Announcing MakerBot Thingiverse Android App and iOS 1.1 Update

Thingiverse iOS App Selected by Apple As One of the Best New Social Networking Apps

BROOKLYN, N.Y.--(BUSINESS WIRE)-- As of today, the MakerBot® Thingiverse® app options just got a whole lot more mobile. Thingiverse users can now download the **Thingiverse Android app**, which has the same functionality as the [iOS Thingiverse app](#), launched in October 2013. The iOS Thingiverse app has become very popular and Apple recently selected the app as “One of the Best New Social Networking Apps.” [Thingiverse](#) is MakerBot’s global design community that features more than 200,000 downloadable digital files.

The new MakerBot Thingiverse Android app will have the same features as the iOS app, which includes the ability to easily search and explore Thingiverse from the comfort of... everywhere! The app lets you browse featured 3D designs, and new and noteworthy items, which have been selected by the Thingiverse community based on popularity. When viewing 3D designs, the user can scroll through beautiful slideshows of detail photos. Like, collect and quickly share directly from the app to your social networks or email them to friends.

“Bringing Thingiverse functionality to the fingertips of our community has always been a goal of ours,” noted Bre Pettis, CEO of MakerBot. “And now with the Android version of the app added to the already popular iOS version, Thingiverse users can access their favorites 3D models, collect and share them and view them on an Android or iOS device, whether at work or play.”

Some of the great features of the new Thingiverse Android app include uploading and sharing photos, which can be used to update profile and cover images from your phone. A Dashboard offers a carousel of featured things and Dashboard updates. The Explore function allows you to scroll through the latest and greatest things on Thingiverse and see new and noteworthy items uploaded to the site, featured items, popular items, made items, and have the ability to like and add items to your collections, then share with your social networks. There are also Thing detail screens that have photos of items, full screen slideshows of the designs, descriptions, instructions and license information. The User profile offers cover images, a custom avatar and description of the Thingiverse member; you can also follow other users, and see designs and made things based on profiles. Search is also included so you can find your favorite designs and search on topics or browse through the expansive Thingiverse library. When you print an item from Thingiverse, the app also provides an opportunity to take a photo, upload it and associate the image with a Thingiverse thing from your download history, collections, favorites or search. Thingiverse settings are also accessible via the app.

The 1.1 update for iOS is also coming soon and has been submitted to the Apple App Store for approval. The iOS 1.1 update includes the ability to add photos to thing designs or

MakerBot® Digitizer™ Desktop 3D Scanner scans posted to Thingiverse; the ability to browse your own collections and favorites in your user profile or browse collections in all user profiles; view and respond to comments on thing detail pages; and receive push notifications when new designs are published to Thingiverse or a MakerBot Digitizer scan is published, as well as the ability to easily add your own photos or respond when a user follows you.

MakerBot's Thingiverse is the 3D Design Community for discovering, printing and sharing 3D models. MakerBot believes Thingiverse is the best and largest place to discover and print 3D models and contains the world's largest 3D printing community with more than 160,000 members and 200,000+ and growing downloadable digital designs of free 3D models. MakerBot's Thingiverse website and app are a great place to learn about 3D printing, share ideas, customize 3D prints, remix and collaborate. There are even MakerBot Thingiverse superstar designers that share their design files, which you can download, print, share and get inspired.

Cautionary Statement Regarding Forward-Looking Statements

Certain information included or incorporated by reference in this press may be deemed to be

“forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, and Section 21E of the Securities Exchange Act of 1934. Forward-looking statements are often characterized by the use of forward-looking terminology such as “may,” “will,” “expect,” “anticipate,” “estimate,” “continue,” “believe,” “should,” “intend,” “project” or other similar words, but are not the only way these statements are identified. These forward-looking statements may include, but are not limited to, statements relating to the company’s objectives, plans and strategies, statements regarding the company’s products and their expected performance, statements that contain projections of results of operations or of financial condition (including, with respect to the MakerBot merger) and all statements (other than statements of historical facts) that address activities, events or developments that the company intends, expects, projects, believes or anticipates will or may occur in the future. Forward-looking statements are not guarantees of future performance and are subject to risks and uncertainties. The company has based these forward-looking statements on assumptions and assessments made by its management in light of their experience and their perception of historical trends, current conditions, expected future developments and other factors they believe to be appropriate. Important factors that could cause actual results, developments and business decisions to differ materially from those anticipated in these forward-looking statements include, among other things: the company’s ability to efficiently and successfully integrate the operations of Stratasys, Inc. and Objet Ltd. after their merger as well as the ability to successfully integrate MakerBot into Stratasys; the overall global economic environment; the impact of competition and new technologies; general market, political and economic conditions in the countries in which the company operates; projected capital expenditures and liquidity; changes in the company’s strategy; government regulations and approvals; changes in customers’ budgeting priorities; litigation and regulatory proceedings; and those factors referred to under “Risk Factors”, “Information on the Company”, “Operating and Financial Review and Prospects”, and generally in the company’s annual report on Form 20-F for the year ended December 31, 2012 filed with the U.S. Securities and Exchange Commission and in other reports that the Company has filed with the SEC. Readers are urged to carefully review and consider the various disclosures made in the company’s SEC reports, which are designed to advise interested parties of the risks and factors that may affect its business, financial condition, results of operations and prospects. Any forward-looking statements in this press release are made as of the date hereof, and the company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.
