Sprinklr and CreatorIQ Announce Strategic Partnership to Unify Creator, Organic, and Paid Social Media

New integration bridges creator intelligence with enterprise social media platforms, delivering unified measurement across channels.

NEW YORK & LOS ANGELES--(BUSINESS WIRE)-- [Sprinklr](#) (NYSE: CXM), the definitive, AI-native platform for Unified Customer Experience Management (Unified-CXM), and [CreatorIQ](#), the global operating system for creator-led growth, today announced a strategic partnership and integrated solution connecting creator intelligence with enterprise social systems to help enterprise brands integrate, measure, and scale creator marketing alongside their broader social and marketing strategies.

As social media ecosystems grow more complex, enterprises face increasing pressure to unify measurement across creator, paid, and owned social channels. Yet performance data remains fragmented across tools, limiting visibility into how creator and social investments drive revenue and growth. At the same time, creator marketing continues to accelerate. Average investment increased [171% year-over-year](#) in 2025, and more than half of marketers use creator content in paid and organic channels — underscoring the need for connected systems that improve ROI and media efficiency.

Sprinklr and CreatorIQ's new partnership delivers an integrated solution and a more connected operating model for enterprise marketing — linking creator intelligence, social media management, and paid amplification within a unified ecosystem. The Creator Graph™, CreatorIQ's proprietary intelligence infrastructure that processes 123M creator posts per day, will feed directly into Sprinklr's enterprise social media reporting environment, enabling brands to assess creator, organic, and paid performance in one place and better understand their impact on revenue and growth.

“As enterprises scale their creator investments, the ability to connect creator intelligence with broader social systems becomes critical,” said **Sprinklr Vice President of Product Management, Anish Chadda**. “Integrating CreatorIQ data directly into Sprinklr gives brands one connected environment for strategy, execution, and measurement across creator, paid, and owned channels. Our integrated solution enables teams to align efforts across platforms and activate creator content with far greater precision and impact.”

“Creator marketing is now foundational to how enterprise brands drive measurable business impact, but its data has too often been disconnected from broader social and paid performance systems,” said **Tim Sovay, Chief Partnerships Officer at CreatorIQ**. “For more than 11 years, CreatorIQ has built the industry's most comprehensive creator marketing data foundation — structured, normalized, and proven at enterprise scale. The partnership between Sprinklr and CreatorIQ reflects our shared commitment to connecting

creator intelligence with enterprise social ecosystems, enabling marketers to evaluate creator impact within the full context of their social and customer experience strategies. Together, we're delivering the unified, enterprise-grade intelligence required for AI-driven marketing and full-funnel growth."

A Unified View of Social Media and Creator Impact

The Sprinklr and CreatorIQ partnership brings:

- **Unified performance visibility:** View CreatorIQ campaign performance alongside organic and paid social metrics to understand total channel impact in one place.
- **Smarter capital allocation:** Identify which creator-driven initiatives generate incremental revenue, improve media efficiency, and drive cross-channel ROI.
- **Operational and media efficiency at scale:** Eliminate fragmented workflows by reducing manual data exports and cross-platform reconciliation.
- **Paid amplification:** Activate high-performing creator content directly within Sprinklr's paid media suite.

Together, Sprinklr and CreatorIQ are building a more connected marketing ecosystem — where creator intelligence, social media management, and paid activation operate as an integrated enterprise growth capability.
