## Chinese leasing company goes live with Transcend Finance in Indonesia

ENCINO, Calif., July 17, 2025 (GLOBE NEWSWIRE) -- NETSOL Technologies, Inc. (Nasdaq: NTWK), a leader in AI-powered solutions and services enabling OEMs, dealerships and financial institutions to sell, finance and lease assets, has announced the successful go-live of its Transcend Finance platform for a leading Chinese leasing company, marking the customer's official launch of operations in the Indonesian market.

The customer, known for offering a wide range of leasing solutions across sectors including equipment leasing, asset financing and commercial leasing, has deployed NETSOL's Transcend Finance for its retail operations, comprising Omni Point of Sale (Omni POS) and Contract Management System (CMS), alongside a customized funding system designed to support their unique operational needs in Indonesia.

This go-live marks the completion of a greenfield implementation, enabling the customer to build entirely new processes free of legacy constraints. The solution is fully Indonesia-ready, aligned with local regulatory and operational standards, and was delivered without the need for any data migration from prior systems.

"This go-live is a significant milestone not only for our client as they enter a new and competitive market, but also for NETSOL as we continue to demonstrate our ability to deliver fully localized, high-performance technology solutions on a global scale," said Najeeb Ghauri, Founder and CEO of NETSOL Technologies, Inc. "Our team's deep understanding of the asset finance and leasing landscape, combined with our agile implementation methodology, enabled us to bring this solution to life in less than six months – tailored specifically to the regulatory and operational requirements of the Indonesian market."

"Our agile delivery approach ensured a fast and flexible implementation, fully aligned with the client's evolving business needs," he further stated. "We're excited for this partnership and will provide ongoing support as they scale their business in this dynamic market."

"We're thrilled to have played a key role in enabling the client's launch in Indonesia," said Amanda Li Linjie, President of NETSOL Technologies China. "The collaboration between our teams was exceptional and we're confident that our solution will serve as a solid foundation for their growth in the region."

"What makes this project especially meaningful is the greenfield nature of the implementation – we created a highly efficient, scalable system without the limitations of legacy infrastructure," she added. "It reflects our broader philosophy of not just being a

technology vendor, but a long-term strategic partner invested in our client's success. We look forward to growing this relationship as the client expands further and to continuing to deliver innovations that help shape the future of global leasing."
