# Apollo Releases 12th Annual ESG Report

## Apollo's Commitment to ESG Continues to Drive Performance and Impact

NEW YORK, Aug. 03, 2021 (GLOBE NEWSWIRE) -- Apollo Global Management, Inc. (NYSE: [APO](#)) (together with its consolidated subsidiaries, "Apollo" or the "Firm") today announced the launch of its 12th ESG Report, "The Apollo ESG Effect." The report details Apollo's holistic approach to ESG integration in order to drive investment performance and positive impact across the Firm, its companies, and communities.

"For over a decade, we have built a successful program that has set the standard for ESG reporting within our industry, helping to drive sustainability, employee engagement, and responsible citizenship and we are committed to making further progress to ensure ESG is fully embedded into Apollo's culture," said Marc Rowan, CEO of Apollo. "We recognize that ESG integration is critical to our success, as our stakeholders are increasingly relying on us to deliver returns beyond strong financial performance. We also understand that lasting change will not happen overnight and we remain committed to doing the work, making progress, and, ultimately, being part of the solution to the ESG issues facing our firm, our funds' portfolio companies, and our communities."

Building on the Firm's 12-year track record of ESG reporting and engagement across its funds' portfolio companies, this year's report reflects the Firm's commitment to ESG across its business. In 2020, Apollo announced it will implement a best-in-class, transparent governance structure, including a new single-class "one share one vote" common stock structure. Apollo developed a proprietary ESG rating system for its credit platform, further incorporating ESG into its lending and investment processes. The Firm has also helped to launch industry-leading DE&I initiatives including *AltFinance* to expand opportunities for students at HBCUs interested in learning about and pursuing careers in alternative investment management.

"We believe our track record uniquely positions us to be a center of excellence for ESG best practices," said Laurie Medley, Apollo's Global Head of ESG. "We're helping to move the industry and others from admirable intentions to ESG action that's tangible and measurable, and we're committed to continually improving our model, metrics and methodology to the benefit of all of our stakeholders."

The report further demonstrates how Apollo continues to drive impact at the portfolio level. Since 2008, the Firm has collected over 79,000 ESG data points from more than 150 portfolio companies. This year, 57 portfolio companies across a diverse range of industries participated in the ESG program, representing 300,000 employees across 5,750 sites globally.
