Westell Technologies to Speak, Exhibit at DAS & Small Cells Congress 2015

AURORA, Ill.--(BUSINESS WIRE)-- [Westell Technologies, Inc.](#) (NASDAQ:WSTL), a leading provider of in-building wireless, intelligent site management, cell site optimization, and outside plant solutions, announces today its Director of Product Management for Westell's [In-Building Wireless \(IBW\) group](#), Rick Good, will serve as a key panelist for the "DAS Optimization and Monitoring Techniques for Peak Performance" session at the upcoming [DAS & Small Cells Congress](#). Westell will also exhibit its industry-leading suite of solutions at the event in Booth 204 with a live demonstration of the ClearLink UDIT, Intelligent Site Management, and the Near-Far performance tool. DAS & Small Cells Congress, the preeminent wireless industry event, will take place on June 8-10, 2015 at The Roosevelt New Orleans, a Waldorf Astoria Hotel in New Orleans, LA.

The "[DAS Optimization and Monitoring Techniques for Peak Performance](#)" panel, moderated by Earl Lum, President of EJM Wireless Research LLC, will occur on June 9 at 3:10 PM to 4:15 PM. The session will cover discussion points such as:

- The challenges of providing a heterogeneous DAS for coverage and capacity
- The importance of noise and interference management in DAS systems
- In-building DAS antenna OTE characterization
- Near-Far needs – what performance is required to significantly reduce the issue
- And more

Joining Westell's Rick Good on the panel will be Scott Pollister, Director of Business Development at C Squared Systems, LLC; Geoff O'Neill, Sales Director at Dali Wireless; and Heikki Korva, RF Team Leader at Pulse Electronics Antenna R&D.

Detailed discussions at the Westell exhibit booth 204 to include:

- Solving the [Near/Far problem](#)
 - Westell will showcase its new web-based tool, which compares Near-Far performance under defined conditions. Users can change environmental as well as DAS parameters and see the effect they have on Near-Far performance.
 - [Click here](#) to learn more about the Near/Far problem.
- [Active DAS RF Conditioners](#)
 - The ClearLink® Universal DAS Interface Tray (UDIT™) is technology neutral and provides signal conditioning and remote monitoring and control for single service provider, neutral host, and multicarrier systems.
 - [Click here](#) to watch an informative video on UDIT.

- Intelligent Site Management
- Digital repeaters and monitoring solutions
- Other industry-leading Westell products and solutions

Reporters or analysts interested in speaking with Westell executives are encouraged to contact Jennifer Davis at jdavis@westell.com.
