Volato Launches Parslee AI to Address LLM Weaknesses in Complex Documents

Software introduction complements the pending merger with M2i

ATLANTA--(BUSINESS WIRE)-- Volato Group, Inc. (NYSE American: SOAR) today announced the launch of *Parslee Document Intelligence*, an AI based software platform designed to make leading large language models (“LLMs”) – including OpenAI, Claude, Gemini, and Grok – more reliable when analyzing contracts, SEC filings, and other structured documents.

Unlike machine learning or chatbot products, Parslee acts as a preprocessor: it supplies structure, detects missing clauses, and maps relationships before passing content to a Large Language Model (LLM). The result is fewer hallucinations, reduced omissions, and an auditable trail of provenance for every analysis.

Originally developed to power Volato’s own compliance and operational workflows, Parslee moved into its first early paying pilot programs with external customers in the third quarter of 2025.

“Parslee is not another AI model, it’s the structure that models need but don’t have,” said Matt Liotta, CEO of Volato. “We built it to solve our toughest compliance problems at Volato. Now, by making it available to others, we’re showing that AI can be both smarter and more accountable in professional settings where accuracy really matters.”

Parslee’s determinism and auditability also align with the goals of M2i Global, Inc. (OTCQB: MTWO), with which Volato has signed a definitive merger agreement. “For projects that rely on government grants and contracts, there is no margin for error,” said Maj. Gen. (Ret) Alberto Rosende, CEO of M2i Global. “We see Parslee as a game-changer for M2i, helping us streamline the grant application process, cut down the time and cost of preparing complex filings, and ensure our documentation stands up to the highest levels of scrutiny. This is technology that will directly improve the speed and efficiency with which we can pursue critical projects.”

By extending its track record of commercializing internal technology, from Mission Control software to the Vaunt experiential travel platform, Volato continues to position itself as more than an aviation company. Parslee is the next step in leveraging proven software to unlock new opportunities.

Key Features of Parslee Document Intelligence include:

- **Deterministic Preprocessing** – supplies structure that reduces LLM hallucinations and missed clauses.

- **Audit Trail & Provenance** – every result has transparent origins for compliance and legal defensibility.
- **Entity & Clause Mapping** – automatic identification of risks, payment terms, liability caps, and omissions.
- **Multi-Model Compatibility** – works seamlessly with OpenAI GPT-5, Claude, Gemini, and Grok.
- **Enterprise Integration** – Microsoft 365-ready with SharePoint, OneDrive, and Teams.

With Parslee, Volato is monetizing AI software already built and battle-tested inside its business. Early pilots mark the beginning of external adoption, with a commercial launch to follow. Visit <https://www.parslee.ai> to learn more and sign up to our waitlist.

About Volato

Volato (NYSE American: SOAR) is an aviation company advancing the industry with innovative solutions in aviation software and on-demand flight access. Volato's proprietary Mission Control software drives efficiency across operations and supports operators in managing fractional ownership, charter, and other services. Volato's Vaunt platform connects travelers with available private flights, offering a flexible option for on-demand travel. With a commitment to advanced technology and customer-focused solutions, Volato is building scalable tools to elevate service quality and operational effectiveness in private aviation. Forward Looking Statements

This press release contains forward-looking statements within the meaning of the securities laws. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words or variation of words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates," "projects," "forecasts," "targets," "would," "will," "should," "goal," "could" or "may" or other similar expressions. Forward-looking statements provide management or the Board's current expectations or predictions of future conditions, events, or results. All statements that address operating performance, events, or developments that may occur in the future are forward-looking statements, including statements regarding the challenges associated with executing our growth strategy, including expected deliveries of aircraft and related sales, and developing, marketing and consistently delivering high-quality services that meet customer expectations. All forward-looking statements speak only as of the date they are made and reflect Volato's good faith beliefs, assumptions, and expectations, but they are not guarantees of future performance or events. Furthermore, Volato disclaims any obligation to publicly update or revise any forward-looking statement, except as required by law. By their nature, forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. Factors that might cause such differences include, but are not limited to, a variety of economic, competitive, and regulatory factors, many of which are beyond Volato's control, that are described in Volato's periodic reports filed with the SEC including its Annual Report on Form 10-K for the fiscal year ended Dec. 31, 2024, and other factors that Volato may describe from time to time in other filings with the SEC. You should understand that it is not possible to predict or identify all such factors and, consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.
