Greenwich LifeSciences CEO to Participate on Cancer Panel and to Present at Benzinga Biotech Conference

STAFFORD, Texas--(BUSINESS WIRE)-- Greenwich LifeSciences, Inc. (Nasdaq: GLSI) (the "Company"), a clinical-stage biopharmaceutical company focused on the development of GP2, an immunotherapy to prevent breast cancer recurrences in patients who have previously undergone surgery, today announced that CEO Snehal Patel will participate in multiple events at the Benzinga Biotech Small-Cap Conference.

Mr. Patel's interview that was previously recorded on March 11, 2021 on Benzinga's Power Hour is now available here: https://www.youtube.com/watch?v=P--GSgcTWoQ&t=12s

Benzinga has also published an article on the Company which can be viewed here: https://www.benzinga.com/general/biotech/21/03/20282424/greenwich-lifesciences-could-see-another-spike-in-stock-in-early-april

On March 24, 2021, Mr. Patel will participate in the Benzinga Biotech Small-Cap Conference in a 30 minute immunotherapy oncology panel at 10:25 am EST. Mr. Patel will also participate in a live 15 minute virtual presentation at 12:35 pm EST to Benzinga's small-cap investors followed by Q&A. For more information, please visit the conference website at: https://www.benzinga.com/events/small-cap/biotech/#agenda

About Breast Cancer and HER2/*neu* Positivity

One in eight U.S. women will develop invasive breast cancer over her lifetime, with approximately 266,000 new breast cancer patients and 3.1 million breast cancer survivors in 2018. HER2/*neu* (human epidermal growth factor receptor 2) protein is a cell surface receptor protein that is expressed in a variety of common cancers, including in 75% of breast cancers at low (1+), intermediate (2+), and high (3+ or over-expressor) levels.

About Greenwich LifeSciences, Inc.

Greenwich LifeSciences is a clinical-stage biopharmaceutical company focused on the development of GP2, an immunotherapy to prevent breast cancer recurrences in patients who have previously undergone surgery. GP2 is a 9 amino acid transmembrane peptide of the HER2/*neu* protein. In a randomized, single-blinded, placebo-controlled, multi-center (16 sites led by MD Anderson Cancer Center) Phase IIb clinical trial, no recurrences were observed in the HER2/*neu* 3+ adjuvant setting after median 5 years of follow-up, if the patient received the 6 primary intradermal injections over the first 6 months ($p = 0.0338$). Of the 138 patients that have been treated with GP2 to date over 4 clinical trials, GP2 treatment was well tolerated and no serious adverse events were observed related to GP2

immunotherapy. Greenwich LifeSciences is planning to commence a Phase III clinical trial using a similar treatment regime as the Phase IIb clinical trial.
