Empery Digital Reiterates Commitment to Closing the NAV Gap

Board Recently Authorized Increase in Share Repurchase Program to $200 Million to Support Strategy

AUSTIN, Texas--(BUSINESS WIRE)-- Empery Digital Inc. (NASDAQ: EMPD) (the "Company" or "Empery Digital") today reiterated its commitment to addressing the gap between the Company's enterprise value and its net asset value ("NAV") through accretive share repurchases.

Empery Digital intends to fund the share repurchases with sales of bitcoin, incremental drawdowns on its debt facilities or a combination of the two based on the Company's leverage ratios and valuation relative to NAV. The Company's Board of Directors (the "Board") recently increased the share repurchase program to $200 million in support of this objective, resulting in approximately $100 million available under the program.

The Board and management team believe that its current strategy of share repurchases below NAV will maximize shareholder value as accretive repurchases increase NAV per share at a rate that exceeds the growth rate of bitcoin. They further believe that the mathematical analysis does not support an immediate liquidation of its entire bitcoin portfolio and therefore is not in the best interests of all shareholders.

We regularly engage with shareholders and value constructive input towards the mutual goal of maximizing long-term value. The Company's Board believes that the Company has the right team in place to successfully execute its bitcoin treasury strategy.
