## Avalo Reports Second Quarter 2022 Financial Results and Provides Business Updates

- Transferred anti-IL 18 monoclonal antibody product (AVTX-007) to Apollo Therapeutics in July with the approximate \$15 million of upfront payment received in August
- Dosed first patient in the Phase 2 PEAK Trial of its anti-LIGHT monoclonal antibody (AVTX-002) for the treatment of non-eosinophilic asthma (NEA)
- Dosed first patient in the Pivotal LADDER Trial of AVTX-803 for the treatment of Leukocyte Adhesion Deficiency Type II (LAD II)
- Disclosed cash and cash equivalents of \$11 million as of June 30, 2022, which does not include the approximate \$15 million received in August

WAYNE, Pa. and ROCKVILLE, Md., Aug. 04, 2022 (GLOBE NEWSWIRE) -- Avalo Therapeutics, Inc. (Nasdaq: AVTX), today announced business updates and financial results for the second quarter of 2022.

*"We have made significant progress advancing our clinical trials while also securing critical nondilutive capital since our first quarter business update,"* said Dr. Garry Neil, President and Chief Executive Officer of Avalo Therapeutics. *"We are pleased to have enrolled the first patient in both our Phase 2 PEAK trial of AVTX-002 in NEA as well as our pivotal LADDER trial of ATX-803 in LAD II. Additionally, it's critically important that we secured approximately \$15 million of initial consideration from our license and transfer of our AVTX-007 program. The transaction allows us to operationally and financially focus on our most promising programs, most notably AVTX-002."*

### **Business Updates:**

- In July 2022, Avalo granted an exclusive license to Apollo Therapeutics Group Limited (Apollo) granting rights to Apollo to research, develop, manufacture and commercialize AVTX-007. The AVTX-007 program was originally licensed to Avalo by MedImmune Limited, a subsidiary of AstraZeneca plc, and such license was transferred to Apollo as part of the transaction.
  - Avalo received approximately \$15 million of upfront consideration.
  - Avalo is also entitled to up to \$74 million of milestone payments, as well as a royalty payment of a low single digit percentage of annual net sales.
- On July 7, 2022, Avalo effected a 1-for-12 reverse stock split to increase the per share price of its common stock to regain compliance with the listing requirements of the Nasdaq Capital Market. On July 22, 2022, the Company received written notification from Nasdaq that Avalo had regained compliance and that the matter is now closed.
- In June 2022, Avalo, prepaid \$15 million under its loan venture loan and security

agreement (the Loan Agreement), of which \$14.8 million was applied to principal and the remainder applied to accrued interest. As of June 30, 2022, the remaining principal payments were \$21.2 million.

### Program Updates and Milestones:

- **AVTX-002:** Anti-LIGHT monoclonal antibody (mAb) targeting immune-inflammatory diseases.
  - NEA: Avalo has initiated its Phase 2 PEAK trial (A Phase 2, Randomized, Double-Blind, Placebo-Controlled, Parallel Group Study to Evaluate the Safety and Efficacy of AVTX-002 for the Treatment of Poorly Controlled Non-Eosinophilic Asthma K) evaluating the safety and efficacy of AVTX-002 in 80 patients with poorly controlled NEA. The first patient was dosed in May 2022. Top-line data from the trial are expected in the first half of 2023.
- **AVTX-800 programs (AVTX-803 and AVTX-801):** Monosaccharide therapies for two congenital disorders of glycosylation (CDGs): leukocyte adhesion deficiency type II (LAD II, also known as SLC35C1-CDG) and PGM1-CDG.
  - LAD II: Avalo has initiated its pivotal LADDER trial (A Phase 3, Randomized, Double-blind, Two-period, Crossover, Withdrawal Study to Assess the Efficacy and Safety of AVTX-803 in Subjects with Leukocyte Adhesion Deficiency Type II (LAD II) ER) evaluating the safety and efficacy of AVTX-803 in patients with LAD II (n=2). The first patient was dosed in July 2022. Data from this pivotal trial are expected in the first half of 2023.
  - PGM1-CDG: Milestone timing and the development plan is under review as a result of recent feedback from the U.S. Food and Drug Administration (FDA).

### Second Quarter 2022 Financial Update:

Avalo had \$11.2 million in cash and cash equivalents as of June 30, 2022, representing a \$43.4 million decrease as compared to December 31, 2021. The decrease was primarily driven by operating expenditures to fund and support pipeline development and a \$15.0 million partial prepayment under the Loan Agreement. Subsequent to June 30, 2022, Avalo received the approximate \$15 million of upfront payment from its transfer of AVTX-007.

Total operating expenses decreased \$16.7 million for the six months ended June 30, 2022 as compared to the same period in 2021. Research and development expenses decreased \$19.7 million due to a \$10.0 million upfront license fee incurred in the first quarter of 2021, which did not repeat, and a \$9.2 million reduction due to specific timing of manufacturing, non-clinical activities and clinical trial activities. Selling, general and administrative expenses increased \$1.7 million mainly due to severance and stock-based compensation expense driven by headcount reductions from the pipeline prioritization plan announced in the first quarter of 2022 and other separations, partially offset by decreases to legal, consulting and marketing expenses from cost savings initiatives. Cost of product sales increased \$2.1 million due to the net profit share of our non-core commercialized product, Millipred<sup>®</sup>, that began in the third quarter of 2021. Additionally, in the second quarter of 2022, we fully reserved the \$1.0 million receivable due in December 2024 pursuant to the transition service agreement with the third party that previously managed Millipred<sup>®</sup>'s commercial operations. The net loss and change in net loss was largely driven by operating expenses.

### **Forward-Looking Statements**

This press release may include forward-looking statements made pursuant to the Private Securities Litigation Reform Act of 1995. Forward-looking statements are statements that are not historical facts. Such forward-looking statements are subject to significant risks and uncertainties that are subject to change based on various factors (many of which are beyond Avalo's control), which could cause actual results to differ from the forward-looking statements. Such statements may include, without limitation, statements with respect to Avalo's plans, objectives, projections, expectations and intentions and other statements identified by words such as "projects," "may," "might," "will," "could," "would," "should," "continue," "seeks," "aims," "predicts," "believes," "expects," "anticipates," "estimates," "intends," "plans," "potential," or similar expressions (including their use in the negative), or by discussions of future matters such as: the future financial and operational outlook; the development of product candidates or products; timing and success of trial results and regulatory review; potential attributes and benefits of product candidates; and other statements that are not historical. These statements are based upon the current beliefs and expectations of Avalo's management but are subject to significant risks and uncertainties, including: Avalo's cash position and the need for it to raise additional capital in the near future; drug development costs, timing and other risks, including reliance on investigators and enrollment of patients in clinical trials, which might be slowed by the COVID-19 pandemic; reliance on key personnel, including as a result of recent management changes; regulatory risks; general economic and market risks and uncertainties, including those caused by the COVID-19 pandemic and tensions in Ukraine; and those other risks detailed in Avalo's filings with the SEC. Actual results may differ from those set forth in the forward-looking statements. Except as required by applicable law, Avalo expressly disclaims any obligations or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in Avalo's expectations with respect

thereto or any change in events, conditions or circumstances on which any statement is based.
