# NETSOL Technologies Achieves AWS Foundational Technical Review Badges for Five Products

ENCINO, Calif., April 02, 2024 (GLOBE NEWSWIRE) -- NETSOL Technologies, Inc. (Nasdaq: [NTWK](#)), the global leader in delivering state-of-the-art solutions for the asset finance and leasing industry, has announced its achievement of the Amazon Web Services (AWS) Foundational Technical Review badges - a testament to its exceptional expertise in cloud technologies. This achievement is in recognition of five of NETSOL's cloud-based, API-first solutions that are part of Appex Now – the Company's marketplace of products designed for the global credit, finance and leasing industry.

The technology review was conducted to validate the following Appex Now products:

- Flex, an instant, powerful and flexible end-to-end calculation and quotation engine.
- Hubex, a cloud-based, pre-built API library that standardizes integration procedures with best-in-class partners.
- Index, a cloud-based parameter storage application facilitating core lending operations.
- Dock, an advanced document generation tool that enables users to create accurate and professional documents seamlessly.
- Lane, an end-to-end order management system for asset finance and leasing companies.

These five out-of-the-box solutions from the marketplace were successfully validated by AWS for their technical proficiency and associated customer references. All the requirements were successfully fulfilled, and the SaaS applications were all found to meet AWS's best practices and industry standards.

The AWS Foundational Technical Review Badge is awarded to organizations that demonstrate proficiency in foundational areas of cloud computing on the AWS platform. It showcases NETSOL's commitment to excellence in cloud architecture and its proficiency in leveraging AWS to create robust, scalable solutions. The badges earned signify that the company has met AWS's rigorous standards for technical knowledge, best practices and hands-on experience in building secure, high-performing, resilient and efficient infrastructure for clients.

"We're thrilled to earn the AWS Foundational Technical Review badges," said Najeeb Ghauri, Founder and CEO of NETSOL Technologies, Inc. "This achievement underscores

our dedication to delivering cutting-edge cloud solutions that meet the highest industry standards. Our clients can be confident that they're partnering with a company that has proven its capabilities in architecting top-tier AWS-based solutions."

"As NETSOL continues to push the boundaries of innovation and provide clients with transformative cloud solutions, the AWS Foundational Technical Review badges reinforce our commitment to delivering value, security and scalability," he added. "These badges are a recognition of our deep understanding of AWS services and the ability to design and implement well-architected solutions that align with AWS's best practices."

"This recognition reflects our team's hard work, expertise and relentless pursuit of excellence in cloud computing for the lease and finance industry and validates the design flexibility of Apex Now products," commented Kamran Khalid, Chief Product Officer at NETSOL Technologies. "Our cloud solutions meet the evolving needs of our clients by providing end-to-end origination, complete digital retail solutions, and enabling the seamless integration of any of these independent products into their business operations. Clients can leverage these out-of-the-box solutions within their existing ecosystems, with or without our implementation services. This recognition also further strengthens our position as a trusted partner for organizations seeking to leverage the power of cloud technology to drive innovation and accelerate growth. We look forward to continuing our collaboration with AWS to provide cutting-edge cloud solutions and unmatched value to clients across industries."

### **About NETSOL Technologies**
