Our guidance is based on foreign exchange rates as of June 30, 2021.

Reconciliation of non-GAAP operating income, non-GAAP net income, non-GAAP net income per share and unlevered free cash flow guidance to the most directly comparable GAAP measures is not available without unreasonable efforts on a forward-looking basis due to the high variability, complexity and low visibility with respect to the charges excluded from these non-GAAP measures; in particular, the measures and effects of share-based compensation expense, employer taxes and tax deductions specific to equity compensation awards that are directly impacted by future hiring, turnover and retention needs, as well as unpredictable fluctuations in our stock price. We expect the variability of the above charges to have a significant, and potentially unpredictable, impact on our future GAAP financial results.

Non-GAAP Financial Measures & Key Metrics

In addition to disclosing financial measures prepared in accordance with GAAP, this press release and the accompanying tables contain certain non-GAAP financial measures. As of the second quarter of Fiscal Year 2021, we adjusted certain of our non-GAAP metrics for employer payroll tax expense related to equity incentive plans, as the amount of employer payroll tax expense is dependent on our stock price and other factors that are beyond our control and does not correlate to the operation of our business. Our historical presentation of these metrics has been updated in the tables below to reflect these adjustments for consistency.

Non-GAAP financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similarly titled measures presented by other companies. Dynatrace considers these non-GAAP financial measures to be important because they provide useful indicators of its performance and liquidity measures. These are key measures used by our management and board of directors to understand and evaluate our core operating performance and trends, to prepare and approve our annual budget and to develop short and long-term operational plans. In addition, investors often use similar measures to evaluate the performance of a company. Non-GAAP financial measures are presented for supplemental informational purposes only for understanding the company's operating performance. The non-GAAP financial measures should not be considered a substitute for financial information presented in accordance with GAAP, and may be different from non-GAAP financial measures presented by other companies. The GAAP financial measure most directly comparable to each non-GAAP financial measure used or discussed, and a reconciliation of the differences between each non-GAAP financial measure and the comparable GAAP financial measure, are included in this press release after the consolidated financial statements.

Dynatrace presents constant currency amounts for Revenue and Annual Recurring Revenue to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. To present this information, current and comparative prior period results for entities reporting in currencies other than United States dollars are converted into United States dollars using the average exchange rates from the comparative period rather than the actual exchange rates in effect during the respective periods. All growth comparisons relate to the corresponding period in the last fiscal year. Dynatrace provides this non-GAAP financial information to aid investors in better understanding our performance.

Annual Recurring Revenue "**ARR**" is defined as the daily revenue of all subscription agreements that are actively generating revenue as of the last day of the reporting period multiplied by 365. We exclude from our calculation of Total ARR any revenues derived from month-to-month agreements and/or product usage overage billings.

Dynatrace Net Expansion Rate is defined as the Dynatrace[®] ARR at the end of a reporting period for the cohort of Dynatrace[®] accounts as of one year prior to the date of calculation, divided by the Dynatrace[®] ARR one year prior to the date of calculation for that same cohort. This calculation excludes the benefit of Dynatrace[®] ARR resulting from the conversion of Classic products to the Dynatrace[®] platform.

Dynatrace customers are defined as accounts, as identified by a unique account identifier, that generate at least \$10,000 of Dynatrace[®] ARR as of the reporting date. In infrequent cases, a single large organization may comprise multiple customer accounts when there are distinct divisions, departments or subsidiaries that operate and make purchasing decisions independently from the parent organization. In cases where multiple customer accounts exist under a single organization, each customer account is counted separately based on a mutually exclusive accounting of ARR.

Unlevered Free Cash Flow is defined as net cash provided by (used in) operating activities and adjusted to exclude cash paid for interest (net of tax), non-recurring restructuring and acquisition related costs, along with costs associated with one-time offerings and filings, less cash used in investing activities for acquisition of property and equipment. However, given our debt obligations, unlevered free cash flow does not represent residual cash flow available for discretionary expenses.
