Greenwich LifeSciences CEO to be Interviewed Live on Benzinga's Power Hour

Interview will air on Thursday, March 11, 2021 at 12:30 pm EST

STAFFORD, Texas--(BUSINESS WIRE)-- Greenwich LifeSciences, Inc. (Nasdaq: GLSI) (the "Company"), a clinical-stage biopharmaceutical company focused on the development of GP2, an immunotherapy to prevent breast cancer recurrences in patients who have previously undergone surgery, today announced that CEO Snehal Patel will be interviewed live on Benzinga's Power Hour on Thursday, March 11, 2021 at 12:30 pm EST.

In the 15-20 minute interview, Mr. Patel will discuss the Company's development of GP2, including the positive Phase IIb clinical trial results, where 0% breast cancer recurrences were observed over 5 years of follow-up. Mr. Patel will also provide an overview of the planned Phase III trial and upcoming milestones.

About Benzinga's Power Hour

Power Hour is a daily livestream show that airs from 12:00 - 2:00 pm EST on Benzinga's YouTube and social channels. The first hour is hosted by Luke Jacobi, Benzinga's Director of Operations. The second hour is hosted by Jason Raznick, Benzinga's founder and CEO. Guests generally appear at every half hour interval for 15-20 minutes each. For more information on Benzinga, please visit their website at: https://www.benzinga.com/about

About Breast Cancer and HER2/*neu* Positivity

One in eight U.S. women will develop invasive breast cancer over her lifetime, with approximately 266,000 new breast cancer patients and 3.1 million breast cancer survivors in 2018. HER2/*neu* (human epidermal growth factor receptor 2) protein is a cell surface receptor protein that is expressed in a variety of common cancers, including in 75% of breast cancers at low (1+), intermediate (2+), and high (3+ or over-expressor) levels.

About Greenwich LifeSciences, Inc.

Greenwich LifeSciences is a clinical-stage biopharmaceutical company focused on the development of GP2, an immunotherapy to prevent breast cancer recurrences in patients who have previously undergone surgery. GP2 is a 9 amino acid transmembrane peptide of the HER2/*neu* protein. In a randomized, single-blinded, placebo-controlled, multi-center (16 sites led by MD Anderson Cancer Center) Phase IIb clinical trial, no recurrences were

observed in the HER2/*neu* 3+ adjuvant setting after median 5 years of follow-up, if the patient received the 6 primary intradermal injections over the first 6 months (*p = 0.0338*). Of the 138 patients that have been treated with GP2 to date over 4 clinical trials, GP2 treatment was well tolerated and no serious adverse events were observed related to GP2 immunotherapy. Greenwich LifeSciences is planning to commence a Phase III clinical trial using a similar treatment regime as the Phase IIb clinical trial.
