

## Company Overview

Basic Energy Services provides a range of services to America's oil and gas producers. Our operations span the heartland of domestic onshore production from Texas, Oklahoma, New Mexico, Arkansas, Kansas, California to the Appalachian Region and Rocky Mountain states. Our services support the entire life cycle of a well – from drilling and completions to production and, finally, abandonment.

Our headquarters in Fort Worth, Texas, supports six primary geomarkets conducting operations in the Texas Gulf Coast region, the Central region, the Permian Basin of West Texas, California, the Appalachian region and the Rocky Mountains. Our division managers average over 25 years of industry experience, virtually all within their respective markets. With nearly 4,500 employees, Basic ranks among the largest production services companies in the industry.

Founded in 1992, we have grown to be the nation's largest well servicing contractor – providing well repair, workover and completion services. We revised our business segments in the first quarter of 2008, which includes Well Servicing, Water Logistics, and Completion & Remedial Services. Within Completion & Remedial Services, services include rental and fishing tools, coiled tubing services, rig-assisted snubbing, and tubing testing.

At Basic, we are committed to providing a safe and rewarding workplace, giving our customers the value they expect and doing our part to support a strong and viable oil and gas industry.
