NetSol Technologies Announces New LeasePak Vehicle and Equipment Portfolio Module

LeasePak 'Asset Focus Module' Designed to Track Asset Risk and Revenue Performance of Financed Assets

CALABASAS, CA -- (MARKET WIRE) -- 03/19/08 -- NetSol Technologies Inc. ("NetSol") (NASDAQ: NTWK), a multinational provider of IT services and enterprise software to the financial services industry, announced the release of a new LeasePak data management offering. The new LeasePak 'Asset Focus Module' gives vehicle and commercial equipment finance product managers a robust means for tracking the revenue performance of financed assets.

Finance portfolio managers need to measure financial program performance in a variety of ways. Traditionally, they have done so by tracking each individual or aggregated lease or loan contract, any of which could include a number of financed equipment or vehicle assets. The NetSol Asset Focus Module provides finance managers the ability to mitigate risk and measure performance by tracking individual or aggregated assets across multiple contracts and customers.

NetSol CEO and Chairman Najeeb Ghauri states, "NetSol's customers need to measure the ROA (return on asset) of the assets they have financed and to offer their customers similar options for invoicing. We are very excited to be one of the only vendors in the financial services technology sector to offer our software customers the ability to freely choose among contract and asset-based accounting methods with unprecedented flexibility, as dictated by their business requirements and competitive strategies. We expect a very warm reception for these new capabilities from the North American equipment finance industry."

LeasePak is NetSol's core vehicle and commercial equipment portfolio management solution. The Asset Focus Module is currently available for NetSol customers in North America and Australia, and was developed in close collaboration with Fortune 500 customers of NetSol.

About NetSol Technologies Inc.

NetSol Technologies (NASDAQ: NTWK) is a multinational provider of IT services and enterprise solutions to the financial services industry. By utilizing its worldwide IT design, development, quality assurance (QA), and project management resources, NetSol delivers

high-quality, cost-effective portfolio management solutions for equipment and vehicle finance, as well as IT services ranging from consulting and application development to systems integration and development outsourcing.
