Wrap Technologies' BolaWrap Featured on Prime-Time National Television Drama Series NCIS: Los Angeles

TEMPE, Arizona, Nov. 12, 2019 /PRNewswire/ -- Wrap Technologies, Inc. (the "Company" or "Wrap") (NASDAQ: WRTC), an innovator of modern policing solutions, reported that the updated, commercialized BolaWrap device was used on CBS hit series NCIS: Los Angeles (Season 11, Episode 7) on Sunday night.

This is the second time the BolaWrap was used in a CBS drama series – the original version of the device was featured on [S.W.A.T.](#) last year.

"It's exciting to see our device used on a nationally televised drama series," said Don De Lucca, Chief Strategy Officer at Wrap Technologies. "As departments across the US continue to adopt the BolaWrap as part of their less-lethal toolkit and as the number of successful field deployments increases, the BolaWrap will continue to be seen as a need-to-have tool, rather than a nice-to-have tool."

The BolaWrap was also featured on South Carolina's local [CBS](#) and [ABC](#) networks last week following a successful demonstration with Charleston Police Department and other local agencies.

To see a clip of the BolaWrap's feature on NCIS: Los Angeles, click [here](#). For the full episode, click [here](#).

About NCIS: Los Angeles

NCIS: Los Angeles is a drama about the high-stakes world of a division of NCIS that is charged with apprehending dangerous and elusive criminals, who pose a threat to the nation's security. By assuming false identities and utilizing the most advanced technology,

this team of highly trained agents goes deep undercover, putting their lives on the line in the field to bring down their targets. Special Agent "G" Callen is a chameleon who transforms himself into whomever he needs to be to infiltrate the criminal underworld. His partner is Special Agent Sam Hanna, a former U.S. Navy SEAL who has seen action in both Afghanistan and Iraq. The team includes the all-knowing Henrietta "Hetty" Lange, who handles the politics of the job and is tasked with providing everything from micro-surveillance cameras to cars for the team; Special Agent Kensi Blye, the exceptionally bright daughter of a slain Marine who lives for the adrenaline rush that comes with undercover work; Marty Deeks, a seasoned LAPD undercover detective who was recruited to the team by Hetty; tech operator Eric Beale, who has mastered every gadget and computer in the Ops Center; and intelligence analyst Nell Jones, who won the team's respect with her spot-on assessments and her shrewd insights. Armed with the latest in high-tech gear and sent regularly into life-threatening situations, this tight-knit unit relies on each other to do what is necessary to protect national interests.

About Wrap Technologies (Nasdaq: WRTC)

Wrap Technologies is an innovator of modern policing solutions. The Company's BolaWrap 100 product is a patented, hand-held remote restraint device that discharges an eight-foot bola style Kevlar® tether to entangle an individual at a range of 10-25 feet. Developed by award winning inventor Elwood Norris, the Company's Chief Technology Officer, the small but powerful BolaWrap 100 assists law enforcement to safely and effectively control encounters, especially those involving an individual experiencing a mental crisis.
