How Can Industrial IoT and Remote Monitoring Help Reduce OpEx?

Amy Walther, Vice President of ISM Sales and Business Development explains how Westell's new [RMX-4000 Remote Monitoring Terminal](#) expands the [IoT capabilities of Westell's Intelligent Site Management](#) solutions and reduces remote site operational expenses.

In this video, Amy discusses solutions for the unique challenges that rural and remote sites experience whether it is a telecommunications, data center, industrial IoT, or smart city IoT team regarding power and generator monitoring, service level agreements, disaster recovery, environmental alarms, HVAC monitoring, theft and site security IoT monitoring, and tower lighting alarm notifications.
