"Business conditions have stabilized significantly over the second quarter, for both Peoples Bank and the industry more broadly. The Bank's deposits were largely stable, although we did see continued movement of customers' deposits from lower-cost to higher-cost deposit accounts. We have maintained a defensive liquidity position, and in this environment it is possible to generate some marginal income while we maintain our cash position. With that in mind, like many banks, we are focused on serving our core customers and communities with our capital and liquidity, and loan yields are starting to show some momentum," said Benjamin Bochnowski, Chairman and CEO. "Our team has remained disciplined with operating expenses and we are serving our customers more efficiently and effectively. We anticipate that we could be at the top of the rate cycle for some time, and with that in mind, we are also highly focused on credit quality. We have been selective and diligent in our underwriting while we have reduced our number of non-performing loans."

## Highlights of the year-to-date period include:

- Net interest margin: The net interest margin for the six months ended June 30, 2023, was $2.98 \%$, compared to $3.50 \%$ for the six months ended June 30, 2022. The taxadjusted net interest margin (a non-GAAP measure) for the six months ended June 30, 2023, was $3.13 \%$, compared to $3.70 \%$ for the six months ended June 30, 2022. The decreased net interest margin is primarily the result of the increase in short-term
interest rates relative to long-term interest rates as part of the Federal Reserve's response to high inflation. We anticipate the compression seen in the first six months of the year could continue, unless target rates decrease, and our interest-bearing liabilities are able to be repriced at those lower rates. See Table 1 at the end of this press release for a reconciliation of the tax-adjusted net interest margin to the GAAP net interest margin.
- Funding: On June 30, 2023, deposits totaled $\$ 1.80$ billion, compared to $\$ 1.78$ billion on December 31, 2022, an increase of $\$ 20.1$ million or $1.1 \%$. As of June 30, 2023, core deposits totaled $\$ 1.3$ billion, compared to $\$ 1.4$ billion on December 31, 2022, a decrease of $\$ 121.5$ million or $8.6 \%$. Core deposits include checking, savings, and money market accounts and represented $71.9 \%$ of the Bancorp's total deposits at June 30, 2023. Through the first six months of 2023, balances for checking and savings accounts decreased, as balances migrated into higher yielding accounts. On June 30, 2023, balances for certificates of deposit totaled $\$ 504.7$ million, compared to $\$ 363.1$ million on December 31, 2022, an increase of $\$ 141.6$ million or $39.0 \%$. The decrease in core deposits and increase in certificate of deposit balances is related to customer preferences for higher yielding deposits, along with efforts by the Bank to manage future deposit costs. In addition, on June 30, 2023, borrowings and repurchase agreements totaled $\$ 196.4$ million, compared to $\$ 135.5$ million at December 31, 2022, an increase of $\$ 60.9$ million or $44.9 \%$. The increase in short-term borrowings was the result of cyclical inflows and outflows of interest-earning assets and interest-bearing liabilities. As of June 30, 2023, 71\% of our deposits are fully FDIC insured, and another 9\% are further backed by the Indiana Public Deposit Insurance Fund. The Bancorp's liquidity position remains strong with solid core deposit customer relationships, excess cash, debt securities, and access to diversified borrowing sources. The Bancorp has available liquidity of $\$ 693$ million including borrowing capacity from the FHLB and Federal Reserve facilities.
- Unrealized losses on the securities portfolio: Accumulated other comprehensive losses were $\$ 60.2$ million as of June 30, 2023, compared to $\$ 64.3$ million on December 31,2022 , a decrease of $\$ 4.1$ million or $6.4 \%$. The yield on the securities portfolio improved on a year-to-date basis to $2.38 \%$ for the six months ended June 30, 2023, up from $2.12 \%$ for the six months ended June 30, 2022. The effective duration of the securities portfolio was 6.6 years as of June 30, 2023. Management continues to actively manage the securities portfolio and does not currently anticipate the need to realize losses from sales in the securities portfolio, as losses are currently driven by the interest rate environment and management expects such losses to be fully recoverable. Further, it remains unlikely the Bancorp will be required to sell the investments in the portfolio before recovery of their amortized cost basis, which may be at maturity.
- Gain on sale of loans: Lack of existing housing inventory and increases in mortgage rates have slowed the sale of fixed rate mortgage loans into the secondary market. As a result, gains from the sale of loans for the six months ended June 30, 2023, totaled \$537 thousand, down from \$898 thousand for the six months ended June 30, 2022. During the six months ended June 30, 2023, the Bank originated $\$ 19.3$ million in new fixed rate mortgage loans for sale, compared to $\$ 29.2$ million during the six months ended June 30, 2022. During the six months ended June 30, 2023, the Bank originated $\$ 17.4$ million in new mortgage loans retained in its portfolio, compared to $\$ 50.0$ million during the six months ended June 30, 2022. Total mortgage originations for the three month period ending June 30, 2023, totaled $\$ 22.7$ million, an increase of $\$ 8.7$ million
from the three month period ending March 31, 2023's total of $\$ 14.0$ million. This increase was primarily driven by seasonal demand for mortgages peaking in the spring and summer months. These retained loans are primarily construction loans and adjustable-rate loans with a fixed-rate period of 7 years or less, and the Bank continues to sell longer-duration fixed rate mortgages into the secondary market.
- Commercial lending: The Bank's aggregate loan portfolio totaled $\$ 1.53$ billion on June 30, 2023, compared to $\$ 1.51$ billion on December 31, 2022, an increase of $\$ 20.5$ million or $1.4 \%$. The increase is the result of organic loan portfolio growth. During the six months ended June 30, 2023, the Bank originated $\$ 136.9$ million in new commercial loans, compared to $\$ 196.9$ million during the six months ended June 30, 2022. The loan portfolio represents $76.6 \%$ of earning assets and is comprised of $62.7 \%$ commercial related credits. At June 30, 2023, the Bancorp's held loan balances in commercial real estate owner occupied properties of $\$ 215.4$ million or $14.1 \%$ of total loan balances and commercial real estate non-owner occupied properties of $\$ 286.4$ million of $18.7 \%$ of total loan balances. Of the $\$ 286.4$ million in commercial real estate non-owner occupied properties balances, loans collateralized by office build represented $\$ 39.7$ million or $2.5 \%$ of total loan balances.
- Asset quality: At June 30, 2023, non-performing loans totaled $\$ 12.3$ million, compared to $\$ 18.4$ million at December 31, 2022, a decrease of $\$ 6.1$ million or $32.9 \%$. The Bank's ratio of non-performing loans to total loans was $0.80 \%$ at June 30, 2023, compared to $1.21 \%$ at December 31, 2022. The Bank's ratio of non-performing assets to total assets was $0.62 \%$ at June 30, 2023, compared to $0.94 \%$ at December 31, 2022. The decrease in non-performing loans is primarily the result of management's strategic non-performing asset management which includes proactive relationship management and note sales. At June 30, 2023, the allowance for credit losses (ACL) totaled $\$ 19.5$ million and is considered adequate by management. For the quarter ended June 30, 2023, charge-offs, net of recoveries, totaled $\$ 579$ thousand. The allowance for credit losses as a percentage of total loans was $1.27 \%$ at June 30, 2023, and the allowance for credit losses as a percentage of non-performing loans, or coverage ratio, was $158.3 \%$ at June 30, 2023. On January 1, 2023, the Bancorp adopted ASU No. 2016-13 resulting in an implementation entry of $\$ 8.3$ million, increasing the ACL by $\$ 5.2$ million and unfunded commitment liability of $\$ 3.1$ million, and also resulting in retained earnings decreasing $\$ 6.1$ million and generating a deferred tax asset of $\$ 2.2$ million. The majority of the implementation entry is related to including acquired loan portfolios in the model and the addition of using economic forecasts in estimating future losses. In addition, $\$ 1.0$ million of non-accretable credit loan discounts on purchase credit impaired loans now classified as purchase credit deteriorated were reallocated to the ACL.
- Optimizing the banking center footprint: During the six months ended June 30, 2023, the Bank sold two banking centers held for sale, resulting in a gain of $\$ 276$ thousand for the period. Each banking center closure and sale is expected to result in approximately $\$ 250$ thousand in operational expense reduction, excluding personnel expenses. The Bank's remaining 26 locations are being analyzed for footprint optimization opportunities, with additional locations showing the potential for reducing operating overhead over the next 12 months. These efforts are reducing fixed costs and allowing for redeployment of a portion of occupancy expenses into building a digital-forward foundation to better meet the needs of the customers and communities the Bancorp serves.
- Personnel: Management continues to look for efficiency in personnel and has netted a
reduction of 21 full time equivalents, or 7\%, through the six months ended June 30, 2023.
- Capital Adequacy: As of June 30, 2023, the Bank's tier 1 capital to adjusted average assets ratio totaled $7.6 \%$, which is within all regulatory capital requirements, and continues to be considered well capitalized. The Bancorp's tangible book value per share was $\$ 25.64$ at June 30, 2023, up from $\$ 25.41$ as of December 31, 2022 (a nonGAAP measure). Tangible common equity to total assets was $5.11 \%$ at June 30, 2023, down from $5.27 \%$ as of December 31, 2022 (a non-GAAP measure). The decrease is due to increased average assets compared to year-ended December 31, 2022. Excluding accumulated other comprehensive losses, tangible book value per share decreased to $\$ 39.62$ as of June 30, 2023, from $\$ 40.36$ as of December 31, 2022 (a non-GAAP measure). The decrease is related to a reduction of retained earnings of $\$ 6.1$ million due to the impact of the adoption of ASU No. 2016-13 and the payment of dividends of $\$ 2.7$ million. See Table 1 at the end of this press release for a reconciliation of the tangible book value per share, tangible book value per share adjusted for accumulated other losses, tangible capital as a percentage of tangible assets, and tangible capital as a percentage of tangible assets adjusted for accumulated other comprehensive losses to the related GAAP ratios.
