Kilvinane Wind Farm

CSEL manages
Kilvinane Wind Farm,
located 8km East of

Dunmanway, County Cork, which comprises of three turbines. The wind farm holds the capability to produce approximately 8,500 MWh of energy annually, supplying to the National Grid and contributing to Ireland's renewable energy targets as the second largest producer of wind energy in the world in terms of the share of electricity provided by wind energy.

An Bord Pleanála approved the wind farm upgrade, as it was designed to ensure consistency with the character of the structure and the neighboring structures. This decision provides greater clarity and certainty for wind farm operators and planning authorities regarding the planning implications of routine maintenance activities.

"The upgrade will ensure the efficient operation of the wind farm and contribute to Ireland's ambitious renewable energy targets, providing cleaner energy to thousands of homes and businesses," said Mark Apsey MBE, Senior Vice President, UK and Ireland, at Ameresco. "This decision provides clarity and certainty for wind farm operators in Ireland, and we are excited to move forward with our turbine upgrades."

The advancement of renewable energy infrastructure is vital for Ireland's future, and this ruling paves the way for significant progress in the sector, ensuring continued innovation and development.
