# Energy Management Solutions Provider in Texas Chooses Telkonet Technology

## Delivering World Class Energy Management Technology to Texas Markets

MILWAUKEE, April 7, 2014 /PRNewswire/ -- Telkonet, Inc. (OTC BB: TKOI), whose complementary business divisions include EcoSmart™, an energy management platform featuring Recovery Time™ technology and EthoStream®, one of the largest high-speed Internet access (HSIA) providers in the world, today announced their partnership with TEMSCO Energy Management Solutions, an engineering and integration company located in Central Texas.

With a client-base ranging in size from small to Fortune 500 companies, for over 40 years TEMSCO has been a leading provider of energy management solutions for commercial buildings and facilities across the United States. The core of TEMSCO energy management solutions is achieving cost savings by reducing energy consumption and enhancing building comfort and usability with minimal impact on the environment.

Gary Cook, president of TEMSCO said "we chose EcoSmart Technology because of the guest room recovery technology that Telkonet delivers to each guest room based on its environmental requirements. Other systems we looked at did not have the range of capabilities for managing individual room environmental control, without which we felt, could cause erratic room control for guests. In this business, guest comfort balanced with reduced energy use are key deliverables we need to provide. For added customer value, we work with our local utility companies to provide incentives and rebates to help defray installation costs for these systems."

"TEMSCO is an ideal partner to promote EcoSmart technology," commented Jason Tienor, Telkonet CEO. "Their engineering staff includes certified energy managers who have the technical knowledge and decades of experience to solve challenges and create solutions for even the largest applications. The EcoSmart system is the best total solution for many of the markets they serve and a good match for their technical expertise."

### ABOUT TELKONET

Telkonet, a leading United States-based energy management technology provider, offers hardware, software and services to commercial customers worldwide. The EcoSmart suite of

products, which includes EcoInsight and EcoWave intelligent thermostats, the EcoGuard energy management outlet and the EcoSwitch energy-efficient light switch can be deployed in most building environments to cut utility costs and enable remote monitoring and control using the EcoCentral management platform. Telkonet's energy management products have the power to reduce energy consumption, minimize carbon footprints and help eliminate the need for the construction of new power plants.
