About Hancock Jaffe Laboratories, Inc.

Hancock Jaffe Laboratories (NASDAQ:HJLI) specializes in developing and manufacturing bioprosthetic (tissue based) medical devices to establish improved standards of care for treating cardiac and vascular diseases. Hancock Jaffe currently has two lead product candidates: the VenoValve[®], a porcine based valve which is intended to be surgically implanted in the deep venous system of the leg to treat reflux associated with Chronic Venous Insufficiency; and the CoreoGraft[®], a bovine tissue based off the shelf conduit intended to be used for coronary artery bypass surgery. Hancock Jaffe has a third product candidate, which is a porcine tissue-based heart valve, which may be a candidate for pediatric aortic/mitral valve replacement. Hancock Jaffe has a 19-year history of developing and producing FDA approved medical devices that sustain or support life. The current management team at Hancock Jaffe has been associated with over 80 FDA or CE marked medical devices. For more information, please visit HancockJaffe.com.
