Actelis Networks Receives \$200,000 Order to Provide Fast Upgrade and Modernization to US Army National Guard Base Network

Actelis' cyber-hardened hybrid-fiber networking technology continues to gain momentum in the federal government and military sector, following a number of recently announced orders

FREMONT, Calif., Sept. 26, 2024 (GLOBE NEWSWIRE) -- Actelis Networks, Inc. (**NASDAQ:ASNS**) ("Actelis" or the "Company"), a market leader in cyber-hardened, rapid deployment networking solutions for IoT applications, today announced that it has received a \$200,000 order from the United States Department of Military Affairs to supply a US Army National Guard base with its cyber-hardened hybrid-fiber networking solution. Actelis continues to build on its momentum in the federal government sector, having just recently announced a [significant order](#) from a US Department of Aerial Transportation agency. This follows a \$150,000 [order](#) in July from a tier-1 military contractor to deliver the company's advanced [GigaLine 800](#) solution to US military bases.

Actelis was chosen for its ability to instantly deliver significantly higher bandwidth compared to the base's legacy system, without requiring any upgrades to the existing physical cabling. By opting for Actelis' hybrid-fiber networking solution, the base network can achieve the necessary bandwidth immediately, saving substantial time and costs on engineering and construction. Actelis' cyber-hardened solution is uniquely positioned as the only solution of its kind listed on the Department of Defense's [Approved Products List \(APL\)](#), having earned both [JITC](#) and [NIST](#) certifications for [FIPS compliance](#). This distinction gives government agencies confidence that their networks are safeguarded by a solution rigorously tested to meet the highest cybersecurity standards protected against cyber vulnerabilities.

"Military bases are increasingly recognizing the immediate value we provide by leveraging their existing network infrastructure," said Tuvia Barlev, Chairman and CEO of Actelis. "Bases can achieve fiber-grade connectivity for their current operations very fast, while also future-proofing their systems to accommodate additional devices and technologies—without the constraints of outdated bandwidth limitations."

The National Guard base this order relates to supports hundreds of state and government employees, as well as housing for thousands of Army personnel. To ensure seamless and efficient on-base operations, the base required a significant network upgrade. Military facilities depend on high-speed, reliable communications for critical applications such as internet services, Voice over IP (VoIP) systems, access control, surveillance, and HVAC monitoring. With the existing network unable to meet growing bandwidth demands, the base

turned to Actelis for a robust, future-ready solution.

About Actelis Networks, Inc.

Actelis Networks, Inc. (NASDAQ: ASNS) is a market leader in hybrid fiber-copper, cyber-hardened networking solutions for rapid deployment in wide-area IoT applications, including government, ITS, military, utility, rail, telecom, and campus networks. Actelis' innovative portfolio offers fiber-grade performance with the flexibility and cost-efficiency of hybrid fiber-copper networks. Through its "Cyber Aware Networking" initiative, Actelis also provides AI-based cyber monitoring and protection for all edge devices, enhancing network security and resilience.
