

Company Overview

The annual cost of alcohol abuse in the U.S. is **\$249 billion**. Nearly half of all industrial accidents with injuries are alcohol-related, and 1-in-10 U.S. commercial drivers test positive for alcohol (the highest rate worldwide). In response, Denver-based SOBRsafe™ has developed a proprietary, touch-based identity verification, alcohol detection and cloud-based reporting system. The technology is transferable across innumerable form factors, including stationary access control, personal wearables and for telematics integration.

[View introductory video](#)

A preventative solution in a historically reactive industry, it is being deployed for commercial fleets and workplaces; other intended applications include managed care and young drivers. This patent-pending alcohol detection solution helps prevent an intoxicated worker from taking the factory floor, or a driver the vehicle keys. An offender is immediately flagged, and the employer (or parent, rehab sponsor, etc.) is empowered to take the appropriate corrective actions. At SOBRsafe, we are **creating a culture of prevention**.
