Telkonet Will Hold a Special Conference Call on June 14, 2007 to Provide Business Update

GERMANTOWN, Md.--

Telkonet, Inc. (AMEX: TKO), the leader in providing in-building broadband access over existing electrical wiring, will provide a business update on a conference call to be held Thursday, June 14, 2007 at 11 a.m. EDT.

Those who wish to participate in the conference call may telephone (888) 335-6674 from the U.S. or (973) 935-2100 for international callers, PIN #8901282, approximately 15 minutes before the 11 a.m. EDT starting time. If you cannot participate in the call, but wish to listen to it, you may login at Telkonet's website at www.telkonet.com. You will be able to listen by either Windows Media or Real Player approximately 2 hours after the completion of the call.

Ron Pickett, president and CEO, will lead the call to discuss recent developments and strategies for the future, touching on channel partners, installations, and new technology. Management will offer insight into Telkonet's past successes and future opportunities in government sales from school districts to the Department of Defense and the private sector, as well as internationally.

About Telkonet

Telkonet develops and markets technology for the transmission of high-speed voice, video and data communications over the existing electrical wiring within a building. The revolutionary Telkonet iWire System(TM) utilizes proven powerline communications (PLC) technology, which enables the delivery of commercial high-speed broadband access from an IP "platform" that is easy to deploy, reliable and cost-effective by leveraging a building's existing electrical infrastructure. The building's existing electrical wiring becomes the backbone of the local area network, which converts virtually every electrical outlet into a high-speed data port, without the costly installation of additional wiring or major disruption of business activity.

The Telkonet iWire System can be installed rapidly and offers a viable and cost-effective alternative to the challenges of hardwiring and wireless local area networks (LANs). Telkonet's products are designed for use in commercial and residential applications, including multi-dwelling units and the hospitality and government markets. Applications supported by the Telkonet "platform" include but are not limited to: VoIP telephones, Internet connectivity, local area networking, video conferencing, closed circuit security surveillance and a host of other information services. For more information, please visit www.telkonet.com.

Statements included in this release may constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements involve a number of risks and uncertainties such as competitive factors, technological development, market demand and the Company's ability to obtain new contracts and accurately estimate net revenues due to variability in size, scope and duration of projects, and internal issues in the sponsoring client. Further information on potential factors that could affect the Company's financial results, can be found in the Company's Registration Statement and in its Reports on Forms 8-K filed with the Securities and Exchange Commission (SEC).
