Telkonet Announces Conference Call to Introduce Next Generation 200 Mbps Product Line

Telkonet Management Team to Discuss Revolutionary PLC Product Offering

GERMANTOWN, Md.--

Telkonet, Inc. (AMEX:TKO), the leading technology solutions provider for broadband networking, end-to-end service support and energy management, today announced its management team will hold a conference call to discuss the introduction of its new Gen5 200 Mbps powerline communications (PLC) product offering on January 14th at 4:15 pm (EST).

Jason Tienor, chief executive officer, commented, "Our Gen5 product is an important addition to our already strong product line. This new generation of product, which operates at 200 Mbps, provides our customers a feature-set that is unmatched in today's marketplace. The implications of this product go well beyond basic PLC transport, as we have integrated this revolutionary technology into our other product initiatives in the areas of wireless high-speed Internet access, energy management, and electric utility substation monitoring. Please join us next week as we outline the capabilities of this revolutionary product line. After our presentation, the management team will be available to answer questions relating to this product and to all of our other growth initiatives."

Interested parties will be able to listen to the call by clicking on the following link: http://viavid.net/dce.aspx?sid=00004A2B, or access at www.viavid.net. The call will also be available by dialing 480.629.9041 when calling within the United States or internationally. The conference ID is: 3831208. There will be a playback of the call available until January 17. To listen to the playback, please call 303.590.3030 when calling within the United States or internationally and enter pass code 3831208.

About Telkonet

Telkonet specializes in integrated solutions for broadband data networking and energy management, including in-building powerline communications (PLC) technology. Headquartered in Germantown, Maryland, USA, Telkonet serves thousands of customers worldwide. Telkonet's technology innovation is underpinned by end-to-end quality of service and comprehensive customer support. Its portfolio includes:

```
   --  The revolutionary Telkonet iWire System(TM), converting sites'
       existing internal electrical infrastructures into an IP
       network backbone.
```

```
--   The integrated EthoStream platform for wired and wireless
     HSIA, differentiated by outstanding remote management tools
     and dedicated customer support facilities.

--   Telkonet SmartEnergy, achieving 30% energy savings through
     intelligent in-room energy management.
