Cautionary Language Regarding Forward-Looking Statements

This press release contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the "Act"), and are intended to enjoy the protection of the safe harbor for forward-looking statements provided by the Act as well as protections afforded by other federal securities laws. Such forward-looking statements include but are not limited to: the expected timing of product commercialization or new product releases; customer interest in Nauticus' products; estimated operating results and use of cash; and Nauticus' use of and needs for capital. Generally, statements that are not historical facts, including statements concerning possible or assumed future actions, business strategies, events, or results of operations, are forward-looking statements. These statements may be preceded by, followed by, or include the words "believes," "estimates," "expects," "projects," "forecasts," "may," "will," "should," "seeks," "plans," "scheduled," "anticipates," "intends," or "continue" or similar expressions. Forward-looking statements inherently involve risks and uncertainties that may cause actual events, results, or performance to differ materially from those indicated by such statements. These forward-looking statements are based on Nauticus' management's current expectations and beliefs, as well as a number of assumptions concerning future events. There can be no assurance that the events, results, or trends identified in these forward-looking statements will occur or be achieved. Forward-looking statements speak only as of the date they are made, and Nauticus is not under any obligation and expressly disclaims any obligation, to update, alter, or otherwise revise any forward-looking statement, whether as a result of new information, future events, or otherwise, except as required by law. Readers should carefully review the statements set forth in the reports which Nauticus has filed or will file from time to time with the Securities and Exchange Commission (the "SEC") for a more complete discussion of the risks and uncertainties facing the Company and that could cause actual outcomes to be materially different from those indicated in the forward-looking statements made by the Company, in particular the sections entitled "Risk Factors" and "Cautionary Note Regarding Forward-Looking Statements" in documents filed from time to time with the SEC, including Nauticus' Annual Report on Form 10-K filed with the SEC on April 15, 2025. Should one or more of these risks, uncertainties, or other factors materialize, or should assumptions underlying the forward-looking information or statements prove incorrect, actual results may vary materially from those described herein as intended, planned, anticipated, believed, estimated, or expected. The documents filed by Nauticus with the SEC may be obtained free of charge at the SEC's website at www.sec.gov.

Pioneering the Future of Autonomous Underwater Robotics

Nauticus Robotics specializes in underwater robotic equipment and software for the global offshore energy, telecoms, defense and port management sectors. The Company has experienced rapid growth and strong momentum in its short history, consistently demonstrating the Company's ability to design and deliver innovative autonomous solutions and hardware.

Powered by AI and machine learning – the ToolKITT software empowers supervised autonomy in surface and subsea platforms.

The next generation of purpose-built electric arms – providing versatility and maneuverability with a high degree of precision.

Exploring Diverse Market Opportunities

	Sector	Offshore O&G	Offshore Wind & Power	Military & Defense	Port Management	Environmental
	Uses	AUVs are used in site survey work and to support drilling campaigns via hazard or rig move surveys. They can also be used to determine optimal routes for pipelines as well as pipeline & subsea infrastructure inspections. ROVs can support drilling & perform IMR work. Increasingly, hybrid AUV/ROV systems are being developed & can be hosted on the seabed.	AUVs can be used to identify significant wind, wave, current and tidal factors (metocean) & can assist in survey & positioning (velocity of sound & conductivity, temperature & depth). Environmental Impact Assessments & cable route surveys can be also be conducted. ROVs can be used to perform IRM critical undersea infrastructure (e.g., cabling).	AUVs are used in mine countermeasure operations, antisubmarine warfare and search & rescue operations. Other applications include military hydrography / rapid environmental assessments; special operations (transferring dive teams); intelligence, surveillance & reconnaissance. ROVs can be used in UXO, minesweeping & in salvage operations by navies.	AUVs can be used to assess whether a port has sufficient under-keel clearance for a humanitarian aid vessel following a disaster. When used in tandem with buoys and sensor systems they can manage threats to port infrastructure and prevent piracy and smuggling. When used for security, AUVs can inspect vessel hulls, piers and harbors.	Environmental applications vary widely by focus, budget and funding body. Many AUVs have been built as research/engineering projects, or as a development test bed for new sensors, as well as to gather field data to support research efforts. This includes observation of marine animals or as part of ocean observation systems.
I	Sector Snapshot	The offshore oil & gas sector is mature, with large capital (greenfield) projects becoming less common than short-cycle projects which tieback to existing infrastructure (brownfield).	The offshore wind sector, whilst contending with inflationary pressures has broad policy support; it is poised to grow robustly, especially in deeper waters, further from shore.	Heightened geopolitical tensions have seen hit global spending hit \$2.2 trillion in 2022, an increase of 15% since 2017. Transnational partnerships & alliances underpin some of this spend.	Small uncrewed surface vessels may be able to act as waterborne improvised explosive devices; Illegal Unreported & Unregulated fishing & smuggling are ongoing sector issues.	The constantly changing nature of the ocean is of ongoing & high importance to scientists & policymakers. Research covers new diseases, coastal erosion & fishery decline & more.
	Potential Market Size in 2023 & in 2030 ⁽¹⁾	2023 2030 AUV /ROV \$1.72b \$2.13b	2023 2030 AUV /ROV \$0.58b \$1.52b	2023 2030 AUV /ROV \$2.12b \$2.83b	2023 2030 AUV /ROV \$1.12b \$1.32b	Emerging Opportunity

Operational Highlights - 2024

Achieved industry first untethered deepwater survey and inspections by successfully conducting the Aquanaut vehicle's first commercial project

- Significant milestone for us and the industry as evidence that the Aquanaut vehicle is ready for the market
- The project exceeded everyone's expectations
- Consequently securing 2025 pipeline with existing customers
- Second Aquanaut vehicle is expected to generate revenue in 2025 after certification
- We expect the vehicle to complete factory acceptance testing in Q2 2025
- Third Aquanaut vehicle assembly is being planned

Operational Highlights – 2024

Completed initial ToolKITT software testing on a legacy SeaTrepid Comanche ROV

- Reinforced the idea that augmenting an ROV's existing software will enable customers to reduce their overall subsea operational cost
- Initial commercial offering expected to be released in 2025 with station keeping and waypoint navigation as the first two autonomous capabilities
- ToolKITT is expected to extend the service life of legacy equipment by providing autonomous capabilities at a lower cost than buying new, enabling service providers to expand their execution pipeline due to added functionality

Operational Highlights - 2024

Completed initial design of the fit-for-purpose Olympic Arm variant

- Developed the design based upon feedback from 2024 Aquanaut operations and customer discussions
- Planning to manufacture, test, and install the first set of Arms onto an Aquanaut vehicle in 2025
- Installation onto an Aquanaut vehicle will make Aquanaut the first autonomous underwater vehicle with autonomous manipulators
- These autonomous Olympic Arms are expected to be available for the ROV market once fully proven on an Aquanaut vehicle

Operational Highlights – 2024

Formed partnership with SeaTrepid in 2024 and completed acquisition in Q1 2025

- Increases customer and contract relationships, giving us easy access to a broader group of early adopters
- By installing ToolKITT on ROVs and Aquanaut vehicles, the first subsea robotic collaboration solution will be realized, and customers can see the immediate value
- SeaTrepid's location in Robert, LA provides a testing facility with closer proximity to our launching location for offshore Gulf Coast operations, improving logistics and reducing costs

Quarterly Financials NAUTICUS ROBOTICS PROPRIETARY AND CONFIDENTIAL INFORMATION

Financial Highlights – 2024

- Formed partnership with SeaTrepid in 2024 and completed acquisition in Q1 2025
- Substantially reduced our run rate
- Substantially improved our balance sheet
- Generated commercial revenue with the Aquanaut vehicle for the first time in our history

Reconciliation of Non-GAAP Items

NAUTICUS ROBOTICS, INC.

Reconciliation of Net Loss Attributable to Common Stockholders (GAAP) to Adjusted Net Loss
Attributable to Common Stockholders (NON-GAAP)

Adjusted net loss attributable to common stockholders is a non-GAAP financial measure which excludes certain items that are included in net loss attributable to common stockholders, the most directly comparable GAAP financial measure. Items excluded are those which the Company believes affect the comparability of operating results and are typically excluded from published estimates by the investment community, including items whose timing and/or amount cannot be reasonably estimated or are non-recurring.

Adjusted net loss attributable to common stockholders is presented because management believes it provides useful additional information to investors for analysis of the Company's fundamental business on a recurring basis. In addition, management believes that adjusted net loss attributable to common stockholders is widely used by professional research analysts and others in the valuation, comparison, and investment recommendations of companies such as Nauticus.

Adjusted net loss attributable to common stockholders should not be considered in isolation or as a substitute for net loss attributable to common stockholders or any other measure of a company's financial performance or profitability presented in accordance with GAAP. A reconciliation of the differences between net loss attributable to common stockholders and adjusted net loss attributable to common stockholders is presented below. Because adjusted net loss attributable to common stockholders to common stockholders and may vary among companies, our calculation of adjusted net loss attributable to common stockholders may not be comparable to similarly titled measures of other companies.
