

**Disclosure regarding Emissions-Reduction Plans  
(AB 1305 Disclosure)**

Sunrun has set a goal to operate on a net-zero basis with respect to our Scope 1 and Scope 2 emissions by 2040, and we are in the process of setting science-based targets with SBTi regarding our interim emissions reduction plan and setting a goal related to our Scope 3 emissions. Sunrun has set certain emissions reduction goals to help make interim progress toward our achievement of operating on a net-zero emissions basis with respect to Scope 1 and Scope 2 emissions by 2040, which can be found on pages 8-9 of our [2022 Impact Report](#). Sunrun discloses our Scope 1, Scope 2 and Scope 3 emissions annually in our Impact Reports ([available here](#)), and we engage an independent third-party carbon accounting firm to review these calculations. For additional details regarding our emissions reporting and calculations, please see pages 21 and 78-79 of our [2022 Impact Report](#).

Effective: January 1, 2024
