# The Joint Chiropractic Emphasizes Posture, Backpack Weight & 'Tech Neck' as Kids Head Back to School

SCOTTSDALE, Ariz., Sept. 1, 2021 /PRNewswire/ -- The upcoming school year is going to be an adjustment for a lot of families. Between the transition back to in-person learning, organized sports, play dates and more, it can be taxing on young bodies. The Joint Corp. (NASDAQ: JYNT), the nation's largest provider of chiropractic care through *The Joint Chiropractic*<sup>®</sup> network, is encouraging families to discuss the importance of spine health and its impact on children as they return to school.

## GROWING HEALTHY, HAPPY KIDS

Whether your child is just learning to walk, a college athlete, or anything in between, these tips along with routine trips to the chiropractor can help make sure your child stays active, healthy, and happy.

**INFANTS & TODDLERS**

**ADVICE:** To avoid pain and discomfort it's recommended to limit your child's time in a car seat or stroller to:

**2 hours**  
in a 24 hour period

**LITTLE KIDS**

**Bigger isn't always better.**  
Your child's backpack should never weigh more than **10-15%** of their total body weight.

**TWEENS**

Keep mobile devices eye level to avoid tech neck. Looking down can put extra strain and pressure on the neck of up to:

**50-60 lbs**

**TEENS**

Routine chiropractic adjustments can reduce issues caused by sports injuries and growth spurts.

**Girls** can grow until **age 18**

**Boys** can grow until **age 21**

With a return to campus, students will spend long stretches of time seated at desks, which can impact their posture and back. Poor backpack habits, extended hours on the phone, tablet and computer (which can lead to tech neck), and even some extracurricular activities can take a toll on their bodies. For school-aged children and student athletes, a healthy nervous system, brain, muscles and joint movement allow for achieving developmental milestones, and the ability to adapt to stress in their life.

"Every year, children put their bodies through changes and habits they grew out of while home for summer, like sitting at a desk, lugging heavy backpacks around and playing after school sports," said Steven Knauf, D.C., Executive Director of Chiropractic and Compliance at The Joint Corp. "One of the best ways to help your child maintain spinal wellbeing when they go back to school and avoid misalignments and structural issues, like tech neck, is to

encourage daily activity and proper posture. Walking in place, stretching, or doing a few jumping jacks will help prevent the muscle strain that can accompany sitting in one place for a long time."

The time spent looking down at a screen texting friends and studying, can cause damage to the structures in the neck and spine, often referred to as tech neck. It's important to teach children to hold their tablet or phone at eye level to help reduce the pressure placed on the neck. In an upright posture, the head normally weighs about 10 to 12 pounds. When the head is tilted forward, it can put additional strain on the neck, reaching up to 50 or even 60 pounds of pressure.

Additionally, back-to-school means shopping, and the American Chiropractic Association suggests the following tips for consideration when looking for a child's backpack and how to pack it:

- Backpacks should not be wider or longer than a child's torso;
- Choose a backpack with a padded back and shoulder straps;
- Know that bigger isn't always better – with more room comes more weight to carry. Fully loaded, a child's backpack should never weigh more than 10-15% of their total body weight; and
- Pack the heaviest things as close to the back and body as possible.

Children of all ages, from infants to tweens and teen athletes, can take advantage of regular chiropractic care. The Joint Chiropractic is known for its convenient retail setting and concierge-style services including no-appointments, no-insurance hassles, affordable chiropractic care and accommodating hours of operations, including evenings and weekends.
