

Oncolytics Biotech® Inc. Announces 2016 Third Quarter Results

CALGARY, Nov. 3, 2016 /PRNewswire/ - Oncolytics Biotech® Inc. (TSX: ONC) (OTCQX: ONCYF) (FRA: ONY) ("Oncolytics" or the "Company") today announced its financial results and operational highlights for the third quarter ended September 30, 2016.

"During the quarter we reported additional statistically significant, randomized clinical data that further strengthened the linkage between genetic status and survival outcomes in patients with adenocarcinoma of the lung," said Dr. Matt Coffey, Interim President and CEO of Oncolytics Biotech. "In parallel with reporting data from sponsored Phase 2 randomized studies, we continued to push ahead with preparations for a registration study."

Selected Highlights

Since July 1, 2016, selected highlights announced by the Company include:

Clinical Program

- Additional data from a randomized, sponsored Phase II clinical study of REOLYSIN® in non-small cell lung cancer (IND 211), which showed that:
 - progression free survival ("PFS") was statistically significantly better for female patients in the test arm (n=20) than for those in the control arm (n=16) in patients with adenocarcinoma. Median PFS was 5.39 months compared with 3.02 months, respectively (p=0.0201);
 - evolving overall survival ("OS") demonstrated a strong trend towards survival benefit for female patients in the test arm with adenocarcinoma (n=20, six of whom remained alive at the time of the analysis) over those in the control arm (n=16, three of whom remained alive at the time of the analysis). Median OS was 10.68 months compared with 7.59 months, respectively (p=0.145) (Figure B). By contrast, no PFS or OS benefit was noted for the male patients with adenocarcinoma; and
 - patients with adenocarcinoma treated with REOLYSIN® with one or more target biomarkers (EGFR, Hras, Kras, Nras, Braf and/or p53 mutations) had a greater PFS (p=0.039) and OS (p=0.031) than patients treated with REOLYSIN® without any of these biomarkers. The presence of these biomarkers may account, at least in part, for the difference between the survival outcomes for male and female patients; target biomarkers were present in a higher proportion of the female patients in the study than the male patients (66.7% versus 43.6%). As a result, pre-screening for target biomarkers in patients with adenocarcinoma of the lung is warranted.

Financial

At September 30, 2016, the Company reported \$17.7 million in cash, cash equivalents and short-term investments. At November 2, 2016, the Company had approximately \$16.7 million in cash, cash equivalents and short-term investments.

About Oncolytics Biotech Inc.

Oncolytics is a Calgary-based biotechnology company focused on the development of oncolytic viruses as potential cancer therapeutics. Oncolytics' clinical program includes a variety of later-stage, randomized human trials in various indications using REOLYSIN[®], its proprietary formulation of the human reovirus. For further information about Oncolytics, please visit: www.oncolyticsbiotech.com.

This press release contains forward-looking statements, within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. Forward-looking statements, including the Company's belief as to the potential of REOLYSIN[®] as a cancer therapeutic; the Company's expectations as to the success of its research and development programs in 2016 and beyond, the Company's planned operations, the value of the additional patents and intellectual property; the Company's expectations related to the applications of the patented technology; the Company's expectations as to adequacy of its existing capital resources; the design, timing, success of planned clinical trial programs; and other statements related to anticipated developments in the Company's business and technologies involve known and unknown risks and uncertainties, which could cause the Company's actual results to differ materially from those in the forward-looking statements. Such risks and uncertainties include, among others, the availability of funds and resources to pursue research and development projects, the efficacy of REOLYSIN[®] as a cancer treatment, the success and timely completion of clinical studies and trials, the Company's ability to successfully commercialize REOLYSIN[®], uncertainties related to the research and development of pharmaceuticals, uncertainties related to the regulatory process and general changes to the economic environment. Investors should consult the Company's quarterly and annual filings with the Canadian and U.S. securities commissions for additional information on risks and uncertainties relating to the forward-looking statements. Investors are cautioned against placing undue reliance on forward-looking statements. The Company does not undertake to update these forward-looking statements, except as required by applicable laws.
