opportunities in the second half of the fiscal year, however they remain pending primarily due to government delays in getting funding through to federal budgets. These continue to be viable opportunities in our pipeline. Given the difficulty in predicting when they will close, we have removed them from our ARR guidance. We will disclose any strategic contracts that are accretive to our revised fiscal year ARR outlook," said GEN (Ret.) Keith Alexander, Chairman and co-CEO of IronNet.

Alexander added: "Our conviction remains strong that the need for IronNet Collective Defense^(TM) -- characterized by anonymized, real-time network detection, event correlation and response collaboration across the public and private sectors -- has never been greater. Recent government mandates and senior officials have highlighted how nations, sectors and companies must shift to defending in collaboration with one another. With this capability, IronNet has a strongly differentiated solution. We will continue to advance our strategy in pursuit of market share, encouraged by a number of leading indicators in the business, including our cloud subscription revenue growth, 30% ARR growth over the same point in time last year, and a healthy pipeline of customer opportunities that is simply taking time to convert to active engagements."

William Welch, co-CEO of IronNet, commented: "We have taken steps to drive improved predictability in our business, including increased emphasis on cloud deployments to expedite time to value for customers. As we continue to aggressively pursue the network detection and response market, our technology continues to distinguish us from other vendors. Recent favorable evaluations by highly discriminating IT teams noted that IronNet detected attack behaviors in customer networks and cloud deployed infrastucture with a level of speed and accuracy unmatched by other vendors. This goes beyond the indicators of compromise that many already share, and is a validation of our unique model."

- Revenue: \$6.9 million compared to \$7.0 million in the same quarter last year
 - Cloud subscription revenue grew to \$3.8 million from \$2.2 million in the same quarter last year
 - Recurring product revenue, which is defined as revenue that is subscriptionbased, grew to \$6.1 million, up from \$4.4 million in the same quarter last year
- **Gross Margin:** 65.7% compared to 70.5% in the same quarter last year, with one-time cost of sales accounting charges accounting for 2.4% of the year over year decline
- Operating loss:
 - GAAP: \$185.6 million, which includes \$160.1 million in non-cash stock-based compensation expense and \$1.6 million of transaction expenses, in both cases one-time, accounting-driven expenses triggered by the closing of the transaction this quarter, compared to \$12.6 million in the same quarter last year

Net loss:

- GAAP: \$193.1 million, which includes the one-time, accounting-driven expenses
 of \$160.1 million and \$1.6 million noted above as well as the additional one-time
 non-cash accounting-driven expense of \$11.3 million related to the change in fair
 market value of the private warrants between the date of the closing and their
 exercise in late September and early October, compared to \$12.5 million in the
 same quarter last year
- Non-GAAP Adjusted: \$20.2 million after excluding the one-time expenses described above
- Annual Recurring Revenue (ARR): \$27.5 million compared to \$21.2 million at the end of the same quarter last year and \$24.1 million at the end of the prior quarter
- **Dollar-based average contract length**: 2.8 years compared to 3.2 years at the end of the same quarter last year
- Calculated billings (Non-GAAP): \$3.4 million compared to \$8.1 million for the end of the same quarter last year
- Cash and cash equivalents: \$73.9 million at end of quarter
- Customer Count: 74 compared to 25 at the end of the same guarter last year

Business Highlights

- The IronNet <u>Threat Intelligence Brief</u>, published monthly, gathers data from IronNet's expert threat analysts to provide insight on significant community findings from malware analysis, threat research, and detection of malicious behavior targeting an enterprise or other IronDome^(R) community participants. Year-to-date, IronNet has identified and reported on more than double the amount of unique malicious or suspicious indicators of compromise (IoCs) as compared to the same period in the prior year.
- IronNet's innovation was recognized globally with the following recent awards: the 2021 Cyber Security Awards for Threat Detection Product of the Year, CybersecAsia Readers' Choice Awards for best in Network Monitoring and Observability, Northern Virginia Technology Council for Cyber Deal of the Year, and the 2021 APT Solution Provider of the Year by CyberSecurity Breakthrough.
- IronNet executives provided thought leadership and created brand awareness for IronNet's NDR technology and Collective Defense^(TM) business model at recent highprofile events, including: the Advanced Threat Summit (Poland), theCUBE interview at AWS Re-Invent, Washington Post LIVE interview with David Ignatius, the9-11 Memorial Security Summit, the Federal Reserve Roundtable, Institute of World Politics,

- and Singapore CISO Leadership Roundtable.
- At the Black Hat USA and London conferences in the third quarter, IronNet expert threat hunters were selected to monitor the Network Operations Center (NOC) using the IronDefense^(R) solution, successfully identifying more than 1,700 potential threats at the USA conference alone.

Outlook

For the fiscal year 2022, IronNet now expects:

- Revenue of approximately \$26 million
- ARR of approximately \$30 million to exit the fiscal year

Conference Call & Webcast Information

IronNet will host a conference call to discuss these results today, Wednesday, December 15, 2021, at 5:00 p.m. ET. A live webcast of the conference call and additional materials can be accessed on IronNet's Investor Relations website at https://www.ir.ironnet.com. A replay of the webcast will be available through the same link following the conference call.

Date: Wednesday, December 15, 2021

Time: 5:00 p.m. ET

Webcast: https://www.ir.ironnet.com

Dial-in number: 201-689-7807

Upcoming Investor Conference Participation

Needham Growth Conference

Tuesday, January 11, 2022

The webcast will be available on the Investor Relations section of the IronNet website at https://ir.ironnet.com/.

About IronNet

Founded in 2014 by GEN (Ret.) Keith Alexander, IronNet, Inc. (NYSE: "IRNT") is a global cybersecurity leader that is transforming how organizations secure their networks by delivering the first-ever Collective Defense platform operating at scale. Employing a number of former NSA cybersecurity operators with offensive and defensive cyber experience, IronNet integrates deep tradecraft knowledge into its industry-leading products to solve the most challenging cyber problems facing the world today. For more information, visit www.ironnet.com.

Forward-Looking Statements

This press release includes "forward-looking statements" within the meaning of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, including, without limitation, statements regarding IronNet's anticipated fiscal 2022 revenue and ARR as of the end of its fiscal year, its ability to transform cybersecurity, execute on its business strategy and increase market share, and the expansion of the cybersecurity market and demand for IronNet's products and services. When used in this press release, the words "estimates,"

"projected," "expects," "anticipates," "forecasts," "plans," "intends," "believes," "seeks," "may," "will," "should," "future," "propose" and variations of these words or similar expressions (or the negative versions of such words or expressions) are intended to identify forward-looking statements. These forward-looking statements are not guarantees of future performance, conditions or results, and involve a number of known and unknown risks, uncertainties, assumptions and other important factors, many of which are outside IronNet's management's control, that could cause actual results or outcomes to differ materially from those discussed in the forward-looking statements. Important factors, among others, that may affect actual results or outcomes include: IronNet's ability to execute on its plans to develop and market new products and the timing of these development programs; IronNet's estimates of the size of the markets for its products; the rate and degree of market acceptance of IronNet's products; the success of other competing technologies that may become available; IronNet's ability to identify and integrate acquisitions; the performance of IronNet's products; potential litigation; and general economic and market conditions impacting demand for IronNet's products. The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described under the heading "Risk Factors" in the final prospectus filed by IronNet with the Securities and Exchange Commission (SEC) pursuant to Rule 424(b)(3) on September 30, 2021, as well as other documents to be filed by IronNet from time to time with the SEC. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward looking statements, and IronNet does not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Certain Definitions and Non-GAAP Measures

Annual Recurring Revenue (ARR) -- Calculated at a particular measurement date as the annualized value of our then existing customer subscription contracts and the portions of other software and product contracts that are to be recognized over the course of the contracts and that are designed to renew, assuming any contract that expires during the 12 months following the measurement date is renewed on its existing terms.

Dollar-based average contract length: Calculated by multiplying the average total length of our customer contracts, measured in years or fractions thereof, by the respective revenue recognized for the last three months of each reporting period, and then dividing by the revenue attributable to software and product customers for the same three-month period used in the numerator. Because many of our customers have similar buying patterns and the average term of our contracts is more than 12 months, this metric provides a means of assessing the degree of built-in revenue repetition that exists across our customer base. Declines in average contract length are not reflective of the average lifetime of a customer.

Calculated billings: Calculated as total revenue plus the change in deferred revenue in a period. Calculated billings in any particular period aims to reflect amounts invoiced to customers to access our software-based, cybersecurity analytics products, cloud platform and professional services, together with related support services, for our new and existing customers. We typically invoice our customers on multi-year or annual contracts in advance, either annually or monthly.

Non-GAAP operating loss and Non-GAAP net loss: Calculated as GAAP operating loss and GAAP net loss excluding the impact of one-time stock-based compensation expense and transaction costs related to the merger between LGL Systems Acquisition Corp. and IronNet Cybersecurity, Inc.

While we believe that calculated billings may be helpful to investors because it provides insight into the cash that will be generated from sales of our subscriptions, this metric may vary from period-to-period for a number of reasons, and therefore has a number of limitations as a quarter-to-quarter or year-over-year comparative measure. In addition, other companies, including companies in our industry, may calculate similarly-titled non-GAAP measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our metric of calculated billings as tools for comparison. Because of these and other limitations, you should consider calculated billings along with revenue and our other GAAP financial results.

The following table presents a reconciliation of revenue, the most directly comparable financial measure calculated in accordance with GAAP, to calculated billings:

	Three Months Ended October 31,					
	2	021	20	020	2021 \	s 2020
Revenue	\$	6.9	\$	7.0	(0.1)	(1%)
Add: Total Deferred revenue, end of period		30.1		23.0	7.1	31%
Less: Total Deferred revenue, beginning of period		33.6		21.9	11.7	53%
Calculated billings	\$	3.4	\$	8.1	(4.7)	(58%)

The following table presents a reconciliation of GAAP financial measures to similar measures excluding the effects of stock-based compensation expense and transaction costs incurred as a result of the recently completed merger between LGL Systems Acquisition Corp. and IronNet Cybersecurity, Inc.and the change in fair value of private warrants between the closing of the merger and their exercise during the quarter.

		ree Months ed October 31,	Nine Months Ended October 31,			
	2021		2021			
		(\$ in thousands)				
Net loss	\$	(193,122)	\$	(225,789)		
Stock compensation expense (1)		160,094		160,094		
Change in fair value of warrants liabilities	;	11,302		11,302		
Transaction costs expense (2)		1,556		2,328		
Non-GAAP Adjusted Net Loss	\$	(20,170)	\$	(52,065)		

⁽¹⁾ Total stock based compensation of \$160.1 million has been recorded within research and development of \$20.9 million, sales and marketing of \$49.3 million, and general and administrative expense of \$89.9 million on the statement of operations

Stock compensation charges for the three month and nine month periods were precipitated by three factors (1) the occurrence of the closing of the Merger which triggered recognition of the time vested portion to that date from the pool of issued RSUs, (2) the de-SPAC type of trigger which satisfied the liquidity event condition on the RSUs that required an accounting revaluation of the vested RSUs at the time of the charge to their value on the date of the closing and (3) the accounting requirement to use a graded recognition method instead of a straight line method where the graded method used brings stock compensation

⁽²⁾ Transaction expenses have been recorded within general and administrative expense on the statement of operations

charges forward compared to the straight line method.
