MANAGEMENT COMMENT

"Despite typical first quarter weather, we were able to increase our quarterly sequential average daily production and add nearly ten net wells to producing status," commented Northern's Chairman and Chief Executive Officer Michael Reger. "Although road (load) restrictions in the second quarter may affect activity levels, we remain optimistic about our second half 2013 production profile due to pad drilling efficiencies and a more stable and predictable operating environment without the impact of weather or road (load) restrictions."

(a) Realized prices include realized gains or losses on cash settlements for commodity derivatives.

In the first quarter of 2013, oil, natural gas and NGL sales, including the effect of settled derivatives, increased 38% compared to the first quarter of 2012, driven primarily by a 29% increase in production due to net wells added during the quarter. Northern's oil price differential to the NYMEX WTI benchmark during the first quarter of 2013 was \$3.62 per barrel, as compared to \$14.09 per barrel in the first quarter of 2012.

As a result of oil price derivative activities, Northern incurred a net cash settlement loss of \$0.4 million in the first quarter of 2013, compared to a loss of \$5.3 million in the first quarter of 2012. As a result of forward oil price changes, non-cash mark-to-market derivative losses were \$14.9 million in the first quarter of 2013 compared to non-cash losses of \$9.4 million in the first quarter of 2012.

Production expenses were \$8.6 million in the first quarter of 2013 compared to \$6.5 million in the first quarter of 2012. On a per unit basis, first quarter 2013 production expenses were \$8.64 per Boe, up 3% from the \$8.40 per Boe reported in the first quarter of 2012 but down 12% sequentially when compared to the fourth quarter of 2012.

Average production tax rates on oil and gas sales were 9.4% in the first quarter of 2013 and 9.3% in the first quarter of 2012. Production tax expense was \$7.8 million in the first quarter of

2013, compared to \$6.1 million in the first quarter of 2012.

General and administrative expense was \$4.0 million for the first quarter of 2013 compared to \$4.7 million in the first quarter of 2012. On a per unit basis, first quarter 2013 general and administrative expenses were \$3.99 per Boe, a 34% reduction when compared with the \$6.04 per Boe for the first quarter of 2012 and a 2% reduction when compared to fourth quarter 2012.

Depletion, depreciation, amortization and accretion ("DD&A") was \$26.8 million, or \$26.78 per Boe, in the first quarter of 2013, compared to \$18.4 million, or \$23.77 per Boe, in the first quarter of 2012. Depletion expense, the largest component of DD&A, was \$26.66 per Boe in the first quarter of 2013, compared to \$23.62 per Boe in the first quarter of 2012.

Interest expense was \$6.1 million for the first quarter of 2013 compared to \$0.2 million in the first quarter of 2012. The increase in interest expense is due to the issuance of our senior notes during the second quarter of 2012.

Net income was \$9.0 million in the first quarter of 2013, compared to \$8.8 million in the first quarter of 2012. Diluted net income per common share was \$0.14 for the first quarter of 2013 and the first quarter of 2012.

Adjusted Net Income for the first quarter of 2013 was \$18.1 million, or \$0.29 per diluted share, as compared to \$14.4 million, or \$0.23 per diluted share, for the first quarter of 2012. Northern defines Adjusted Net Income as net income (loss) excluding unrealized gain (loss) on derivative instruments, net of tax.

Northern's Adjusted EBITDA for the first quarter of 2013 was \$63.5 million, which represents a 42% increase over Adjusted EBITDA of \$44.8 million for the first quarter of 2012. Northern defines Adjusted EBITDA as net income (loss) before (i) interest expense, (ii) income taxes, (iii) depreciation, depletion, amortization and accretion, (iv) unrealized gain (loss) on derivative instruments and (v) non-cash share based compensation expense.

Adjusted Net Income and Adjusted EBITDA are non-GAAP measures. A reconciliation of these measures to the most directly comparable GAAP measure is included in the accompanying financial tables found later in this release. Management believes the use of these non-GAAP financial measures provides useful information to investors to gain an overall understanding of current financial performance. Specifically, management believes the non-GAAP results included herein provide useful information to both management and investors by excluding certain expenses and unrealized derivatives gains and losses that management believes are not indicative of Northern's core operating results. In addition, these non-GAAP financial measures are used by management for budgeting and forecasting as well as subsequently measuring Northern's performance, and management believes it is providing investors with financial measures that most closely align to its internal measurement processes.
