

Matinas BioPharma to Present at the 17th Annual Rodman & Renshaw Global Investment Conference on September 9, 2015

Presentation With Live Webcast on Wednesday, Sept. 9 at 10:00 a.m. EDT

BEDMINSTER, N.J., Sept. 2, 2015 (GLOBE NEWSWIRE) --<u>Matinas BioPharma Holdings</u>, <u>Inc.</u> (OTCQB:MTNB), a clinical-stage biopharmaceutical company focused on identifying and developing safe and effective antifungal and anti-bacterial therapeutics for the treatment of serious and life-threatening infections, today announced that it will be presenting at the <u>17th Annual Rodman & Renshaw Global Investment Conference</u> being held Sept. 9-10, 2015, at the St. Regis Hotel in New York, New York.

Roelof Rongen, President and Chief Executive Officer at Matinas BioPharma, will present on Wednesday, Sept. 9, 2015, at 10:00 a.m. EDT.

As part of his presentation, Mr. Rongen will provide an update on the anticipated commencement of the NIH/NIAID-funded Phase 2a clinical study of the Company's lead drug candidate MAT2203, an orally-administered, encochleated formulation of the broad spectrum fungicidal medication amphotericin B. He will also discuss the Company's development plans for MAT2501, an orally-administered, encochleated formulation of a broad spectrum aminoglycoside antibiotic to treat gram-negative bacterial infections.

A live webcast of the presentation will be available on the <u>Events</u> page of the <u>Investor Relations</u> section of the Company's website <u>(www.matinasbiopharma.com)</u>. A webcast replay will be available approximately two hours after the presentation ends and will be accessible for one month.

About Matinas BioPharma

Matinas BioPharma is a clinical-stage biopharmaceutical company focused on identifying and developing safe and effective broad spectrum antifungal and anti-bacterial therapeutics for the treatment of serious and life-threatening infections. The Company's proprietary, disruptive technology utilizes lipid-crystal nano-particle cochleate to nano-encapsulate existing drugs, making them safer, more tolerable, less toxic and orally available. The Company's lead drug candidate is MAT2203, an orally-administered, encochleated formulation of amphotericin B (a broad spectrum fungicidal agent). The Company also intends to file an investigational new drug application (IND) in the coming months for

MAT2501, which is an orally-administered, encochleated formulation of Amikacin (a broad spectrum aminoglycoside antibiotic agent) for gram-negative and intracellular bacterial infections. In addition, the Company is exploring development and partnership options for MAT9001, a prescription-only omega-3 fatty acid-based composition under development for hypertriglyceridemia, which has shown superiority versus Vascepa[®] (icosapent ethyl) in reducing serum triglycerides, Total- and Non-HDL-Cholesterol, apolipoproteins and PCSK9 levels.

The Company's lead anti-infective product candidates, MAT2203 and MAT2501, position Matinas BioPharma to become a leader in the safe and effective delivery of anti-infective therapies utilizing its proprietary lipid-crystal nano-particle cochleate formulation technology.

Forward Looking Statements: This release contains "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995, including those relating to the Company's strategic focus and the future development of its product candidates, including MAT2203, the anticipated timing of regulatory submissions and the ability to obtain required regulatory approval and other statements that are predictive in nature, that depend upon or refer to future events or conditions. All statements other than statements of historical fact are statements that could be forward-looking statements. Forward-looking statements include words such as "expects," "anticipates," "intends," "plans," "could," "believes," "estimates" and similar expressions. These statements involve known and unknown risks, uncertainties and other factors which may cause actual results to be materially different from any future results expressed or implied by the forward-looking statements. Forward-looking statements are subject to a number of risks and uncertainties, including, but not limited to, our ability to obtain additional capital to meet our liquidity needs on acceptable terms, or at all, including the additional capital which will be necessary to complete the clinical trials of our product candidates; our ability to successfully complete research and further development and commercialization of our product candidates; the uncertainties inherent in clinical testing; the timing, cost and uncertainty of obtaining regulatory approvals; our ability to protect the Company's intellectual property; the loss of any executive officers or key personnel or consultants; competition; changes in the regulatory landscape or the imposition of regulations that affect the Company's products; and the other factors listed under "Risk Factors" in our filings with the SEC, including Forms 10-K, 10-Q and 8-K. Investors are cautioned not to place undue reliance on such forwardlooking statements, which speak only as of the date of this release. Except as may be required by law, the Company does not undertake any obligation to release publicly any revisions to such forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events. Matinas BioPharma's product candidates are all in a development stage and are not available for sale or use.
